## **1.0 SCOPE OF ANNUAL SURVEILLANCE AUDIT**

### **1.1 National Interpretation Used**

The operations of the palm oil mill(s) and its supply base of FFB were assessed against RSPO Principles & Criteria INA NI 2016 and RSPO SCCS Nov 2014 with selected Supply Chain Model of MB.

#### 1.2 Type of Assessment

The 2<sup>nd</sup> annual surveillance audit was carried out on 1 (one) and 2 (two) estates (Sisumut estate and Aek Nabara Utara estate) under PT Perkebunan Nusantara III (Persero).

#### **1.3 Certification Details**

The details of RSPO certification of PT Perkebunan Nusantara III (Persero) – Sisumut Mill are as per the table below

#### Table 1: RSPO Certification details of PT Perkebunan Nusantara III (Persero) – Sisumut Mill

RSPO Membership no.:	1-0030-06-000-00	
RSPO Certificate no.:	RSPO 824 502 16053	
Date of first RSPO certificate & validity:	October 15, 2015 & Validity October 15, 2016 un- til October 14, 2020	
Date of certification audit:	November 28 – December 03, 2011	
Date of previous surveillance audit:	August 29 - September 02, 2016	
Date of revised RSPO certificate & va- lidity (if applicable):	N/A	
CPO tonnages claimed:	39,926.25 <b>MT</b>	
PK tonnages claimed:	7,897.50 <b>MT</b>	
Mill capacity	30 tonne FFB/hour	
Net GHG Calculation this year (tCO2e/tCPO)	24.81

#### 1.11 Compliance to Rules for Partial Certification

Compliance of the uncertified management units PT Perkebunan Nusantara III (Persero) against the rules for partial certification according to RSPO Certification System clause 4.2.4 was assessed by by submission self assessment report. A summary of findings is as stated below.

Partial Certification Requirements	Audit Findings
(a) The parent organization or one of its majority owned and / or managed subsidiaries is a member of RSPO.	PT Perkebunan Nusantaa III (Persero) is RSPO mem- ber with membership number 1-0030-06-000-00
(b-d) A challenging time-bound plan for certify- ing all its relevant entities is submitted to the Certification Body (CB) during the first certifica- tion audit. The time-bound plan should contain a	PTPN III has a time-bound plan to achieve RSPO cer- tification for all relevant entities as shown in the table 9

PT Perkebunan Nusantara III (Persero) – Palm Oil Mill Sisumut

North Sumatera, Indonesia

ev.2	Page 10 of 5	57
list of subsidiaries, estates and mills. Any revision to the time-bound plan or to the circumstances of the company shall cause the plan to be reviewed. for whether it is still appro- priate, such that changes to the time-bound plan are permitted only where the organisation can demonstrate that they are justified		
(e) No replacement of primary forest or any area identified as containing High Conservation Val- ues (HCVs) or required to maintain or enhance HCVs in accordance with RSPO criterion 7.3. Any new plantings since January 1st 2010 must comply with the RSPO New Plantings Proce- dure	PTPN III's development of a new planting area (Muara Upu at South Tapanuli) had been raised before as a major noncompliance by TUV Rheinland audit team, which is now closed as the company has carried out applying NPP in accordance with this clause and the progress under reviewing of Compensation Task Force. Based on communication with PT PN III. The company still waiting for Head of District decision re- sponse, for land exchanged process since the land was included on peat moratorium area according to President of Republic Indonesia decree letter no. 6 year 2013.	
(f) Land conflicts, if any, are being resolved through a mutually agreed process, e.g. RSPO Grievance procedure or Dispute Settlement Fa- cility, in accordance with RSPO criteria 6.4, 7.5 and 7.6.	There are some land conflicts/ potential land conflicts ongoing in other PTPN III's management units, such as Silau Dunia. While the company has already made a conflict resolution mechanism, these conflicts remain unresolved as the mechanism is still not agreed by the land claimants.	
(g) Labour disputes, if any, are being resolved through a mutually agreed process, in accord- ance with RSPO criterion 6.3.	<ul> <li>TRID Auditor got the issues regarding labour disputes in the unit operational under management of PTPN III after the ASA-01 has conducted. To this matter, TRID Auditor conducted the unannounced inspections on November 29, 2017 in the Sei Baruhur, Sei Kebara and Torgamba Estate. Based on the inspection TRID Auditor found several issue regarding labour disputes i.e.: fertilizer workers in Sei Baruhur did not use PPE; the workers did not have any contract document, not coverage by BPJS (health insurance), did not understood regarding wages, sprayer workers in Sei Kebara did not use complete PPE, and in Torgamba estate found chemical workers is under age (17 years old); not used PPE, also they id not understand regarding chemical type they used and applied in field. After that, TRID Auditor conducted the special audit on December 12 – 13, 2017. Based on this activity TRID Auditor got the conclusion:</li> <li>PTPN III has budgeted 2.8 billion to provide PPE to all worker who work under PTPN III. Also related estate above submit record of PPE distribution to all workers include to sparyer and fertilizer workers.</li> <li>PTPN III has been able to show payment receipts of employment insurance contributions and PTPN III has been able to show the agreement contractors.</li> <li>PTPN III has been able to show the agreement contract employee. The agreement contract has revised in accordance with the Law No. 13 of 2003 regarding Labours.</li> </ul>	

PT Perkebunan Nusantara III (Persero) – Palm Oil Mill Sisumut

#### North Sumatera, Indonesia

## Rev.2

Page 11 of 57

	The effectiveness of this matter will be detail verified on the next surveillance audit.
(h) Legal non-compliance, if any, are being re- solved in accordance with the legal require- ments, with reference to RSPO criteria 2.1 and 2.2.	Some of PTPN III's other management units have not complied with certain legal requirements. For example, in Silau Dunia Estate under another PTPN III man- agement unit, an issue has been found with the area stated under the Right of Cultivation certificate (HGU). However, the company is taking action by inviting Na- tional Land Agency (BPN) to re-measure the land and resolve the issue. The process is still ongoing. Some legal non-compliance found, it has been reported on surveillance audit report for each PTPN 3 unit.

#### 1.11 Compliance to other RSPO Procedure

RSPO NPP	N/A
RSPO Compensation and Remediation pro- cedure	N/A
Areal Subject to sanction	N/A

## 1.12 Compliance to RSPO Guidance on GHG calculation

During the audity, the audit tema verify and confirm that

The RSPO PalmGHG Calculator used	Yes, Version 3.0.1
Accurate data has been put into the RSPO PalmGHG Calculator	The data are sourced from unit's self-monitoring ac- cording to Palm GHG Calculator, which consist POM and its suplly bases.
Net GHG Emission Figure (tCO2e/tCPO)	24.81

## 1.13 Progress of associated smallholders or outgrowers towards RSPO compliance

There is no smallholder scheme in PT Perkebunan Nusantara III (Persero) that supplies to Sisumut Palm Oil Mill. Additional FFB is supplied from independent outgrowersout growers.

