

# RSPO

## Summary Report of Planning & Management of PT Lestari Abadi Perkasa Ketapang District – West Kalimantan Province

---

### 1. Executive Summary

This Executive Summary fulfills the RSPO New Planting Procedures Format “Summary Report of Planning & Management” (RSPO latest reversion of 5<sup>th</sup> May 2010).

PT Lestari Abadi Perkasa is situated in Pemahan Sub-District, Nanga Tayap Sub-District, Tumbang Titi Sub-District, Ketapang District – West Kalimantan Province. The Consent License (Izin Prinsip) for PT Lestari Abadi Perkasa was approved on 15<sup>th</sup> January 2010 by the Ketapang Regent decree (Surat Keputusan Bupati Ketapang) No. 525 / 32 / DPU-TR; the total area based on Consent License is ± 13,000 ha. The Permitted Area (Izin Lokasi) was approved on 10<sup>th</sup> February 2010 by the Ketapang Regent decree (Surat Keputusan Bupati Ketapang) No 73 Year 2010; the total area based on Permitted Area is ± 13,000 ha. The Social Environment Impact Assessment (AMDAL) was approved by AMDAL Commission of West Kalimantan Province No 92/BLHD/2012 dated on 12<sup>th</sup> January 2012 and for the Environmental Permit (Izin Kelayakan Lingkungan) was approved by Governor of West Kalimantan Province (Surat Keputusan Gubernur Kalimantan Barat) No. 92/BLHD/2012 dated on 12<sup>th</sup> January 2012. The Plantation Permit (Izin Usaha Perkebunan, IUP) was approved on 24<sup>th</sup> February 2012 by the Ketapang Regent decree (Surat Keputusan Bupati) Nomor : 83/DISBUN-D/2012; the total area is ± 5,478 ha. PT Lestari Abadi Perkasa will not cultivate these areas in accordance to the wishes of the communities and in accordance with the areas allocated in the IUP. Hence, in the development plan, the Company will only carry out development within the IUP area.

Besides fulfilling the regulatory requirements of conducting social environmental impact assessment (AMDAL), the company also conducted and completed the High Conservation Values Identification (HCV) and Social Impact Assessment (SIA) 31<sup>st</sup> October 2010 – 6<sup>th</sup> November 2010 by independent consultants from Aksenta who has been accredited and approved by RSPO. The results of the HCV assessment by the RSPO accredited assessors from Aksenta have shown that there is no primary forest in the Permitted Area of PT Lestari Abadi Perkasa. Almost the entire land has been opened, the vegetation's cover dominated by the rubber (*Hevea brasiliensis*), agro forestry and paddy field. Based on The Report of Semi Detail Soil Survey and Palm Oil Suitability Assessment of PT Lestari Abadi Perkasa 2011 by independent consultan (JH – Agricultur Services) concluded that there is no peatland area in the Permitted Area of PT Lestari Abadi Perkasa. As for potential HCV areas, five types of HCV were identified by Aksenta; these are HCV 1, HCV 3, HCV 4, HCV 5 and HCV 6 within the Permitted Area of PT Lestari Abadi Perkasa. The original HCV area identified was

# RSPO

± 3,385.98 ha or ± 26.05 % of the total Permitted Area in the assessments by Aksenta. The important elements for HCV 1 are the existence of population and tracks of endangered species such as common Bornean river turtle (*Orlitia borneensis*), Sunda pangolin (*Manis javanica*), Bornean agile gibbon (*Hylobates albibarbis*) and Bornean clouded leopard (*Neofelis diardi* ssp. *borneensis*). The important elements for HCV 3 are related hill dipterocarpa forest. The important elements for HCV 4 are related to the catchment areas, potential damage from erosion, springs, river riparian and firebreaks. The important elements for HCV 5 are related to basic needs of local communities or the main asset of society. The important elements for HCV 6 are related to the traditional and sacred graveyard. The HCV areas outside the IUP approved areas will be included in the monitoring and socialization plan with the local communities.

The results of the Social Impact Assessments (SIA) conducted by independent consultants from Aksenta who has been accredited and approved by RSPO have shown that the company's development of oil palm plantation and palm oil mill production has significant and positive impacts on local livelihoods and the society's social sustainability. The findings have defined how the company's business management can influence the key issues in the respective component of the social sustainability of the local community. There are described in the three basic components for society's social sustainability that influences the planning of future company's operation; they are: 1) *Natural capital*, 2) *Social capital*, and 3) *Physical capital*.

