4. Actions for Next Reporting Period

Bank and/or Investor Form Page 2/5

## 4.1 Outline actions that will be taken in the coming year to promote RSPO-certified sustainable palm oil and oil palm products.

As mentioned above, our CSR policy regarding our financing and investing activities in the palm oil sector has been reinforced take into account recent developments and commitments taken by major players. On that basis, we continue to strengthen the dialogue with our clients regarding their CSR performance, including the promotion of CSPO as explained above. This update will contribute to our commitment made within the Soft Commodities Compact to finance the growth in the markets for palm oil, wood products, soya and beef, without causing net deforestation up to 2020. Above their own due diligence processes, the signatory banks ensure that their customers also implement suitable internationally-recognized monitoring means, such as RSPO in the palm oil sector.

#### Other:

1) Economic obstacle: RSPO seems to be in an in-between situation: on one hand, many very important markets do not pay particular importance to environmental labels such as RSPO and growers find strong difficulties in passing-through certification costs when addressing these markets. On the other hand, many Consumer Goods Manufacturers in the European and American markets ask now their providers to comply with environmental standards which go beyond RSPO requirements, such as HCS protection and no deforestation commitment, generally embedded in a No Deforestation, No Peat, No Exploitation policy. Addressing these two issues appears to be crucial for RSPO and a necessary preamble to any effort from the financial sector to promote CSPO among its clients.

2) Another important difficulty is, while assessing the ESG performance, to know precisely what the real practices of the company on the ground are. Many different statements and points of view may arise during investigation or audit and we need to clearly state out what's really happening. To mitigate this difficulty we ask, we primarily rely on experts that go on the ground, such as Earthwarn, but also on other stakeholders, such as NGOs.

8.2 In addition to the actions already reported in this ACOP, how has your organisation supported the vision of RSPO to transform the market for sustainable palm oil in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

☐ Engagement with business partners or consumers on the use of CSPO
☐ Engagement with government agencies
☑ Promotion of CSPO outside of RSPO venues eg trade workshops industry associations
☐ Promotion of physical CSPO
☐ Providing funding or support for CSPO development efforts
Research & Development support
☐ Stakeholder engagement
✓ Others

### Other:

BNP Paribas is member of RSPO since 2011 and has been since then fully supporting the vision of RSPO to transform markets by being a responsible financial player in the palm oil sector, based on a public policy including binding ESG criteria and with the help of external auditors to assess the ESG performance of the actors we chose to support. BNP Paribas is also member of the Financial Institution Task Force (FITF): placed under the umbrella of RSPO, this group gathers several banks involved in the palm oil sector and members of RSPO. It has released an outreach document detailing what are the opportunities for a financial player to become RSPO member and where can be found useful information regarding best practices in financing the palm oil sector.