## 1.14 Approximate Tonnages Certified

The approximate tonnages certified shall be the same as per the original certificate, which is as follows

Crude Palm Oil (CPO)	: 39,926.25 MT
Palm Kernel (PK)	: 7.897.50 MT

#### 1.15 Other Achievement s and Certification Helds

# 2.0 ASSESSMENT PROCESS

## 2.1 Certification Body

PT TUV Rheinland Indonesia is member of Group TÜV Rheinland Group, a global leader in independent testing and assessment services. The TÜV Rheinland Group was established in 1872 with offices located in over 490 locations in 62 countries on all five continents. PT TUV Rheinland Indonesia offers certification for a wide range of management systems according to established international standards including ISO 9001, ISO 14001, OHSAS 18001, SA 8000, as well as CDM Validations and Verifications. PT TUV Rheinland Indonesia's office is located in Jakarta.

## 2.2 Qualifications of Lead Assessor and Assessment Team

The assessment team members of this 2<sup>nd</sup> surveillance audit that were part of the same assessment team for 1<sup>st</sup> surveillance audit is Wahyu (team member)

New assessment team members that were not part of the previous assessment team are as per the table below:

Name	Position	Qualifications / Experience
Daulatul Wahyu	Lead Auditor	<b>Education:</b> Bachelor degree of Mechanical Engineering - University of Indonesia and Magister of Manufacturing - Pancasila University
		<b>Relevant trainings:</b> ISO 9001 and ISO 14001 IRCA Lead Auditor Training, Training of ISO 28000, TOT of Maritime Security, ISO 22000, and OHSAS 18001, SVLK Lead Auditor Training, COC – LEI Lead Auditor Training, VLO & RIL Training, ISPO Lead Auditor Training, and RSPO Lead Auditor Training.
		<b>Professional experience:</b> Arround 8 (eight) years as technician and engineer at manufacturing industries, 3 (three) years as QHSE Head at independent surveyor and inspection services company, 3 (three) years as QHSE Consulant, and 6 (six) years as auditor of ISO 9001, ISO 14001, OHSAS 18001, SVLK, COC – LEI, SVLK for Industry, ISPO and RSPO.
Andreas Budi	Lead Auditor	<ul> <li>Education: Bachelor of Forestry – Universitas Gadjah Mada.</li> <li>Relevant trainings: RSPO LA Training, Upgrading ISO 9001:2015; Lead Auditor IRCA Approved ISO 9001, ISPO Lead Auditor Training, IFCC Auditor Training, RSPO Supply Chain Auditor Training, FSC FM/CoC Auditor Training.</li> </ul>
Rahutomo	(under moni- toring)	<b>Professional experience:</b> 5 years of working experience. Consultancy in several environmental projects (forestry and climate change) i.e. For- est Carbon Partnership Facility (Ministry of Forestry – World Bank), UNDP REDD+, and Indonesian Palm Oil Pledges (IPOP). Auditing expe- riences as palm oil and forestry auditor for several certification bodies i.e. Control Union, Bureau Veritas, and currently as permanent auditor at TUV Rheinland.
		<b>Education:</b> Bachelors Degree in Forestry - Bogor Agriculture University, Indonesia, (2004 to 2008).
Budi Setiawan	Auditor	<b>Trainings attended:</b> Indonesian Sustainable Palm Oil (ISPO) Lead Auditor Course by Komisi ISPO, Quality Management System (QMS) Auditor/Lead Auditor by IRCA (ISO 9001:2008), Environmental Management Systems Auditor/Lead Auditor Conversion Training by IRCA (ISO 14001-

		<ul> <li>2004), Calculation of Green House Gas at Palm Oil Plantation by Komisi ISPO, SVLK Auditor Training by Ministry of Forestry, CoC Auditor by LEI, PUB and Café training by ministry of tourism, HCV Training, RSPO P&amp;C and SCCS Training (2016)</li> <li>Work experience: Staff RSPO in PT MAS (2008-2009), Staff Planning &amp; Analysis in PT Bakti Sukses Mandiri (2009-2010), PT Mutu Hijau Indonesia, Jakarta as Technical Manager (2015-2016) and HR and finance manager (2014-2015), Auditor in PT Mutu Hijau Indonesia (2010-2016), and Auditor in PT TUV Rheinland Indonesia (2016-present)</li> </ul>
		<ul> <li>Education: Master in Rural Sociology, Graduate School of Bogor Agricul-tural University completed in 2005.</li> <li>Training attended: GIS Training, Auditor Training of Indonesian Sustainable Palm Oil (ISPO), Training of Participatory Mapping, Training of Doc-ument Preparation HCV and SIA, Auditor Training of Sustaina-ble Production Forest Management (SFM), Training and Up-Grading of SFM, Training of Mentoring technique for the Rural Farmers, Conflict Resolution Training and Journalism Training.</li> </ul>
Doni	Auditor	<b>Working experience:</b> Frequently conducted certification audits of RSPO and ISPO for Palm plan-tation, the certification audit of SFM (Sustainable Production Forest Man-agement) for HPH and HTI, worked as a consultant for the National Devel-opment Planning Agency, Min-istry of Environment and Forestry, Indonesian People Bank (BRI), Ministry of Rural Development (KPDT) and the Ministry of Public Works, Director General of Cipta Karya, JICA and UN-HABITAT and UNDP, HCVF document drafting team for the company of HTI, HPH and constituent team for documents of HCV / SIA for oil palm plantations. Since March 2016 till now, work at PT. TUV Rheinland Indonesia.

## 2.3 Assessment Methodology & Agenda

The surveillance audit was conducted betwen 28 – 31 August 2017 as per the assessment program below. The assessment was carried out in accordance with PT TUV Rheinland Indonesia's RSPO audit procedure as well as the RSPO Certification Systems document. During assessment, the qualified TUV Rheinland assessors used the RSPO standard as endorsed for the country in which the assessment took place and recorded their findings.

Due to the location and proximity of the estates, combined with common management systems, it was possible to carry out both field and document assessments of all estates and the mill within the time frame without compromising the integrity of the assessment in anyway.

All 2 estates and 1 mill were visited and the assessment team carried out field and document assessments of compliance to all the RSPO principles and criteria. Common systems were identified and specific evidence was recorded for individual estates. Interviews were conducted at all estates and the mill.

The company proposed the correction and corrective action for all identified non-conformities raised to the certification body 30 days after the closing meeting. Verification of closure of major non-conformances was conducted 2 months after the closing meeting of the assessment and implementation of corrective actions for minor non-conformities will be verified during the next surveillance audit. The certification assessment agenda is as explained below.

			Closing meeting for Estate and Mill

#### 2.4 Stakeholder Consultation and Stakeholders Contacted

The stakeholder consultation involved both external and internal stakeholders. External stakeholders were notified to make comments on the certification assessment by placing an invitation to comment on the RSPO website. Stakeholders included those immediately linked with the operation of the company such employees, outgrowers, the local government, NGO's, trade and labour unions and local communities.

Stakeholder consultation took place in the form of stakeholders visit and interviews. Visit to stakeholders were held to seek their views on the performance of the company with respect to the sustainability practices outlined in the RSPO Principles & Criteria, and to comment on aspects where improvements could be made. Meetings with local communities were held at their respective premises within and near the company's area. In all the interviews and meeting, the objectives of the RSPO and the purpose of the assessment was clarified at the outset followed by an evaluation of the relationship between the stakeholders and the company before discussion proceeded to obtain the stakeholders feedback on the company's compliance to different aspects of the RSPO Principles & Criteria. Although several stakeholders were not familiar with RSPO but they agreed with its objective and expressed their willingness to collaborate in the promotion of sustainable palm oil in North Sumatera province. In all interviews and meeting, the assessment team did not restrict discussion of both the positive and negative aspects of operations conducted by PTPN 3 Sisumut estates and mill.

