- 21 Social Media
- 22 Delegate Feedback
- 25 Acknowledgement

EXECUTIVE SUMMARY

We will need to include everyone and help them be above average. We need to focus on inclusivity. We need to allow for change, transformation, and conversion, and cannot expect that those who are at the start of their sustainability journey to become superstars overnight.

WATCH RT15 HIGHLIGHTS

In line with the theme of Inclusivity and Accountability, RT 15, held in Bali, Indonesia, once again provided a fitting platform for the entire RSPo community to get together to discuss opportunities and find collective solutions to foster transformation of the palm oil industry. Despite the untimely volcanic activity of Mt Agung, causing the first day of cluster workshops to be cancelled, RT15 went ahead, with only minor changes to the activities scheduled on Day 2 and Day 3 of November 28 to 30.

For the 477 attendees from 38 countries who converged at Grand Hyatt Bali, the event proved to be a time for self-examination and self-critique on past and current practices, with the view of making improvements and searching for what works best.

One thing was clear – how to tackle issues related to decrease of deforestation, improvement of governance, and betterment of workers rights permeated the mood at RT15. RSPo Chief Executive Officer Datuk Darrel Webber set a passionate tone in his opening address by urging members to work together to keep dialogue inclusive and transparent, and to support one another, in order to have real and long lasting change.

EXECUTIVE SUMMARY (CONTINUED)

“Let’s not block those who want to make a break from their past of bad practices from being given an opportunity to contribute to sustainable development. After all, let’s not forget that many of these sins and sinners have come to light because of the transparent environment that has been created by RSPO.”

He asked members who have failed to comply with the organisation’s standards to buck up, stressing the need to collaborate to prevent deforestation and peatland degradation, rather than compete with each other and lose speed in transformation.

The tone was reinforced by keynote speaker Faizal Parish, Director of Global Environment Centre. “RSPO is evolutionary, although most will prefer it to be revolutionary and change over night, but slow and steady wins the race. RSPO is one of the leading forms and motivators of such change. If we try to be too perfect, we can fail in trying to move something forward as there is no room to learn.”

A recurring debate throughout the conference was whether sustainable palm oil could win the race of transparency in Africa. The consensus from a plenary session on this topic was that Africa should not peg their threshold at a level that they will never make any steps.

“We agreed that we are already in some weird difficult situation, but we have brought all the stakeholders together. It is a big first step in realising that there are areas that need to be clarified and made better. For us, it was a good step” – were the words of Prof Moses M Zinnah, Dean at the College of Agriculture & Forestry, University of Liberia.

Webber during his welcome address mentioned the need to have real and long lasting change. “We will need to include everyone and help them be above average. We

need to focus on inclusivity. We need to allow for change, transformation, and conversion, and cannot expect that those who are at the start of their sustainability journey to become superstars overnight.”

Another topic of conversation during the conference was RSPO’s development in their current practices and how to remain relevant in the face of new challenges and among the emergence of competing certification schemes.

This drew wide-ranging discussions highlighting the review and refinement of the organisation’s current Principles & Criteria (P&C), active engagement with governments, and to collaborate more closely in communities beyond RSPO.

Sharing her thoughts on the P&C review process, Perpetua George; a voice representing the processors said they’ve seen a lot more alignment and consideration in RSPO’s overall effort. There is a tendency now to move towards simplification in text to ensure understanding is clearer. “We’ve matured in style and discussions are much more open. They are less polarising, with more recognition,” she said.

Olivier Tichit, a voice of the growers advocated that RSPO has learnt from its past. “Processes are more mature and more productive. We feel free to address and look more on what it means to have P&C and learnt that the smallholders are no more an afterthought.”

Webber asked members to not look at what the RSPO lacks, but what it already has. “RSPO cannot be shoving stakeholders into change. If they’re not already on board with us, we want to nudge them. Essentially, the stakeholders should want to be the owners of change (and to want to develop the RSPO standards further),” he added.

SMALLHOLDER ENGAGEMENT PLATFORM

Empowering smallholder farmers and engaging them in sustainable supply chains is essential for market transformation to truly take shape. To date, RSPO has been supporting smallholders through a variety of channels, but greater effort is needed to provoke large-scale inclusion of smallholders.

This platform aims to connect smallholders with potential project partners, as well as providing additional resources and support. If you are a smallholder group looking for a project partner or a market player looking to support a smallholder project, register yourself today or reach out to the Secretariat.