The findings on both the HCV and SIA by independent consultants from Aksenta who has been accredited and approved by RSPO have been incorporated in the oil palm development plan of PT Lestari Abadi Perkasa which includes the HCV and SIA management and monitoring plans of PT Lestari Abadi Perkasa. Development of the HCV and SIA management and monitoring plans was facilitated by Aksenta team through a workshop for the PT Lestari Abadi Perkasa management and sustainability team conducted from 16<sup>th</sup> - 17<sup>th</sup> January 2012 in PT Agrowiratama - Office Sambas, West Kalimantan. The purpose of the workshop on HCV - SIA management and monitoring program for PT Lestari Abadi Perkasawas to enable the management team to have a better understanding of the HCV and SIA findings and their related implications so as to provide reference points in developing the operational activities of the company related to the HCV, social managements synergy with the company's development of oil palm plantation. The results of the assessment and the management plans are documented and presented and discussed in a stakeholders' consultation on 19<sup>th</sup> January, 2012 in Ketapang. The feedback from this stakeholders' consultation have also been incorporated into the oil palm development plan as well as the HCV and SIA management plan.

## 2. Reference Documents

The reference documents are as follow:

1. Social Environment Impact Assessment (AMDAL) was approved by AMDAL Commission of West Kalimantan Province No. 92/BLHD/2012 dated on 12 January 2012.
2. The HCV Identification document is in the report “HCV Assessment report for PT Lestari Abadi Perkasa, April 2011 by Aksenta”,
3. The SIA report is in “(SIA Assessment report for PT Lestari Abadi Perkasa, January 2011 by Aksenta”,
4. The management and monitoring plans for HCV in the “The Management & Monitoring Plans of HCV PT Lestari Abadi Perkasa, approved in March 2012”,
5. The management and monitoring plans for SIA in the “The Management & Monitoring Plans of Social PT Lestari Abadi Perkasa, approved in January 2012”,
6. The report on stakeholders consultation of PT Lestari Abadi Perkasa, dated on 19<sup>th</sup> January 2012,
7. The oil palm development plan of PT Lestari Abadi Perkasa.

### **Brief summary of the above**

Based on social environment assessment, the positive and negative impacts of the operational activities of PT Lestari Abadi Perkasa have been identified. The key positive impacts include enhancing the income of the communities and providing more job opportunities to the local communities with the development of oil palm plantations in the area. Possible negative impacts are threats to the ecology as well as potential conflicts of workforce and socio-cultural balances.

In addition to the SEIA (AMDAL) assessments, PT Lestari Abadi Perkasa has also conducted independent high conservation values assessments and social impact assessments involving external experts, Aksenta; the key consultants conducting these assessments have been accredited and approved by RSPO. Based on the assessments, with the expert guidance of Aksenta, PT Lestari Abadi Perkasa has developed management and monitoring plans to mitigate any negative impacts and enhance the positive ones. Management and monitoring of social and environmental impacts are based on the operational activities that can cause impacts during the development as well as during the operational stages. Potential impacts

# RSPO

and other negative impacts as perceived by the communities arising from PT Lestari Abadi Perkasa's the new activities were also identified by the external consultants. By implementing sound social and environmental management practices, it is expected that these conflicts, both of ecology or social, can be minimized and the relationship between the company and local communities can be preserved and harmonized.

The results of the HCV assessment by the RSPO accredited assessors from Aksenta have shown that there is no primary forest in the Permitted Area (Izin Lokasi) of PT Lestari Abadi Perkasa. Almost the entire land has been opened, the vegetation's cover dominated by the rubber (*Hevea brasiliensis*), agroforestry and paddyfield. Based on The Report of Semi Detail Soil Survey and Palm Oil Suitability Assessment of PT Lestari Abadi Perkasa 2011 by independent consultan (JH – Agricultur Services) concluded that there is no peatland area in the Permitted Area of PT Lestari Abadi Perkasa. Five types of HCV were identified by Aksenta; these are HCV 1, HCV 3, HCV 4, HCV 5 and HCV 6 within the Permitted Area of PT Lestari Abadi Perkasa. The original HCV area identified was  $\pm 3,385.98$  ha or  $\pm 26.05$  % of the total Permitted Area in the assessments by Aksenta. The important elements for HCV 1 are the existence of population and tracks of endangered species such as Common Bornean river turtle (*Orlitia borneensis*), Sunda Pangolin (*Manis javanica*), Bornean agile gibbon (*Hylobates albibarbis*) and Bornean clouded leopard (*Neofelis diardi* ssp. *borneensis*). The important elements for HCV 3 are related hill dipterocarpa forest. The important elements for HCV 4 are related to the catchment areas, potential damage from erosion, springs, river riparian and firebreaks. The important elements for HCV 5 are related to basic needs of local communities or the main asset of society. The important elements for HCV 6 are related to the traditional and sacred graveyard. The HCV areas outside the IUP approved areas will be included in the monitoring and socialization plan with the local communities (Details are presented in HCV Report of PT Lestari Abadi Perkasa, April 2011 by Aksenta).