The stakeholder consultation meeting held with stakeholders during the audit was extensive and productive, this was followed by site inspections, including visits to the local communities, interviews with land claimants and contractors, and inspections of worker amenities and infrastructure. All stakeholder issues raised were recorded and forwarded to the management for their written reponse, and this is summarized in Section 3.4. The list of stakeholders interviewed during the assessment is included as Appendix 4.

# **3.0 ASSESSMENT FINDINGS**

#### 3.1 Summary of Findings

During the 2<sup>nd</sup> surveillance audit, the status of previous audit findings were explained on section 3.2. Identified nonconformities were assigned during this year surveillance audit i.e. 6 (six) nonconformitis against Major Compliance indicators while 0 (zero) nonconformities were assigned against Minor Compliance Indicators. 11 (eleven) observations or opportunities for improvement were identified. Further explanation of the non-conformities raised and corrective actions taken by the company are provided in Section 3.3. The observations & opportunities for improvement are listed in Section 3.4.

The following is a summary of findings made for the criteria listed in the RSPO Principle and Criteria – INA NI 2016.

Criterion 1.1: Growers and millers provide adequate information to relevant stakeholders on environmental, social and legal issues relevant to RSPO Criteria, in appropriate languages and forms to allow for effective participation in decision making.

Findings:	Compliance status:

Criterion 2.2: The right to use the land can be demonstrated, and is not legitim local communities with demonstrable rights.	ately contested by
Findings:	Compliance status
Sisumut Estate has valid license from National Land Agency (BPN) Certificate No. 1, dated 15 July 1981 with location Sisumut Village, Kota Pinang Sub District, Labuhan Batu Regency, North Sumatra Province. Area covered based on the certificate is 5.725 ha, with extension of HGU rights is 25 years until December 11, 2005. During the 2 <sup>nd</sup> surveilence audit, Sisumut Estate was conducting extention of Land use right (HGU). There is evidence of extension effort of land use right (HGU) since 2004 until 2017 to the competent authority. The last record of extension effort of land use right (HGU) in 2017 is letter number 1430.12.200.6/VIII/2017 dated August 3, 2017 from Director General of the land procurement on behalf of Head of National Land Agency to Head of Regional Office of National Land Agency, Sumatera Utara Province. Content of the letter is approval of Land use right (HGU) renewal.	Yes No
This estate divided into 7 (seven) divisions (afdeling), total planted area was 5,527.87 Ha, with year of planting from the oldest planting was in 1989, then the youngest planting was 2011. This youngest planting was from re-planting process, not new planting. Based on hectarage statement 2017, planted area + other land uses comply with and use rights, which is 5,725 Ha. Based on hectarage statement and on-site visit verification, planted area was comply with the legal land use rights.	
Aek Nabara Utara Estate has land use right (HGU) Certificate number 02.12.08.13.2.00013, dated January 22, 2008 with location at Aek Nabara Village, Labuhan Batu Regency, North Sumatra Province concerning the granting of HGU certificate up to 22 December 2040 with area covered is 11,026.99 ha. In the HGU certificate number 02.12.08.13.2.00013 with area covered is 11.026,99 ha, there is two estate: 1. Aek Nabara Utara Estate with area covered of HGU is 3,714.31 ha 2. Aek Nabara Selatan Estate with area covered of HGU is 7,312.68 ha	
Aek Nabara Utara Estate with area covered of HGU 3,714.31 ha is divided into 2 (two) area, oil palm commodity with area of 2,265.57 ha and rubber commodity with area of 1,271.97 ha, and other usage with area of 176.77 ha. This estate consist of 5 (five) divisions (afdeling), with year of planting from the oldest planting was in 1989 and the youngest planting was in 2010 for oil palm commodity. The company has a legal map showing location of boundary markers (HGU Map) with scale 1:10,000. Sisumut Estate has record map of boundary pillars and record of boundary pillar maintenance, i.e.: boundary pillars monitoring report carried out on June 2017. Based on monitoring report it was identified 176 units, with 167 units in good condition, 4 units broken and 5 units missing. For this condition (missing boundary pillars) the estate followed-up by report to the estate manager then to District Manager.	

PT Perkebunan Nusantara III (Persero) – Palm Oil Mill Sisumut

	Page 21 of
pillar maintenance, i.e.: boundary pillars monitoring report carried out on June 2017. Based on monitoring record was identified 217 units with good condition.	
During field visit at Sisumut Estate, it was found that boundary pilars were in good condition at Block T3 division VII. At Aek Nabara Utara Estate, it was found that boundary pilars were in good condition at Block H2 division I.	
Sisumut and KANAU estate has established procedure for monitoring and maintain- ing boundary pillars document number PK-3.18-10, rev. 2, dated April 3, 2017. Moni- toring and maintaining will be carried out every six month and reported to the estate manager. During 2 <sup>nd</sup> surveilence audit, there is no smallholder in company's area and also there is no land dispute within company's area and member of the sur- roundings community.	
Criterion 2.3: Use of the land for oil palm does not diminish the legal, customary other users without their free, prior and informed consent.	or user rights of
Findings: Company has SOP on Conflict Resolution No.: PK-3.11-12, dated December 1,	Compliance statu
2015. The procedure describes the process of settlement by consensus, but if no agreement is reached, then the company will do a settlement through legal means. Sisumut POM has never experienced land conflicts with community. This is because mill rarely interacts with Community compared to estate (Sisumut and Aek Nabara Estate).	NCR No.:
Based on information from the Aek Nabara Utara and Sisumut Estate, land conflict has never occurred with community in the surrounding plantation. After conducted verification in N1 Village as the nearest village, informant (village head and community leader) said that there is no conflict between Aek Nabara Utara Estate and community.	
Company has <i>SOP Proses Bisnis Perencanaan Pengendalian</i> No. Document : PK-PB-3.01. This procedure states about Free, Prior, Informed and Consent (FPIC) and the directive procedure for new land development. For Sisumut Estate, there is no legal documentation related with FPIC Process for the identification of communal land or communal right. The similar situation can be found in the Aek Nabara Utara Estate, there is no legal documentation of communal land or communal right. This condition caused by both of things, namely:	
<ul> <li>First, company has opened land before released RSPO Standard and also FPIC approach. RSPO Standard was released and became a guidance for sustainable palm oil in 2007. At the same time, FPIC approach has been adopted but implemented for the new land development after November 2010.</li> <li>Second, company is a part of State Owned Enterprise and the land is inherited</li> </ul>	
from the time of Dutch colonialism. Then nationalization of plantation was carried out by the Indonesian Government against companies under the Dutch administration.	
Criterion 3.1: There is an implemented management plan that aims to achieve lo and financial viability.	ong-term economic
Findings: PT Perkebunan Nusantara IIII (persero) Medan has documented business plan in	Compliance statu
<ul> <li>document "Rencana Jangka Pangjang (RJP)"/Long Term Plan for periods 5 (five) years (2015 until 2019). The RJP was included cost budget per year and cover the following items:</li> <li>Areal</li> </ul>	NCR No.:
<ul> <li>Production and results of process</li> <li>Cost of investment of palm oil</li> </ul>	
- Cost of investment of non palm oil	

