**4. TimeBound Plan****4.1 Which year did your company achieve (or plans to achieve) its first RSPO P&C certification?**

2011

**4.2 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all its estates and mills?**

2025

**4.2.1 If the previous target year for G.4.2 has not been met, please explain why**

In response to a number of obstacles that have prevented GAR from achieving its RSPO certification goals, including RaCP and land title (HGU), which are currently in the planning stages, GAR has recently revised its RSPO Time-Bound Plan ("TBP") 2025. In addition, a new supply base—scheme smallholders from our Peremajaan Sawit Rakyat (PSR) Program—must be accounted for by this TBP alteration.

**4.3 Which year did your company achieve (or plans to achieve) 100% RSPO certification of scheme smallholders?**

2025

**4.3.1 If the previous target year for G.4.3 has not been met, please explain why**

To finish this timebound, GAR still communicates with key stakeholders. The company believes that the starting aim is set under conservative circumstances in order to attain the goal. The epidemic, however, has altered the current situation from the initial plan. As a result, GAR will keep making the necessary changes to achieve the deadline.

**4.4 Which year did your company achieve (or plans to achieve) 100% RSPO certification for all FFB, regardless of source?**

2025

**4.4.1 If the previous target year for G.4.4 has not been met, please explain why**

GAR recognises that the timebound is now tailored to the current conditions and circumstances. We believe this makes the target achievable. However, we also recognise that there are some matters that are beyond the responsibility of the company and involve other key stakeholders. Therefore, we are trying to achieve the current targets despite facing complex challenges.

## 5. Concession Map

**5.2 Has your company acquired any new concession sites or have any concession sites changed ownership since the previous ACOP map submission?**

Yes

---

**5.3 Please upload your company's updated estate location concession map(s) in Shapefile format here. This requirement only applies if your company has made changes to its concession sites from previous map submissions in ACOP or if the member is submitting concession maps through ACOP for the first time**

- ☐ Existing cultivation peatland
- ☒ Palm oil mill effluent (POME)

#### 7.1.1 Please provide the names and locations of the oil palm Independent Smallholder groups that you are currently supporting. This question is not mandatory, and is left to the discretion of the RSPO member to answer.

Since 2014, we have assisted independent farmers in obtaining replanting financing from state-owned banks. We also conduct a variety of smallholder independence support programs. Since 2013, we have offered independent farmers in East Kalimantan technical support through the Smallholders Development Program. High-yielding seeds, fertilizer and herbicides, as well as the leasing of heavy equipment, are available to farmers.

## 8. Actions For Next Reporting Period

### 8.1 Outline activities that your company will undertake in the coming year to advance its certification efforts.

By the year 2025, we intend to have certified all of our remaining mills and their supply chains, including plasma estates.

### 8.2 Outline activities that your company will undertake in the coming year to promote the uptake CSPO along the supply chain.

We kept adding smallholders to the Ksatria Sawit initiative, which seeks to accelerate Traceability to the Plantation (TTP). This program identifies the agents and farmers of the smallholders that many of our supplier mills purchase from in these regions. Around 146,000 farmers have signed up for the program as of this writing. We had 98 percent TTP for our entire palm supply chain as of the end of 2022.

We are now working together with our major clients on initiatives aimed at Tier 2 suppliers including smallholders and agencies. Programs like Sawit Terampil are among them. We are concentrating on upskilling more than 4,500 independent smallholders from the Leuser Ecosystem area in Aceh and North Sumatera by working with clients like MARS and Fuji Oil. The smallholders will receive both individual and group instruction on sound farming methods.
