2.5 According to the information you have provided in this questionnaire, your company has not reached 100% sustainable palm yet by using the four supply chain models (Book and Claim, MB, SG, IP). Do you have plans to immediately cover the gap by using RSPO Credits?

No

2.5.1 When do you plan to cover the gap by using RSPO Credits?

__

2.5.2 Please explain why

It was not our plan to reach 100% sustainable palm by this timeframe. We are largely dependent on our supply chain providing mass Balance based ingredients and we are still working with all of our suppliers to achieve this. We have not factored the purchase of RSPO credits into our budget, cost structure or product prices.

3.1 Year of first supply chain certification (planned or achieved)
N/A
3.2 Year expected to/or started to use any RSPO-certified sustainable palm oil and oil palm products in your own brand products
N/A
3.2.1 If target has not been met, please explain why.
A small amount of Mass balance Palm based ingredient was purchased in 2017 and 36.6T in the 2018 year. The target for the 2018 year was 70T, however this relied on one of our suppliers providing a MB based ingredient. Their process of converting this particular ingredient to MB was delayed which delayed our plans. We have since found an alternative supplier for that ingredient which we were able to change to in the last quarter of the year.