## North Sumatera, Indonesia

2	Page 22 of 57
	1 age 22 01 51
- Palm oil production per year's planted	
- Volume of sold price and result of palm oil sales	
- Cost of production	
- Charge of business of palm oil	
- Profit and loss	
- Gneral cost	
- Harvestng cost	
- Cost of Mature maintenance	
- Wokforce estimation	
- etc	
The company has no palnning for expansion (e.g.: area, mill capacity, infrastruc- ture, social amenitie, etc) till 2019. Based on RJP, Mill and estates defined work plan budget as namely <i>Rencana Kerja</i> <i>Anggaran Perusahaan</i> (RKAP) as a form of elaboration of RJP are made each year.	
For example Sisumut mill has been established RKAP for year 2017. The RKAP	
was incude the following:	
- Monthly production plan (FFB processes, CPO production, Kernel production,	
and etc),	
- OER & KER trends	
- Detail of cost (including cost per tonne of CPO trends)	
- External FFB, and etc.	
Sigurate and Ack Nahara Litera actatos has han actablished RKAR for year 2017	
Sisumut and Aek Nabara Utara estates has ben established RKAP for year 2017 that contained:	
- RAB of Production Cost	
- RAB of Mature Maintenance	
- RAB of Harvesting Charge and Transportation	
- RAB of Overhead Cost	
- RAB of General Cost	
- RAB of Production Cost	
- Plan of Non Plantation Investment	
- etc	
The company has established a mechanism for annual review of RJP and there is evidence that tha RJP has reviewed annually. There is an annual replanting programme projected for five years, i.e: 2015: No; 2016: No; 2017: Planned 70,85 ha (cancel); 2018: No; 2019: No.	
Criterion 4.1: Operating procedures are appropriately documented and consistent and monitored.	
Findings:	Compliance status: ⊠ Yes □ No
The company has established a documented SOPs both for mills and plantations	
The SOP was cover key processes, harvesting, transportation, manuring, IPM, GAP, supply chain requirements (mill), secretariat, finance/accounting, and etc. The SOPs was developed by head office and distributed to all sites at General Information Portal 10.3.5.45.	NCR No.:
The copy of the SOP available on sites (mill and estates) and accessible at website <u>http://10.3.5.45</u> , with intranet bases on On-line system application. Each site can access the SOP, download, and pint out the SOP. All of SOP's was written in Bahasa so can easy to understand by all workers at all functions and levels within the organization.	
There is sufficient evidence that SOPs are implemented and understood by workers, for example a document no. IK-3.9-05/04 (revision 02, dated May 19. 2016) namely	

2	Page 23 of 57
Instruksi Kerja Panen Kelapa Sawit (work instruction of harvesting). The document said: on 4.1.2: "FFB can be harvested if the palm oil naturally fall with criterion: - Hilly area: 1 palm oil per FFB	
<ul> <li>Hilly area: 1 palm oil per FFB</li> <li>Waved area: 3 palm oil per FFB</li> </ul>	
- Flat area: 5 palm oil per FFB	
Based on field interview with Assitent Afdeling VI and workers at block Q8 Afdeling VI – Sisumut estate were informed that the harvest criterion as stated on the document has been known and understood	
SOP was put on their online system application and accessible at all sites. The mechanism for document control was dfined in the document No. PK-3.16-01; (revision 03, dated Nopember 21, 2016) namely Prosedur Kerja Pengendalian Dokumen SM PN3. The mechanism governed by the procedure ensure that all SOPs are available at the point of use.	
The company has master lists of all SOPs, ie: - Document List of Working Procedure and work Instruction – Biro Sekretariat

tributed. There is POME land application permit i.e. no: 503/1073/BPPTPM-LS/2016 dated 22 December 2016 valid until 22 November 2019. The POME application data is rec- orded at mill, i.e. Laporan Bulanan Aplikasi Limbah Cair 2016 dan 2017 where 91,900 m <sup>3</sup> was applied in 2016 and 53,950 m <sup>3</sup> was has been applied from January until July 2017.	
Criterion 4.3: Practices minimise and control erosion and degradation of soils.	
<b>Findings:</b> The company has map of soil type, for Sisumut Estate namely Peta Sistem Lahan scale 1:15.000, the dominant land system in Sisumut Estate is Muara Beliti (sediment on weavy to hilly land with soil type of ultisol, inceptisol, and oxysol) and a small portion of Sungai Aur (sediment of hilly land with soil type of ultisol, inceptisol, and oxysol). Based on field verification and interview with estates staffs there is no marginal land exists in Sisumut Estate where mostly the land are relatively flat. Meanwhile in Kanau Estate based on Peta Sistem Lahan scale 1:35.000 where the land system are Muara Beliti (sediment on weavy to hilly land with soil type of ultisol, inceptisol, and oxysol) Sungai Aur (sediment of hilly land with soil type of ultisol, inceptisol, and oxysol) Bakunan (small valley and hill with soil type inceptisol and entisol), Kuranji (medium slope volcanic alluvial with soil type Diceptisol, Pakasi (hilly volcanic tuff with soil type: ultisol, inceptisol, and oxysol), Bakunan (small valley and hill with soil type for duticed incoks on hilly land with soil type: ultisol, inceptisol, and oxysol), and Teweh (sedimented rocks on hilly land with soil type: ultisol and inceptisol). Based on HCV document the land at Sisumut Estate is classified flat and weavy with altitude of 5 – 271 mdpl according data GDEM Aster 2009. The land at Kanau Estate is also considered relatively flat based on Topgraphy map scale 1:35.000, where there is no sign of drastic elevation change in the area. The road maintenance program is in place in Sisumut Estate. Sighted the Daftar Biaya Kegiatan Bulanan (monthly activity for 2017) as the realisation of road maintenance program, which classified in blocks and target (m). The similar condition also happens at Kanau Estate for example in 3rd quarter 2017 it is planned 170.45 m of road maintenance. The road condition in the estates however is considered good for transportation. The budgeting is secured with rencana Anggaran Belanja 2017 where road maintenance program is	Compliance status:
Criterion 4.4: Practices maintain the quality and availability of surface and groun	nd water.
<b>Findings:</b> The organization has established a water management plan for mill and plantation i.e.: Prosedur Kerja, Title: Pengelolaan dan Penggunaan Air, Document no. PK-3.11-05, rvision 01, dated May 19, 2016. The document was scoped water providing, distribution, and utilization on PTPN III (Persero). The purpose of procedure is to ensure that water management and utilization in accordance of norm or standard.	Compliance status:
Water management plan also contained in Rencana Pengelolaan Lingkungan (RKL) and Rencana Pengelolaan Lingkungan (RPL). The RKL & RPL including water sources. The organization has Water Treatment Plant (WTP). The sources of water come from Barak River, and collected in "Waduk". Processes of WTP consist of Bak Endapan I, Tank (60 tonne) $\rightarrow$ Mill, Clarifier Tank, Bak Pengendapan II, Sand Filter (1, 2, and 3), Tank (30 tonne), Kation, Anion, Feed Tank, Dearator Tank $\rightarrow$ Boiler (1 & 2)	
There evidence that the organization (Sisumut Mill) has appropriate treatment of mill effluent to required levels and monthly regular monitoring of discharge quality, i.e: BOD, COD, and other parameters in accordance of national requirement.	