WELCOME ADDRESS

DATUK DARREL WEBBER
Chief Executive Officer, RSPO

In his usual witty way, Webber set the tone for the conference using the RT15 theme of Inclusivity and Accountability, to highlight some of the achievements which RSPO, together with its stakeholders had achieved throughout the year.

He presented key findings and noteworthy trends from the latest RSPO Impact Update report, which was published during RT, with significant impacts from new and emerging markets being focal point:

- **In Africa, an increase of more than 13,405 hectares in identified HCV area and growth in certified area by 22,773 hectares**
- **In Latin America, an 11% increase in certified area, bringing the total certified area to 285,687 hectares**
- **In China, the industry has been making great strides with a strong increase in the number of supply chain certified facilities there: 40% to be exact**
- **For the U.S. and Canada combined, RSPO membership has risen by approximately 62% to 371 members.**

Using anecdotes, Webber went on to share some food for thought and reminders, particularly during the crucial time of a Principles & Criteria (P&C) review year. He drew inspiration from Richard Thaler's "nudge" theory as an innovative way of changing the behaviour of the masses. "Essentially, we should allow stakeholders to be the owners of change - not through force and shoving, but by nudging," he said.

Aligned with the Inclusivity and Accountability theme, he urged members to form a collective effort to lead the change for a more sustainable palm oil industry. "Transformation is a journey that cannot be done in isolation. It is only achievable if we all play our part and commit to the sustainability goals we have set, together!" he said.

RT15 OPENING CEREMONY WITH
WELCOME ADDRESS

An aerial photograph of a tropical landscape. The top half shows a dense, vibrant green forest. Below the forest, a dark river flows through the landscape, bordered by a dirt road. The bottom half of the image shows a muddy, brownish riverbank with some sparse vegetation and a small island of greenery in the water.

RSPO CREDITS

RSPO Credits is the new name for the RSPO Book & Claim supply chain model. This supply chain model enables you to start supporting the production of sustainable palm oil, if you are new to the sustainable market, or if you buy fractions or derivatives of palm oil, palm kernel oil, or a product containing these fractions or derivatives.

Growers and crushers can only sell certified oil palm products through one of the supply chain models. By purchasing RSPO Credits, you directly support growers who have changed their practices to meet all the RSPO Principles and Criteria in order to produce certified sustainable palm oil.

The model also supports smallholders who may not have access to the market for certified sustainable oil palm. All RSPO members including end product manufacturers and retailers can cover the use of oil palm products by purchasing RSPO Credits based on a one-to-one ratio.

For oleochemicals and derivatives, please use the ratios explained in the RSPO Rules for Physical Transition of Oleochemicals and its Derivatives (www.rspo.org).

SUSTAINABLE PALM OIL IN AFRICA:

WHAT DOES IT MEAN TO AFRICANS?

MODERATOR

Ranveer Chauhan

Managing Director & Chief Executive Officer, Edible Oils & Natural Rubber, Olam International Limited

SPEAKERS

Prof. Moses M Zinnah Dean

College of Agriculture & Forestry, University of Liberia

Prof. Lee White

Executive Secretary, National Parks Agency of Gabon

In this session, both speakers made connections between inclusivity and accountability in dealing with the palm oil industry in Africa, specifically Liberia and Gabon. RSP0's presence in Africa was defined by Zinnah as he elaborated on the process of procuring full partnership of Tropical Forest Alliance (TFA) 2020.

Zinnah also emphasised that the process had created a significant amount of jobs, citing 80,000 as a direct amount. Despite the challenges in social, political, and technical spheres, transparency was crucial throughout the process, especially in areas of setting up land authority (independent body). Traceability was ensured along the various strong bilateral, multilateral engagements - from logging, all the way to the market.

[WATCH SESSION 1](#)

White explored the potential of avoiding deforestation in Gabon, if we were to see a reduction in carbon footprint by 50 per cent. Being the only country where elephants roam freely, it is a struggle to implement Gabon's nationally determined contribution in palm oil development. They are still exploring the possibilities and best practices in developing palm oil in such a highly forested country.

Chauhan concluded that although it is a feat, a partnership with RSP0 would prove beneficial in ensuring sustainability in palm oil development in Africa. The effort that Gabon is undertaking should also be replicated in South East Asia.