PT Lestari Abadi Perkasa conducted a Stakeholders' Consultative Meeting on 19<sup>th</sup> January, 2012 in the Ketapang District, West Kalimantan (Agenda consultative meeting are presented in **Appendix 1**). This stakeholder consultation was held simultaneously with PT Mentari Pratama's stakeholder consultation as most stakeholders are common to both PTs *al beit* different participants from villages around the respective PTs were present in the respective session that affect them. Both PT Mentari Pratama and PT Lestari Abadi Perkasa are managed by same GM and adhere to the RSPO New Planting Procedures. PT Mentari Pratama is beside PT Lestari Abadi Perkasa. There were 62 participants present during this consultative meeting (attendance list of participant are presented in **Appendix 2**). Present in the meeting were governmental offices (Natural Resource Conservation Department-BKSDA, The Plantation Office, The Forestry Office, The Office for Environment-BLH),

# RSPO

local communities, the government of local village and Sub-District, Army Department (DANRAMIL), The local NGOs and the local existed companies.

The Stakeholders' Consultative Meeting was facilitated by independent consultant – Aksenta with the assistance of Yayasan Gunung Palung and the Public Relation (Humas) Manager of PT Lestari Abadi Perkasa. Management PT Lestari Abadi Perkasa, Natural Resource Conservation Department (BKSDA), The Plantation Office, The Forestry Office, The Office for Environment (BLH) and Aksenta presented pertinent issues regarding sustainable development of oil palm. There were active questions and answers following the presentation. These are recorded and the highlights are reported in this summary report.

PT Lestari Abadi Perkasa's development plan has incorporated the findings from SEIA (AMDAL), HCV Assessments and Social Impact Assessments by Aksenta as described above when implementing the operational plans. Management plans for HCV areas and management plans for handling social impacts have been drawn up. The total area allocated in the Plantation Permit (Izin Usaha Perkebunan, IUP) is  $\pm 5,478$  ha. The HCV management plan has been developed for these areas. The net area for cultivation of oil palm is  $\pm 2,934$  ha. The balance areas left out of oil palm planting are  $\pm 1,133$  ha of HCV areas and others (enclave, building, nursery, etc) is  $\pm 1,411$  ha. Of the total planted area of  $\pm 2,934$  ha, 20 % of the land (or  $\pm 587$  ha) will be allocated to development of smallholder cooperative scheme. The other 80 % of planted areas (or  $\pm 2,347$  ha) will be under the estates or *inti*. In accordance with the operational management of PT Lestari Abadi Perkasa land development will commence in year 2012.

# RSPO

## List of Legal documents and regulatory permits related to the areas assessed

The permits that have been obtained by the company are inclusive of Consent License (Izin Prinsip), Permitted Area (Izin Lokasi), Social Environment Impact Assessment (AMDAL), Environmental Permit (Izin Kelayakan Lingkungan) and the Plantation Permit (Izin Usaha Perkebunan). The followings are the list of the licenses and recommendations:

**Table 1.** Types of permits and recommendations PT Lestari Abadi Perkasa

No	Licenses and recommendations	Issued by	Number and date	Note
1.	Deed of Establishment	Notary Hustiati, SH	No. 83 Date: 25 <sup>th</sup> September 2006	
2.	Adjustment Article of Association	Notary Lili Suryati, SH	No. 1 Date: 1 <sup>st</sup> Novmber 2010	
3.	Taxpayer Notification Number	Tax Serve Office	02.528.801.0 – 112.000	Registered 02-04-2007
4.	Consent License (Izin Prinsip)	Regent of Ketapang (Bupati Ketapang)	No 525 / 32 / DPU-TR Date: 15 <sup>th</sup> January 2010	± 13,000 ha
5.	Permitted Area (Izin Lokasi)	Regent of Ketapang (Bupati Ketapang)	No. 73 Tahun 2010 Date: 10 <sup>th</sup> February 2010	± 13,000 ha
6.	Location Suitability Recommendation with Macro Plantation Development Plan of West Kalimantan Province	Governor of West Kalimantan Province	No. 525 / 18 / Ekbang-A Date: 17 <sup>th</sup> October 2011	± 6,335 ha
7.	Social Environment Impact Assessment (AMDAL)	AMDAL Commission of West Kalimantan Province	No 92/BLHD/2012 Date : 12 <sup>th</sup> January 2012	Approved
8.	Environmental Permit (Izin Kelayakan Lingkungan)	Governor of West Kalimantan Province	No 92/BLHD/2012 Date : 12 <sup>th</sup> January 2012	Approved
9.	Plantation Permit	Regent of Ketapang (Bupati Ketapang)	No 83/DISBUN-D/2012 Date : 24 <sup>th</sup> February 2012	± 5,478 ha

## **Area and time-plan for new plantings**

The proposed new planting area by PT Lestari Abadi Perkasa is in the location of the Plantation Permit (Izin Usaha Perkebunan, IUP) which have been agreed by the owners of the land through the Free, Prior and Informed Consent Process (Report on Process of FPIC – Free, Prior and Informed Consent of PT Lestari Abadi Perkasa). Land development and planting of oil palm will begin in 2012 following the procedures of the RSPO New Planting Procedures (NPP). PT Lestari Abadi Perkasa's development plan has incorporated the findings from SEIA (AMDAL), HCV Assessments and Social Impact Assessments when implementing the operational plans.