PT Perkebunan Nusantara III (Persero) – Palm Oil Mill Sisumut

North Sumatera, Indonesia

TÜVRheinland® Precisely Right.

	Page 26 of 57
Monitoring and measurement of effluent discharge quality was performed by third party laboratory. There is evidence that the water discharge quality has compliance with national regulation (KEPMENLH No. 28 Tahun 2003) Results of monitoring during periods January – June 2017, the BOD value still under threshold value (≤ 5,000 mg/l). Based on observation to mill's effluent treatment (IPAL), there is evidence that the organization has maintained IPAL appropriately.	
The organization (Sisumut Estate) has valid license for land application of mill efflu- ent regarding Decree of Head of Badan Pelayanan Perizinan Terpadu dan Pena- naman Modal Kabupaten Labuhan Batu Selatan No. 503/390/BPPTPM/2013, dated November 2013. The organization has established a procedure to masure mill water usage, i.e: Prosedur Pengelolaan dan Penggunaan Air, Document No. PK-3.11-05, Revision 01, date May 19, 2016. The purposes of procedures was defined, in order to ensure that water usage according to standard	
The organization has define standard of chemical and water usage as defined at Document No. DP-3.11-03/01, Revision 03, Dated May 19, 2016. Namely Quality Plan of Production Processes / <i>Rencana Mutu Proses Produksi</i> and Norm List of Chemical Usage and Processing Water of Mill / <i>Daftar Norma Penggunaan Bahan Kimia dan Air Pengolahan di Pengolahan Kelapa Sawit.</i> Raw water usage standard are: $1,5 - 2,0$ M3 per Tonne FFB; Water for Boiler $0,7 - 0,9$ M3 per Tonne of FFB. The organization has maintained records of mill water use per tonne of FFB, i.e: 2017 (until July) was 0.625 M3 per tonne FFB and 2.50 M3 per tonne CPO.	
Criterion 4.5: Pests, diseases, weeds and invasive introduced species are effect ing appropriate Integrated Pest Management (IPM) techniques.	ively managed us-
<b>Findings:</b> The company has a document of IPM Program 2017, where it consists of i.e. Turnera and Antigonon planting which consists seedling, planting, and insertion with time schedule over the year. Based on interview at Sisumut Estate with Mr. Hutagaol (EWS Officer at Division 3) there are 4 main threats at the estate i.e. Orytes, rat, fire worm, and bagworm. The regular pest survey is conducted daily with sampling method for each block and each division. The monitoring is conducted by cutting the frond of sampled palm and check the existence of worms. For rats the checking goes to bite mark on FFB. The worm attack is categorized into 3, i.e. low: 2-3 worms per frond, medium: 3-5 worms per frond, and heavy: >5 worms per frond. Once the monitoring is conducted then the data will be compiled at division and estate level, sighted the Monthly Report of Bagworm and Fireworms July 2017 where there is no sign of attack at all. There is application of Antigonon and Turnera by Sisumut Es- tate, stated on Inventory until July 2017 per division with total turnera 520 plants and Antigonon 58 plants. The estate also develop other bio agent i.e. Eucantechona (beetle) that eats fire worm. However, this is not effective since the existence of fire- worms is almost non-existent. The Sisumut Estate pest-monitoring officer has been trained, stated on Sosialisasi Pengendalian Hama Terpadu attended by each Division (1-7) IPM officers. The train- ing includes ways to conduct telling (counting), for worms and rats.	Compliance status:
Criterion 4.6: Pesticides are used in ways that do not endanger health or the env <u>Findings:</u> The company uses pesticides based on needs analysis. The safety aspect of pesti-	<i>ironment.</i> Compliance status: ☐ Yes ⊠ No
cide usage are stated on procedure for chemical spraying. For Sisumut Estate there is Recommendation from Manpower Authority number 560/05/Naker/I/2017 dated 3	NCR No.

TÜVRheinland® Precisely Right.

	Page 28 of
on justification to use Ratgone at Kanau Estate with its LD50 consideration, this is	
due to its active ingredient of Brodifacoum is listed under class 1A WHO.	
Based on field verification to Sisumut Estate, pesticide storage is collected to haz-	
ardous waste warehouse located in Sisumut Estate. The company however needs to	
ensure that there is no flowerpots using empty chemical container along with	
disemintation measure to workers. This is due to during field visit to housing at divi-	
sion 5 Sisumut estate there is an indication that several flower pots are using empty	
chemical container, yet direct evidence that the container is from company's opera-	
tional could not be found. To follow up this issue, the estate have already conducted	
dissemination to workers and inhabitants regarding prohibition to use chemical stor-	
age as flower pots evidenced by attendance list on 29 August 2017 attended by 30	
participants.	
The method for chemical application is conducted in a standardised manner regard-	
ing walking speed, nozzle height from ground level, PPE, and spraying equipment.	
Based on interview with CV Silumba foreman at division 3 Kanau Estate the contrac-	
tor conducts regular calibration to ensure pesticide dosage applied by knapsack is	
still accurate. However, the company does not retain the record of calibration, more-	
over there is no special method applied yet for chemical application calibration to en-	
sure the exact amount applied by each knapsack is in line with dosage. The proce-	
dure for safety usage of chemical is stated on working instruction for hazardous	
chemical application (IK-3.09/14 rev.1 dated 19-5-2016) where MSDS shall be ref-	
ered, PPE is a must for all workers, no eating, drinking, smoking while applying	
chemical, and not to wash working equipment in natural water courses. There is no	
aerial application of pesticide.	
Example of training was in Sisumut Estate the training on pesticide handling is evi-	
denced by Dissemination on Chemical Usage for Internal and Sub-contractor Work-	
ers year 2017, regarding work instruction for planting including manuring, spraying,	
HCV protection, waste management, etc. (on 10 Aug, 11 Aug, 15 Aug, ) attended by	
7 divisions, which amongst from sprayers were 120 personnel.	
The chemical storage is handled as per legal requirement where it is part of hazard-	
ous waste management. The wastes are put into hazardous waste warehouse to be	
further collected by licenced 3rd party. The handling process is according to work in-	
struction on handling and storing hazardous waste (IK-3.11-19/01 rev.2 dated 19-5-	
2016).	
The company conducts medical surveillance for chemical sprayers including special	
test for cholinesterase which is so far only done annually. Based on letter form PTPN	
3 to PT Sri Pamela Medika Nusantara (Hospital), on 11 Aug 2017, which states the	
offer from company to hospital to conduct special medical surveillance in 2018. Simi-	
lar situation also exists in Kanau Estate. There are evidences of cholinesterase	
check for sprayers including those 4 interviewed on field with result "healthy", as	
stated on Laboratory Analisys Result no: 564/BHP/VIII/2017. The check was jointly	
conducted on 16 August 2016. There is cholinesterase record in 2015 where all	
workers are classified as normal. However there is no cholinesterase check con-	
ducted in 2016, moreover in 2017 it had been only one cholinesterase check done	
which was in August 2017. This is a non-conformance to Permenaker no: PER-	
03/MEN/1986 on health and Safety Requirement at Workplace Dealing with Pesti-	
cide. (NCR no: RSP001444)	
Chemical spraying activity is conducted by sub-contractor, for example in Division V	
Sisumut Estate the sub-contractor is CV Giok Raja Persada with working order no:	
3.09/SPK/463/2017 dated 9 March 2017. In the Job Agreement (SPK) there is a	
clause number 2.1.6 whichs states that sub-contractor has to ensure regular medical	
surveillance of its worker. The sub-contractor pays the medical bill while the execu-	
tion is jointly conducted with estate staffs. There is also prohibition of pregnant and	
brest-feeding women to conduct chemical activity. The company has permited ma-	
ternity leave for 1.5 month prior to and 1.5 month after childbirth, which stated on the	
Mutual Work Agreement/Perjanjian Kerja Bersama (PKB) 2016-2017.	

