**23. What steps will your organization take to minimize its resource footprints?**

Raisio has reported environmental issues for over 10 years now. In 2011 Raisio Group set numerical environmental objectives for 2012-2014.

In 2008, Raisio equipped its Elovena oat flakes with a label that indicates the CO2 emissions of the product and thus created a new labelling indicator.

The company is extending the use of the CO2e label in other consumer products. In 2009, as the first in the world, Raisio added an H2O label to Elovena oat flakes package, indicating the total water consumption of the product.

Raisio devised its own calculation model for the label.

---

**24. What steps will your organization take to realize ethical conduct using business-applicable regulations and industry practices?**

Raisio continues good co-operation with subcontractors.

---

**25. Has your company supported any community programmes on its own or through partnerships? How do you benchmark the impacts of these programmes?**

---

**26. Are you sourcing 100% physical CSPO?**

No

---

**26.1. Please details your organization's plan to cover sourced palm oil and palm kernel oil, which is not yet segregated or identity preserved, through Mass Balance. If you have not committed to sourcing 100% of palm products under the Mass Balance supply chain system until the goal of 100% segregated or identity preserved CSPO can be achieved, please explain why.**

Raisio's target is to use 100% CSPO by 2015. After we see how this target is met, we shall evaluate the situation and possibly set a new target.