There is no primary forest in the PT Lestari Abadi Perkasa's Permitted Areas (Izin Lokasi). Almost the entire land has been opened, the vegetation's cover dominated by the rubber (*Hevea brasiliensis*), agroforestry and paddyfield. Management plans for HCV areas and management plans for handling social impacts have been drawn up. Based on The Report of Semi Detail Soil Survey and Palm Oil Suitability Assessment of PT Lestari Abadi Perkasa 2011 by independent consultan (JH – Agricultur Services) concluded that there is no peatland area in the Permitted Area of PT Lestari Abadi Perkasa.

As part of the process of free, prior and informed consent (FPIC), procedures to ensure that there is participation in the social and environmental harmony in the development of the oil palm planting project by PT Lestari Abadi Perkasa, consultation with the relevant stakeholders is to provide opportunities for communication and sharing the informations/opinion/suggestions between the PT Lestari Abadi Perkasa and the the affected stakeholders to move forward for the benefit and common progress. PT Lestari Abadi Perkasa has established standard operating procedures for land acquisition and compensation procedures based on the principle of free, prior and informed consent. The company also has established the complaint and grievance procedures so that the problem solving process is done through discussion and mutual deliberation. PT Lestari Abadi Perkasa will abide by the requirements in accordance of the Decree of the Minister of Forestry No: P.14/Menhut-II/2011, 10 March 2011 before commencing land clearing. The company will inform in writing to the Forestry Department of Ketapang District for assessment of the area on the requirements of the Wood Utilization Permit (Izin Pemanfaatan Kayu).

Based on the development plan data of PT Lestari Abadi Perkasa 2012, PT Lestari Abadi Perkasa will implement the smallholder scheme system with a ratio of 20:80 (smallholder scheme : estate), based on net available area for planting, that is the smallholder scheme (20%) and estate oil palm plantations (80%) and both will be managed by the PT Lestari Abadi Perkasa Estate Management. The total area allocated in the Plantation Permit (Izin Usaha Perkebunan, IUP) is ± 5,478 ha. HCV areas will be left out of planting. The HCV

# RSPO

management plan has been developed for these areas. The net area for cultivation of oil palm is  $\pm 2,934$  ha. The balance areas left out of oil palm planting are  $\pm 1,133$  ha of HCV areas and others (enclave, building, nursery, etc) is  $\pm 1,411$  ha. Of the total planted area of  $\pm 2,934$  ha, 20 % of the land (or  $\pm 587$  ha) will be allocated to development of smallholder cooperative scheme. The other 80 % of planted areas (or  $\pm 2,347$  ha) will be under the estates or *inti*. In accordance with the operational management of PT Lestari Abadi Perkasa land development will commence in year 2012. The detail of area statements and time-plan for new plantings are presented in report “Development plan of PT Lestari Abadi Perkasa, and summarized in **Table 2** and **Table 3**.

**Table 2** Estimation of new plantings area PT Lestari Abadi Perkasa

The implementation of the HCV and SIA management & monitoring plans in the field will be implemented by experienced personnel who possessed a high level of dedication of knowledge and special technical skills. Sustainability Staff, Audit & Certification (A&C) Staff, with the assistance of the Public Relation (Humas) Team, stationed at the location, will provide support in these activities. The Estate Manager is directly responsible on the implementation of the plans of management and monitoring. In addition, the Senior Estate Manager is accountable in fulfilling of the requirements for the plan and as well as responsible in analyzing the input results from the monitoring plans. The General Manager is accountable and responsible to ensure that the Overall Development Plan including the management of HCV and SIA is implemented according to the time plan and budget. The management team is supported and supervised by the Regional General Manger. The detail of the responsibilities and roles of the HCV and SIA development and preparation of management plans and monitoring are summarized in the “The Management & Monitoring Plans of HCV/SIA PT Lestari Abadi Perkasa” document. The Head Office Estate Department, Public Relation (Humas) Department, and Sustainability Department will provide the overall support in the implementation of the development plan.

## **Stakeholders to be involved**

The process of the HCV and SIA development and preparation of management plans and monitoring PT Lestari Abadi Perkasa also involved relevant stakeholders such as governmental offices (Natural Resource Conservation Department-BKSDA, The Plantation Office, The Forestry Office, and The Office for Environment-BLH), local communities, the government of local village and Sub-District, The local NGOs and the local existed companies.