## North Sumatera, Indonesia

<b></b>	Page 29 of
Findings:	Compliance status
PT Perkebunan Nusantara III (Persero), especially at Sisumut Mill has defined ma- negement system policy namely Kebijakan Sistem Manajemen PT Perkebunan Nusantara III, signed by Operational Director, dated June 23, 2016. The policy is	NCR No. RSPO01445 (Major
written in Bahasa, so it si easily to be understood by all levels within the organization. The organization has defined OHS Policy, signed by P2K3 and approved by District Manager Labuhan Batu 3 on January 9, 2017. The policy is written in Bahasa and covers risk mitigation to workers. Based on interview with some operators, there is	indicator 4.7.3)
evidence that the policy has been disseminated.	
The organization has established work plan of HSE Management System Implemen-	
ation. The program was arranged by P2K3 Secretary and approved by Head of P2K3. The OHS program covers: - OHS Monthly Meeting	
- Defined OHS Working Plan	
- Identification of hazard, risk assessment, and risk control	
- Training need analysis	
- Implementation of policy, commitment and OHS objectives	
- Defined OHS working plan	
- Skill development and ability of personnels	
- Training of emergency response	
- General inspection	
- Identification of medical checkup of employee	
- Checking of emergency response equipments	
- OHS internal audit	
- OHS external audit	
- OHS performance evaluation and management review	
There is evidence that the plan was implemented, some evidences were reviewed,	
such as:	
- Monthly inspection of emergency response equipment such as Fire Extinguisher	
(APAR, Hydrant, Hoses, Hydrant Nozzle, and Hydrant Pump), for example: rec-	
ord dated August 09, 2017, scope POM and Complex, consist of :	
1. APAR : 43 pcs (6 of them are in in-appropriate conditions)	
2. Hydrant: 6 pcs (all OK)	
3. Hoses: 6 pcs (all OK)	
4. Nozzle: 6 pcs (all OK)	
5. Hydrant Pump: 2 pcs	
- Identification of hazard, risk assessment, and risk control all process year 2017	
<ul> <li>Socialization of OHS year 2016 and 2017</li> <li>medical checkup of employee year 2017</li> </ul>

	Page 30 of 5
sumut Estate) with details as follows: Shoes 49 pieces, 3 rubber long gloves, 42 dust glasses, cloth gloves 42 pieces. The organization has conducted risk assessment for all operation where health and safety is an issue such as: loading ramp, sterilizer, press, hoist crane operation, press, weigh-bridge, threshing, FFB elevator, digester, storage tank, office ativities, and etc. Results of risk assessment, and risk control are stated on hazard identification document, risk assessment and risk control. There is matrix of occurrence and severity for defined risk levels (Low, Medium, High and Extreme). Each risk level has defined what actions should be taken. The procedure for hazard identification, risk assessment and risk control has been established, i.e: Working Procedure of Management System Plan of PT Perkebunan Nusantara III (Persero), Document No. PK-3.16-02, Rev. 02, dated May 19, 2016.	
The management of Sisumut Mill has defined OHS Committee (P2K3) in accordance with national regulation i.e: Regulation of Ministry of Labor No. PER.04/MEN/1987. The P2K3 has been approved by Head of Social, Labor, and Transmigration Agency of Labuhanbatu Selatan Regency No. KEP.14/P2K3/Naker/I/2017, January 20, 2017, concerning Approval of P2K3 (OHS Committee) at the Organization. The secretary of P2K3 has competency as required by regulation that is General OHS Expert certificate (AK3 Umum) holder, i.e.: Mr. Suraji, holder AK3 Umum based on decree of Ministry of Labor and Transmigration No. KEP.3687/NAKER-BINWASK3/VI/2016, June 20, 2016, regarding assignment of AK3 Umum.	
KANAU Estate also has approved P2K3 by head of Social, labor and Transmigration Agency of Labuhan Batu Regency, as decree No. KEP.06/P2K3/DSTKT-4/2016, dated February 04, 2016, concerning approval of P2K3.	
Sisumut Eestate also has approved P2K3 by head of Social, labor and Transmigra- tion Agency of Labuhan Batu Regency, as decree No. KEP.12/P2K3/Naker/I/2017, dated January 5, 2017, concerning approval of P2K3.	
<ul> <li>There is evidence that the P2K3 meeting has been conducted monthly with related personnel from other functions in Sisumut Estate, for example:</li> <li>Minute meeting dan attendance list dated January 01, 2017</li> <li>Minute meeting dan attendance list dated February 9, 2017</li> <li>Minute meeting dan attendance list dated March 3, 2017</li> <li>Minute meeting dan attendance list dated April 4, 2017</li> <li>Minute meeting dan attendance list dated May 4, 2017</li> <li>Minute meeting dan attendance list dated June 6, 2017</li> <li>Minute meeting dan attendance list dated July 24, 2017</li> </ul>	
The organization has established a prosedur for handling and reporting of OHS, document no. PK-3.12-11, Rev.00. The procedure covers major potential emergency such as fire, earthquakes, chemical spillage, riots, etc. Accident records form has been prepared to record accident and investigation results namely "Laporan Penyelidikan Masalah K3", form No. FM-3.12-11/02, Revision 00. The procedure and records (forms) are available in Bahasa Indonesia, so it is easy to understand by all persons at all levels within the organization.	
There is evidence that the organization has operators which is licensed and trained in First Aid, e.g. Mr. Lanang Taruna Nimprang, No. DTK-TR/SU/IX/2015, valid until September 22, 2017. Based on observation to fileds and activities such as harvest- ing, spraying, office, stores of chemical, hazardous waste, evidenced that first aid equipment available at worksites. There is evidence that first aid kits are adequately stocked and regularly checked in accordance to Permenaker No. 15 year 2008. Based on document verification and explanation of representative of the organiza- tion, there is no reported accident within 1 (one) year in mill.	
The organization provides all workers with medical care, and covered by accident in- surance as required by the national regulation, i.e: BPJS. This is evidenced by the slip of salary payment which includes name, NRK, NPWP, No KPJ (accident insur-