RSPO COMMITMENT FOR SMALLHOLDERS

MODERATOR

Marieke Leegwater

International Program Coordinator
Palm Oil, Solidaridad Network

SPEAKERS

Julia Majail

Smallholders Programme Manager,
RSPO

Bram Stoffele

Consultant, Aflatoun International

Sutiya

Farmer Representative,
KUD Tani Subur

Ofra Shinta Fitri

Innovation Manager, INOBU

Dr Isabella Tonaco

BASF Personal Care and Nutrition
GmbH

Mareike Felix

Manager Corporate Responsibility
International, ALDI SÜD

In this panel debate, Bram Stoffele presented his views on the RSPO Smallholders Academy. Experiences were shared on unlocking the challenges around smallholder certification, training, and capacity building.

Ofra Shinta Fitri spoke about her involvement in the certification process of smallholders in Kalimantan and highlighted that working with smallholders is “beneficial towards RSPO”. With strong government assistance it has taken as little as 1.5 years for some smallholders to become certified.

Discussions addressed how increased knowledge sharing with smallholders will be the key to helping them not only protect habitat, but also improve livelihoods. There was a clear call for better collaboration and collective action around smallholder issues and challenges within the industry.

[WATCH SESSION 2](#)

CATALOGUING THE IMPACTS OF RSPO

MODERATOR

Johan Verburg

Inclusive Value Chains Advisor,
Oxfam Novib

SPEAKERS

Dr Sarah Scriven

Post Doctoral Research Associate,
University of York

Dr Kimberly Carlson

Assistant Professor, University of
Hawaii

Dr Nia Kurniawati Hidayat

Lecturer, Bogor Agricultural
University

Backed by a wealth of research conducted within the community, participants gained insight into studies showing how RSPO certification scores in terms of impact on the ground, and where it can do more.

In this discussion, members debated how RSPO can maintain its relevance while taking the sustainability agenda a notch higher. Dr Sarah Scriven presented on the impact the organisation has that can demonstrate visible results, as well as the need to continuously strive for improvement.

There was consensus that since the RSPO is a platform that cuts across boundaries and has at hand a range of tools and approaches to better forest management, it should strive harder to engage governments in solving issues that require wider solutions.

One such challenge would be the fires in Indonesia. Dr Kimberly Carlson expounded the role that RSPO certification plays in overcoming such an outbreak.

Profitability also got some airtime, with Dr Nia Kurniawati Hidayat highlighting the need to find ways to value ecosystem services, which currently do not really count in the economy, and provide real benefits to the people who protect them, as well as give them a place in the market or value chain.

[WATCH SESSION 3](#)

RSPO DELIVERING NO DEFORESTATION, NO PEAT, NO EXPLOITATION

MODERATOR

Rod Taylor

Global Director, Forests, World
Resources Institute

SPEAKERS

Faizal Parish

Global Environment Centre

Dr Simon Lord

Chief Sustainability Officer,
Sime Darby Plantation Berhad

Ben Vreeburg

Sustainability Director,
IOI Loders Croklaan

The best was certainly saved for last. This final plenary session was nothing short of engaging as speakers educated the audience on RSPO NEXT pledges of no deforestation, no peat, and no exploitation.

Faizal Parish discussed the feasibility of such stringent measures and its impact on GHG assessment and reporting. He went on to applaud the work RSPO has put in, stating; "RSPO is evolutionary, although most will prefer it to be revolutionary and change over night. But slow and steady wins the race. RSPO is one of the leading forms and motivators of such change. If we try to be too perfect, we can fail in trying to move something forward as there is no room to learn".

Dr Simon Lord drove home the need to invest in balanced livelihoods, saying we have to allow development but it has to be responsible development. "Instead of fitting the landscape into palm oil, we need to fit palm oil into the landscape." He went on to question if there was a choice, would they choose the death penalty or rehabilitation for sinners.

Ben Vreeburg rebuked RSPO's efforts in delivering no deforestation, no peat, and no exploitation, citing a more positive approach instead of a no-no-no policy.

[WATCH SESSION 4](#)

THEORY OF CHANGE

The RSPO Theory of Change (ToC), is a roadmap that demonstrates how RSPO will achieve its vision; to make sustainable palm oil the norm. Together with the support of members, partners, and other actors, key strategies and activities are implemented, to trigger the transformation of the palm oil sector. The strategies are intended to bring about direct outputs in the form of increased adoption of the RSPO standards, greater transparency and inclusivity in the RSPO system, increased market uptake of sustainable palm oil, and improved enabling environment.