Consultation with the relevant stakeholders to provide opportunities for communication and sharing the informations/opinion/suggestions between the PT Lestari Abadi Perkasa and the workers, contractors, suppliers, smallholders (plasma), consumers, government agencies and communities to move forward for the benefit and common progress. This is also part of the process of free, prior and informed consent procedures to ensure that there is a balance in the social and environmental harmony in the development of the oil palm planting project between PT Lestari Abadi Perkasa and the local communities, the relevant government agencies, concerned stakeholders, NGOs etc.

The Stakeholders’ Consultation was held on 19<sup>th</sup> January, 2012 in the Ketapang District, West Kalimantan (agenda consultative meeting are presented in **Appendix 1**). This stakeholder consultation was held simultaneously with PT Mentari Pratama’s stakeholder consultation as most stakeholders are common to both PTs al beit different participants from

# RSPO

villages around the respective PTs were present in the respective session that affect them. Both PT Mentari Pratama and PT Lestari Abadi Perkasa are managed by same GM and adhere to the RSPO New Planting Procedures. PT Mentari Pratama is beside PT Lestari Abadi Perkasa. There were 62 participants present during this consultation meeting. The details of the Stakeholders' Consultation is presented in the Report of Stakeholders Consultation PT Lestari Abadi Perkasa, 2012. The summary of the consultation with highlights of key suggestions from the consultation on HCV, SIA, and RSPO P&C are as follow:

1. The number of stakeholder consultation participants that conduct by PT Lestari Abadi Perkasa at 19<sup>th</sup> January, 2012 in Ketapang District - West Kalimantan Province are 62 participants, consisting of:

Organization	No. of participants
Government Agencies, are: Region I BKSDA West Kalimantan (3 participants), KLH Ketapang District (1 participants), DISHUT Ketapang District (2 participants), DISBUN Ketapang District (2 participants), BP-DAS Kapuas (1 participant), DANRAMIL (1 participants), Nanga Tayap Polsek (1 participants), Tumbang Titi Polsek (1 participant).	12
Representatives from surrounding villages (subdistrict head, village head, community leaders)	25
Non-Governmental Organization (NGO), consist of: Forum Hutan Desa (3 participant), Ketapang SKU Demokratis (1 participant), Flora Fauna Indonesia (2 participant), Yayasan International Animal Rescue Indonesia (1 participant), USAID IFACS / The U.S. Agency for International Development Indonesian Forest and Climate Support (1 participant), Yayasan Palung (1 participant) and Forum Pemberantasan Korupsi (1 participants)	10
Company around, such as PT Sinarmas and PT Poliplant (Both Company of oil palm plantation)	2
Mass Media, such as Pontianak Post (1 participant) and kalbar-online.com (1 participant)	2
HCV / SIA Assessor	5
Management PT Lestari Abadi Perkasa	6
<b>Total</b>	<b>62</b>

2. The following subject matters were presented to the stakeholder during the Stakeholders' Meeting:
  - a) BKSDA Seksi Konservasi Wil. I Ketapang District, explanations about government policy concerned with management of conservation area. Explanations about government policies with management of conservation area, such as UU No. 5 Year 1990 about Natural Resources of Conservation and Ecosystem, Region Regulation, Common Law / local wisdom and International regulation.

# RSPO

- b) Kantor Lingkungan Hidup Ketapang District, government regulation about Social Environment Impact Assessment (AMDAL). Explanations about environment policy and information about The Letter from Regent of Ketapang No. 660/0769/KLH-B about implementation oil palm plantation with sustainable and environment development concept on dated 29<sup>th</sup> March 2011.
- c) BP-DAS Kapuas, government policy and regulation about management of rivers area and border of beach. Explanation of fundamental laws management of rivers area and border of beach, understanding of DAS and border of beach and land suitable for oil palm plantation.
- d) Explanation from consultant Aksenta about HCV and SIA Identification in PT Lestari Abadi Perkasa. Size of HCV and social issues and then management and monitoring plan HCV and SIA in PT Lestari Abadi Perkasa.

### 3. Key Issues raised for discussion during the Stakeholders' Meeting include:

Important issues that are related to sustainable development of oil palm plantations in PT Lestari Abadi Perkasa, Ketapang District, West Kalimantan Province in stakeholder consultation activities, are:

- 1) Socialization activity need to be continuously carried out in transparent way, so that local communities are aware of the overall development plan of PT Lestari Abadi Perkasa.
- 2) Land acquisition (and compensation) procedure are to be carried out with FPIC, When any problems occur, it must be settled with agreement of parties concerned.
- 3) Local community in Permitted Area of PT Lestari Abadi Perkasa hoped that the development of palm oil plantation will bring positive impacts and minimize negative impacts from palm oil plantation on development of environment (HCV), social (SIA) and AMDAL aspects.
- 4) Village community in Permitted Area of PT Lestari Abadi Perkasa hoped that the company be managed in good way and in accordance with RSPO P&C as the sustainable palm oil plantation and maintain good coordination among the stakeholders (company, community, NGO and government).