of Manpower.	
Criterion 5.1: Aspects of plantation and mill management, including environmental impacts are identified, and plans to mitigate the negative imp positive ones are made, implemented and monitored, to demonstrate continua	acts and promote
Findings:	Compliance state
During the time of surveillance, there is no document changes about environmental impact assessment (EIA). The organization has documented EIA in accordance to scope of operation covering building new roads; processing mills or other infra- structure; putting in drainage or irrigation systems; replanting and/or expansion of planting areas; management of mill effluents; management of palm pests and disease by controlled burning; transportation operational, etc. The EIA has been conducted and documented according to local and national requirements, fristly the organization (Sisumut estate) has an approved EIA, namely Study of Environmental Evaluation or Studi Evaluasi Lingkungan (SEL). The SEL was approved by Ministry of Agriculture according to Decree No. Rc.220/269/B/II/1994, dated February 09, 1994. The scope of SEL is Sisumut Estate that located at Sisumut Village, Kota Pinang Sub-district, Labuhan Batu Regency, with area of 5,725 ha of land use right (HGU) and Palm Oil Mill with 30 tonne FFB per Hour in capacity. Due to Government Regulation (PP) No. 27 year 2009 concerning Analysis of Environmental Impact, the organization has revised their Environmental Management and Monitoring Plan (RKL and RPL) which has been approved by District Environmental Impact Management Agency (Bapedalda) of Labuhan Batu Regency, No. 61/RKL-RPL dated December 29, 2006.	NCR No.:
Environmental management plan (Rencana Pengelolaan Lingkungan/RKL) is available and includes the following identification of responsible person(s); potential impacts from current practices; measures to mitigate negative impacts; timetable for change (if any). There is evidence that management plan has been implement- ed appropriately. Environmental monitoring plan (Rencana Pemantauan Lingkungan/RPL) was available also and there is evidence that monitoring plan has been implemented to monitor effectiveness of the management plan and mitigation measures. The envi- ronmental monitoring results was reviewed and reported to competent authority body regularly once every 6 (six) months.	
Criterion 5.2: The status of rare, threatened or endangered species and oth Value habitats, if any, that exist in the plantation or that could be affected management, shall be identified and operations managed to best ensure that and/or enhanced.	l by plantation or
Findings:	Compliance state
There is no change regarding HCV management since previous audit. The com- pany has identified HCV on their HGU, through the HCV assessment conducted by Research Center of Biological Resources and Biotechnology (PPSHB), Research Institute and Community Service, Bogor Agricultural University on September 2011.	⊠ Yes □ No NCR No.:
Based on HCV Report Identification, Sisumut estate has High Conservation Value Area for 69,75 ha with the following details: o Titik Barak Riparian River 19,25 ha

Total HCV area is 125,95 ha	
The company has evidence to manage their HCV through the working program, ev-	
idenced by:	
a. Implementation schedule of HCV management on Division 5 and 6, Sisumut	
Estate with activity of signboard maintanace, agrochemical prohibition along	
the riparian zone, boundary markers maintanance.	
b. Implementation schedule of HCV management on Division 1, Aek Nabara	
Utara Estate with activity of signboard maintanace, agrochemical prohibition	
along the riparian zone, and boundary markers maintanance especially for	
HCV area.	
Based on species identification in the HCV assessment report, there is no existence	
of RTE species in the company area. To show its commitment to preserve and	
maintain the HCV area, the company has conducted HCV socialization for employ-	
ee, evidenced by attendance list on June 10, 2016 at Sisumut Estate, attended by	
by 35 participants. While in Aek Nabara Estate, HCV socialization has been con-	
ducted on March 11, 2016, attended 25 participants.	
The company has established regulation regarding prohibition of catching, hunting;	
of all species include flora and fauna in the company area. Company also has in-	
stalled signboard in the estate area as a warning to reminder every one in the	
company area that is not allowed to disturb the HCV area.	
Criterion 5.3: Waste is reduced, recycled, re-used and disposed of in an enviro and socially responsible manner	nmentally

North Sumatera, Indonesia

Rev.2		Page 34 of 57
	of used lubricant code B105d as much as 145 litre on 2 August 2017 at Sisumut Estate. For Kanau Estate there is record of manifest e.g. AOH0000451 of used lubricants as much as 100 litre on 6 July 2017. In Sisumut POM there is hazardous waste balance (Neraca) until July 2017, for example in July 2017 there were 0.2954 ton of empty container. Other wastes are fuel filter, oil filter, and fluorescent light bulb. Report of 3 monthly management of hazardous waste is also available for 1st and 2nd quarter of 2017 delivered to district level Environmental Authority. There is also evidence of collection by 3 <sup>rd</sup> party e.g. hazardous waste manifest no: AOH0000489, which was used fluroscent light bulb (B107d) as many as 70 kg collected on 2 August 2017. The mill also has temporary hazardous storage permit i.e. no: 503/1068/BPPTPM-LS/2016 dated 22 December 2016 valid for 5 years. Based on field verification to estates, office, and housing facilities there is no sign of garbage burning. The company has already announced burning prohibition for garbage on signboards. Both estates have conducted proper management of waste, e.g. classification of organic/an-organic domestic waste. On the waste identification list document, there are means of domestic waste reduction e.g. by reusing and recycling. The hazardous waste handling is conducted by cooperation with 3 <sup>rd</sup> party collector. The company prohibits waste burning activity through Internal Memo 18 April 2016 and 12 January 2017 regarding trash-burning prohibition. This commitment had beed disseminated to all workers evidenced by dissemination attendance list attended by 97 participants from all over division.	
	Criterion 5.4: Efficiency of fossil fuel use and the use of renewable energy is optimiz	ed.
	<b>Findings:</b> At Sisumut Estate there is data of fosil fuel usage in 2016 and 2017 i.e. for FFB and personnel transport per ton of FFB produce. The data is classified for each type of vehicle (truck and SUV) and divided by amount of FFB produced. For example, Hino truck BK 9527 CQ uses 0.00004 litre of fuel/Ton FFB in 2016. Total vehicle fuel usage in 2016 at Sisumut Estate was 0.00033 litre/ton FFB while for 2017 (until July) is 0.00012 litre/ton FFB. Similar situation also exist in Kanau Estate, where fuel consumption is recorded for each vehicle type and all registered vehicle and fuel consumption for other machinery, e.g. grass mower. The Sisumut POM has recorded electricity usage for mill operation, social building, and housing. The mill operation and social building (clinic, mosque, church, hall, etc) are using turbine-powered electricity, while employee houses are using grid electricity. There is data record of January – July 2017 electricity usage by turbine along with usage norm (threshold), and it was evidenced that the usage in 2017 are still within the threshold, for example in July 2017 the usage was 281750 KWH while the threshold is 477892 KWH. The record for grid electricity usage are recorded in the form of electricity bills for example in July 2017 the total employee houses were using Rp 3,562,896 with most of the power are 950 VA. The mill also uses shell and fiber as an alternative source of energy for diesel. There is a financial analysis that compares fibre and shell usage to diesel, where in 2016 there was en efficiency achievement as much as Rp 21,258,652,653 from the usage of fibre as much as 20,662,265 ton and shell as much as 10,075,344 ton.	Compliance status: ☑ Yes ☐ No NCR No.:
	For 2017 there are data until July, fibre: 12,261,143 kg and shell: 6,130,571 kg and efficiency achievement was Rp 26,320,800,000 Fuel usage for 2016 at mill: 0.8245 litre/ton CPO and 0.1785 litre/ton FFB Fuel usage until July 2017 at mill; 0.8404 litre/ton CPO and 0.1791 litre/ton FFB.	
	Criterian 5.5. Use of fire for propering land or replanting is evolded execution	

Criterion 5.5: Use of fire for preparing land or replanting is avoided, except in specific situations as identified in the ASEAN guidelines or other regional best practice.