Over time, these outputs lead to outcomes that are expected to improve the quality of life of oil palm farmers, create a more prosperous palm oil industry, and enable us to better conserve our planet and its resources. These benefits are then reciprocated by companies and consumers in the palm oil supply chain, as they realise the importance of sustainable sourcing, which leads to increased market demand for sustainable palm oil. When the ToC is fully realised, it delivers change where it matters most - on the ground; a space where oil palm, the environment, and local communities can co-exist in harmony.

COFFEE WITH THE COMPLAINTS PANEL

MODERATOR

Paul Wolvekamp

Deputy Director, Both ENDS

SPEAKERS

Matthias Diemer

WWF Switzerland

Lanash Thanda

SEPA (Sabah Environmental Protection Association)

John Payne

Borneo Rhino Alliance

Melizel Asuncion

Verite

Marieke Leegwater

Solidaridad

Lim Soo Choo

Bumitama Agri Ltd

Frazer Lanier

Citibank

The dialogue with members of the Complaints Panel proved beneficial as it reinforced RSP0's commitment towards transparency. The conversation also presented a platform for attendees to get to know the members of the Complaints Panel, what they do, their backgrounds, and describe the processes behind the RSP0 Grievance System.

Matthias Diemer explained that when filing a complaint, specifics need to be looked into. Clear information related to the complaints and its parties, as well as the allegations, need to be backed up with proof and detailed reasoning.

It was also explained that a case can be reopened in light of significant new evidence. New nuances include separation of power, as all decisions will be made by the panel. This has strengthened the power of the Panel, allowing them to issue interim measures and conduct investigations. The new procedure gives authority to the complaints panel including decisions on suspension and termination, without the board's endorsement.

As they finalise their SOP at the secretariat level, Marieke Leegwater believes there are various causes for delays. "Sometimes the respondents aren't super quick and we have to time again remind them to respond. Some cases have legal procedures involved. Another reason for delay might be the need to get a legal opinion or independent investigation, and that's not going to happen overnight."

Constructive criticism of the standard and its grievance process is needed and the panel explained that they are continuing to work towards a robust process that can inspire confidence in the RSP0 label, from both consumers and stakeholders.

[WATCH SESSION 5](#)

RSPO PRINCIPLES AND CRITERIA 2018 REVIEW

MODERATOR

Johan Verburg

Voice of Novib

SPEAKERS

Datuk Darrel Webber

Voice of RSPO

Perpetua George

Voice of Processor

Olivier Tichit

Voice of Grower

Rosemary Addico

Voice of Smallholders

Faizal Parish

Voice of Environmental NGO

Daryll Delgado

Voice of Social NGO

Frazer Lanier

Citibank

This session discussed RSPO's progress and specific achievements in the Principles and Criteria (P&C) review process thus far.

Perpetua George shared that RSPO has seen greater alignment and consideration in its overall effort to the review process. Although there is a tendency now to move towards simplification in text to ensure understanding is clearer, she feels the RSPO P&C has matured in style as discussions are much more open.

From her perspective, Rosemary Addico felt it was beneficial that the voice of smallholders has been included from the very beginning. While Darrel Webber understood there are stronger indications for due diligence on the transactions involving third party contractors and recruitment agencies.

RSPO reached almost 10,000 stakeholders, going around the world in 60 days educating people on the P&C and its review process. "We must build the next P&C review to include Latin America and Africa," said Webber.

Faizal Parish said there has been progress in indicators for best management practices for peatlands. In the previous rounds in the revision, there seemed to be full cooperation by the stakeholders, but other environmental aspects such as deforestation were still under debate.

[WATCH SESSION 6](#)

CLOSING NOTE

RT15 has been a bit of a roller coaster ride for me and my team and we could not have done it without the support from everyone here.

I'd like to thank the sponsors, exhibitors and media partners.

Special thanks to our excellent event organising partner, GB Works. Despite the untimely volcanic situation, their efforts have made this event a success.

I would also like to give thanks to the RSP0 Secretariat team who worked 200 percent, around the clock. Although most of our team didn't make it to Bali and we had a skeleton crew - the ones who came worked really hard. I'm appreciative of that.

Thank you once again and see you all at RT16.

Best Regards,

Daruk Darrel Webber
Chief Executive Officer
RSP0

RSPO

Roundtable on Sustainable Palm Oil

The RSPO is an international non-profit organization formed in 2004 with the objective to promote the growth and use of sustainable oil palm products through credible global standards and engagement of stakeholders.