Summary of the questions and answers during the stakeholder consultation process are as follows (**Table 5**):

# RSPO

**Table 5** Stakeholder Consultations – PT Lestari Abadi Perkasa (PT LAP), Aston Hotel - Ketapang, Thursday, 19<sup>th</sup> January, 2012.

No.	Participant's Name	Agency / Village	Suggestion/Question	Answer/Opinion
1.	Yulita S	Head of Village Batu Mas	Need to carry out socialization by authority regarding wild life protection law to the local community. This is because the local community only realize the above mentioned law after this stakeholder consultation	<p><b>BKSDA Reg. I Ketapang-District :</b></p> <p>a. We had carried out socialization on wildlife protection law and regulation by radio broadcasting; cooperate with NGO FFI (Flora Fauna Indonesia) to carry out socialization in some sub-districts. BKSDA will continue to carry to carry out the socialization to village level with other media such as literature and leaflet.</p> <p>b. Village authority hoped that the villages heads will contribute in socialize the above-mentioned law to the villagers.</p>
			The company is required to look into the wisdom of local community during the process of SEIA compliance.	<p><b>PT LAP:</b></p> <p>The company committed in managing and monitoring environment and social issue according to SEIA report and HCV &amp; SIA identification reports by independent consultant (Aksenta).</p>
2.	S. Angkah	DAD – Dayak Custom of Council (Dewan Adat Dayak), Pemahan Sub-District	Need to carry out socialization about palm oil plantation; whether will bring harmony to the local community.	<p><b>PT LAP:</b></p> <p>The company will intensify the socialization activity.</p>

# RSPO

3.	B. Icat	Head of Batu Beransah Sub-Village	To hope that the company will intensify the socialization activity and land release will be carried out with the approval of the land owner.	<b>PT LAP:</b> The company will intensify the socialization activity.
4.	Alipius, S.E	Head of DAD – Dayak Custom of Council (Dewan Adat Dayak), Tumbang Titi	Concerning HCV (high conservation value) area which was called by local community as ‘village’s forest’ (hutan desa) to be managed in synergy manner.	<b>BKSDA Reg. I Ketapang- District:</b> The company should carry out HCV and SEIA management activity in the ‘Village’s forest’ (hutan desa) in synergy manner.
5.	Y. Jatinur Poyong	Head of Tanjung Beulang Village	HCV management by the company was evaluated not effective. Because he worried the HCV area will be developed into oil palm plantation in long term.	<b>BKSDA Reg. I Ketapang- District:</b> If HCV area which managed by the company has caused the extinction of certain species, the RSPO and ISPO certificate will be cancelled internationally and nationally. This will create negative impact to the company economically.
			Why can the oil palm company obtain the permit from the government?	<b>KLH Ketapang-District:</b> Palm Oil is a commodity and investment which can create new job opportunity to the locals. Palm oil is also a more profitable stock community compared to others.
6.	N. Erpan	Socialite of Serengkah Kanan Village	Concerning the law of DAS management, palm oil plantations normally will not pay attention on sub-river existence.	<b>BP-DAS Kapuas:</b> Every company is obliged to adhere the law in their management system.
			Explain the meaning of “based on the survey result by Aksenta, there are acceptances obtained	<b>Andri Novi – Aksenta:</b> The meaning of acceptance was actually referring to acceptance of

# RSPO

			from local community.” The reasons of refusal by local community Serengkah Kanan Village were not baseless but were the result of prior discussion.	local community to carry out the survey activity by Aksenta instead of acceptance to release the land by local community.

## 4a. Summary of management and Mitigation Plans (SEIA)

PT Lestari Abadi Perkasa has developed the plans for the conservation impacts and social impacts as the operational efforts on social and conservation mitigation. The SIA development and preparation of management & monitoring plans for PT Lestari Abadi Perkasa was mainly based on the SIA Assessment result administered in 31<sup>st</sup> October 2010 – 6<sup>th</sup> November 2010, in corporate with the Aksenta; consultant accredited and approved by RSPO and the Social Environment Impact Assessment (AMDAL) was approved by AMDAL Commission of West Kalimantan Province, No 92/BLHD/2012 dated on 12<sup>th</sup> January 2012, in principle, referred to the related laws in Indonesia.