Criterion 6.1: Aspects of plantation and mill management that have social impacts, including replanting, are identified in aparticipatory way, and plans to mitigate the negative impacts and promote the positive ones are made, implemented and monitored, to demonstrate continual improvement. Compliance status:

## Findings:

 $\boxtimes$  Yes  $\square$  No Document of Social Impact Assessment for Sisumut Estate had been composed in 2011 by an independent consultant team from North Sumatra University. The NCR No.: process of preparing social impact assessment document uses method of Participatory Rural Appraisal (PRA), the use of such method is able to explain condition of community in the villages surrounding Sisumut Estate. The document of Social Impact Assessment describes about community land use access, community livelihoods, cultural and communities activities, health and education facilities. The document also explains about impact of Sisumut Estate for each village, including public consultation with community and to employee, which have been conducted. In order to improve the monitoring and implementation system of social impact to

village communities around the plantations, Sisumut and Aek Nabara Utara Estate has already making plan for impact monitoring. The document that have been

and additions to the agreement, facilities recognition and guarantee, labor relations, working time, education and training, remuneration, permit not come to work and leave, work safety, sanction rules, termination, and settlement of complaints. So- cialization of PKB Period of 2016 -2017 to all level of workers in estate of Sisumut and Mill was conducted on 6, June 2017, in Aek Nabar Utara Estate on January 10, 2017.	
The Company already provide proper facilities to all workers, i.e workers housing, sports facilities etc. Water supply for worker obtained from wellbore/electric water pump in each worker house (include in electricity allowance). Company has worker Cooperative which provides household goods for workers and their families, and company allow the workers to sell its household goods. For health services PTPN III provide company hospital at South Aek Nabara. Company provides facility and infrastructure for personnel, such as worship facility,	
mosque, primary health service, sport field, water collection facility, soccer field, personnel hall, child care, personnel health post and clean water source. Based on field visit to housing facility in Sisumut Estate, it is known that company provides sufficient housing and health facility for its personnel. Emplacement department is in charge on maintaining the facility and infrastructure for personnel. Company provides medical clinic that provides medical service for personnel and provides	
school bus for elementary and junior high school students. Based on a visit to the G10 employee housing in Aek Nabara Utara Estate and housing Block 05, it was known that housing facilities were in good condition, the availability of adequate water and clean residential neighbourhood are in place. The Company has conducted contractor evaluations including the rights of its workers, for example CV Giok Raja Persada.	
Based on field trips to KANAU Estate division III Block Q3, there was a worker from CV Silumba as partner/contractor for spraying. But there is no working contract be- tween PTPN III KANAU and CV Silumba, only a letter of appointment on the provi- sion of goods and services No.3.20/X/Tim.B/SPPBJ/VII/2017. The company has not been able to show the results of contractors evaluation that contain workers' rights, such as contractual agreements between contractors and their workers. These issue has been raised as non conformity (NCR no: RSP001446)	
The company does not yet have a mechanism on the replacement of self- purchased work equipment. Based on interview with harvesters in KANAU Estate division I, there was information that the FFB manual carrier purchased alone. This issue has been raised as non-conformity <b>(NCR no: RSP001447)</b> .

dence as the initial basis for further investigation. All workers should sign the Statement of Obedience to implement Code Of Con- duct in every year (Evidence of policy Socialization). Policy on reproductive rights have been disseminated to all levels of employees on 19 June 2017. In addition, the policy is also posted on the office announcement board, housing, clinics and Division Offices. Based on interviews with women workers in Sisumut Estate, it was known that the workers understand the reproductive leave entitlements, i.e. 2 days menstrual leave and 3 months maternity leave. There was Gender Committee Organization. Gender committee activity is educa- tion about the harassment and benefit of gender committees, education about hy- giene and environmental management, reproductive counseling and benefits of breastfeeding, the activities to enhance skills of housewife. On June 19, 2017, it has been implemented socialization about harassment and benefits of gender committee, the participants were men and women around the estate. Results of in- terviews with women who is spraying personnel and a kindergarten teacher stated that the company gives leaving entitlement H-1 (menstruation) and H-2 (childbirth).

#### 3.4 Noteworthy Positive Components and Potential for Improvement

#### Positive Observation:

No.	Indicator	Positive Components
1	-	A proactive response from all corporate teams in response to potential field findings.
2	-	There is evidence of minimal use of chemical pesticides in both gardens.

#### Potential for Improvement:

No.	Indicator	Potential for improvement
1	1.3.1	Socialization of the code of conduct to be re-upgraded to all levels of POM, estates, and contractors employees.
2	2.2.2	It is recommended that in the document of monitoring result of boundary pillar, also provide coordinates for each pillar (Sisumut & KANAU Estate) and registration number of pillars (KANAU Estate)
3	4.6.3	Although the use of pesticides for pests is low due to the small number of attacks, it is necessary to draw up data showing the relation between the reduction of chemical pesticide use with the application of IPM with biological agents.
4	4.6.5	The company needs to do a justification analysis of Ratgon usage in KANAU Estate by considering its LD50 level, this is because Ratgon with Brodifacoum active ingre- dient is listed in the WHO 1A class.
5	4.6.7	It is advised to conduct calibration against spraying kit to ensure spraying volume is inline with its specification.
6	4.7.2	Safety induction should be conducte for guests who come to the estates/POM.
7	4.7.5	Preferably, there is first aid kit available at the pump house for POME Land Applica- tion.
8	5.6.2	Efforts that already made by companies such as the application of EFB and POME land applications should be incorporated into the GHG Emission Mitigation Program along with their evaluations.
9	6.13.1	Socialization of human rights to be re-upgraded to all levels of POM, estates, and contractors employees.

10	6.11.1	PKBL to be realized in each unit so that it is represented for each unit.
11	6.5.1	It is advised to improve the socialization of PKB 2016-2017 to all levels of Estate and POM workers. To ensure that contractors provide wages to their workers in accordance with the applicable District Minimum Sector Wage (UMSK).

#### 3.5 Conclusion and Recommendation for RSPO P & C and Supply Chain Certification

The audit team has confirmed through the audit process that PT PN 3 Sisumut POM has established and maintains an effective system to ensure compliance with the RSPO P & C (INA NI 2016) and Supply Chain Certification System requirements (dated November 2014). It is also confirmed that the company's annual volume of CPO and PK sold for the period of 2016 has not exceeded the certified annual tonnages as claimed in the organization's RSPO certificate.

TUV Rheinland recommends that PT PN 3 Sisumut POM be continuing approved for certification of compliance to the RSPO P & C and Supply Chain Certification System requirements.