The process of the HCV and SIA development and preparation of management & monitoring plans was based on the principle of strategy mapping. The process was focused on the three aspects out of four available which were included in the authority and responsibility of the plantation management i.e.:

- a) *Stakeholders,*
- b) *Operation,*
- c) *People & Resources.*

**Picture 5** Strategy map social vision/purpose in stakeholder's perspective PT Lestari Abadi Perkasa.

# RSPO

The steps taken in the HCV and SIA development and preparation of management & monitoring plans were:

1. Determining the strategic issues i.e. land acquisition for plantation, public facilities, environment condition, Health condition, welfare, and company's communications with the local people,
2. Determining the purposes and desired final condition of the project (vision, practical vision, end-state),
3. Determining targets and objectives to achieve, creating the strategy map to achieve the desired outcome,
4. Identifying the must-do initiatives to achieve the determined targets,
5. Identifying the competency reinforcement for human resources and the supply of the infrastructures so that the implementation of the process can be achieved effectively,
6. Determining effective monitoring activities to analyze the dynamic state of every indicator in order to assess the progress of target – achievement.

Based on the SIA results for PT Lestari Abadi Perkasa by Aksenta and the Environmental Management & Monitoring Plans (*Rencana Pengelolaan Lingkungan/Rencana Pemantauan Lingkungan*) of PT Lestari Abadi Perkasa document, the management for the Social and Environmental Impacts aimed to be managed consistently with appropriate work performance standards. The scope of the development and preparation of management & monitoring plans included all of the potential impacts by the plantation activities. The development and preparation of management & monitoring plans guidelines include:

## **1. The Management Plans of PT Lestari Abadi Perkasa, Land Acquisition (and Compensation) Program**

The scope for this management and monitoring included the process of land acquisition and land compensation which referred to the principles of Free, Prior and Informed Consent (FPIC) such as: a) The policy and procedure for land acquisition and compensation in socialization and implementation, b) Partner system of development palm oil and land acquisition procedure is socialized.

# RSPO

The scope for this management and monitoring included: a) participation of increasing public facility which is giving easy of company and peoples, b) management and monitoring of the water quality, soil and air, c) arranging of environmental management & monitoring plans (*Rencana Pengelolaan Lingkungan, RKL – Rencana Pemantauan Lingkungan, RPL*) and d) survey of people perception with environment condition.

## 4b. Summary of Management and Mitigation Plans (HCV)

### The HCV development and preparation of management & monitoring plans

The HCV development and preparation of management & monitoring plans was based on the result of the HCV assessment that was conducted on 31<sup>st</sup> October 2010 – 6<sup>th</sup> November 2010 by independent consultants from Aksenta who has been accredited and approved by RSPO. This process provides data and information related to the presence of the HCV areas in the Permitted Area (Izin Lokasi) of PT Lestari Abadi Perkasa, the key HCV elements, the actual conditions included the potential threats, and the recommendations for the management.

The HCV development and preparation of management & monitoring plans was implemented with the aim to provide guideline for the company in planning and management of its programs or activities in managing the HCV present within the concession area. The purpose was to enable all the available resources to be focused, integrated and effective in order to achieve the HCV management outcome. The purposes of this management and monitoring document were:

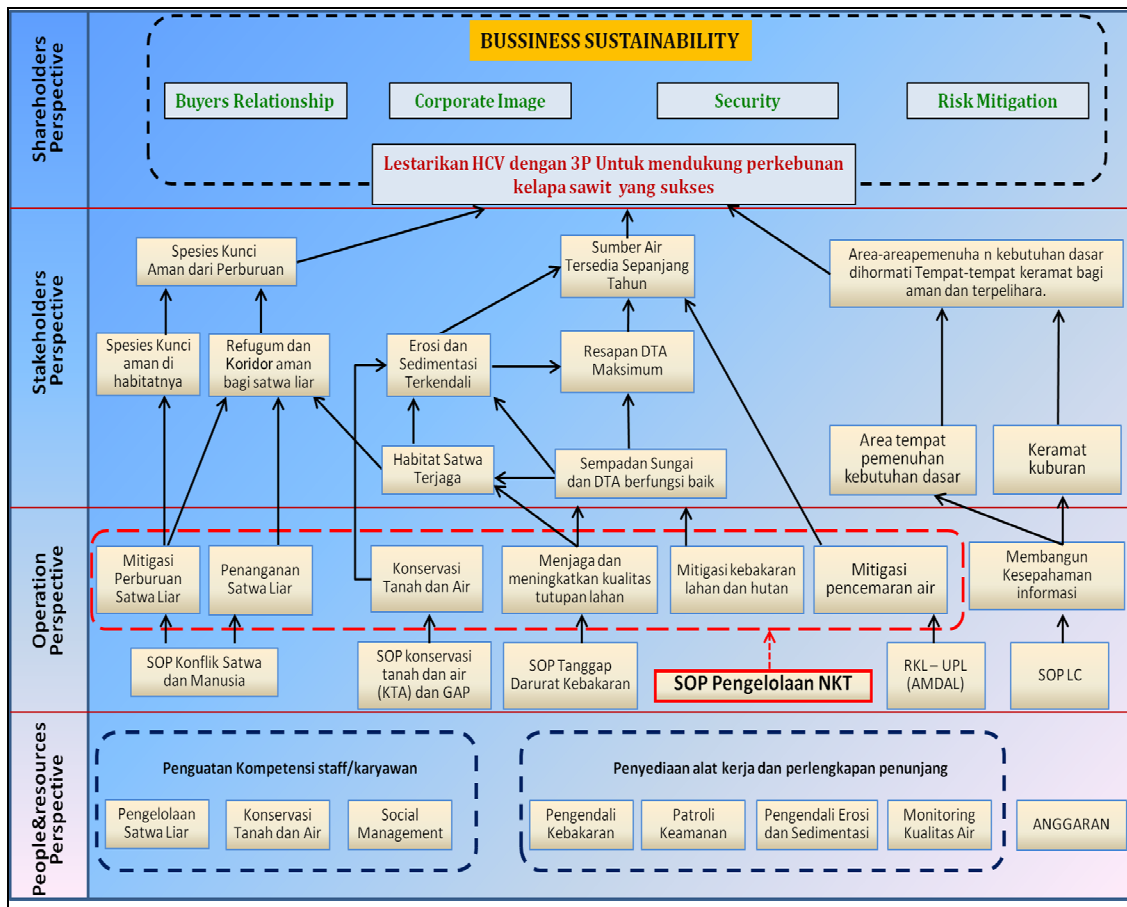

- 1) To ensure that the identified and assigned HCV areas are under protection and in a well managed state so that their HCV functions are well preserved,
- 2) To enhance the administration of the management and monitoring in the sense that the process carried out is more systematically according to the legal procedures.

The process of the HCV preparation of management plans and monitoring for PT Lestari Abadi Perkasa was based on the structure of strategy mapping (**Picture 6**). In strategy map, the processes were all focused on three fields under the management and responsibility of the plantation management;

- 1) Stakeholders
- 2) Operation
- 3) People & Resources

In the strategy mapping structure, the logical-structure assumes that an outcome will be achieved if one or more initiative efforts are implemented. The logical flow is; in order to achieve the main determined targets, it is essential to implement one or more strategic, primary, or basic activities. Also, in strategy map, the basic targets are the Stakeholders and the primary activities are in the field of operations.

# RSPO

Picture 6 Strategy map of HCV

## Plan for HCV Monitoring and Regular Review of Data

The basic programs and activities that fulfill the HCV management are in regular monitoring and review. The purpose of review is to measure the achievements, effectiveness, efficiencies, impacts, and sustainability of the programs. Thus, the purpose of monitoring is to evaluate whether the activities run as they are expected; whether the outputs of the process are as they were projected previously; and whether the resources investments (human, fund, time) are as they were planned.

Monitoring and review are aimed to a set of indicators as the key performance indicators and should be managed systematically, consistently, and well documented. The monitoring should be implemented regularly and it is dependent on the classifications of the activities and the target indicator to evaluate [the detail of such activities is presented in the the Activities Plan Matrix (*Matriks Rencana Kegiatan*). The review should be conducted at the end of the management periodical plan, that is in the end of the third years (summative review) and every six months (formative review).

# RSPO

## **Management and mitigation plans for threats to HCV areas.**

The identified basic activities which are planned to run in order to achieve the basic targets for the enhancement and maintenance of the HCV areas are:

1. Identification, documentation and recondition of baseline HCV elements and that threats.
2. Socialization to local peoples and people around the HCV area about the existence and importance of protecting HCV areas.
3. Develop dialogue and facilitate people for make like-minded of HCV management.
4. Dialogue with stakeholders, especially government for increasing protecting HCV elements and areas.
5. Monitoring of land clearing activity.
6. Measuring fluctuation activity of water level on rainy season and dry season as *baseline* in rivers which has the important function as the catchment areas.
7. Avoid/minimizing superficial of river with GAP (Group Agriculture Policy) which is land clearing until maintenance and harvesting.
8. Recondition and making the policy and procedure (SOP) which is supporting efectivity HCV management.

## **Management plans to enhance or maintain conservation values of identified HCV areas**

The process of strategy mapping, the practical vision is defined as the basic targets. Those basic targets include nine ideal states which are going to be achieved through the efforts of HCV protection and management. Those ideal states are:

1. The sustainability of the local habitats is reserved.
2. The existence of the key animals in the area is reserved.
3. Refuge condition of wildlife (refugum) are controlled and connectivity.
4. The river banks function as the hydrological buffer (the protection for water cycle), ecology (the protection for wildlife species)
5. The erosion state is well minimized.
6. Spring water reserved.
7. Conserve water catchments areas.
8. The reverence of the human rights.
9. The existence of the local spiritual sites are well preserved.

# *RSPO*

In order to make such activities in effective state, it is required that the reinforcement to the human resources competencies be applied so that they have sufficient knowledge and life skills to implement all the determined activities. Moreover, it is essential to provide appropriate infrastructures so that the implementation of the activities is possible to be effective.
