SUMMARY FROM SEI ASSESSMENTS:

A Participative Environmental Impact Assessment (SEIA) has been conducted separately. The Social Impact Assessment (SIA) was conducted by RSPO approved HCV assessors (Andri Novi Hendrarto, Ganip Gunawan, Gena Lysistrata and Miranty Magetsary) on 22-29 May 2010 and the Social Environmental Impact Assessment (AMDAL) conducted by government accredited assessor (Ir Fahrizal, M.P; DR Farah Diba, S Hut, MSI; Dian Purwanto, S.Hut; Tanti Erningtyas, S.Hut, MSI).

The SEIA covered a review of documentary sources are collected through Focus Group Discussion (FGD), in-depth interview, government policy, and village profile data. The assessment also covered field observation and public consultation meetings for the villages within the project area and for affected landowners of surrounding communities. Summaries and findings of the interviews and public consultation meetings are included in the SEIA report.

Main issues studied in the assessment were company profile and general condition of the plantation area covering impact to human capital (job opportunities, improvement on the level of community education, increased public awareness of good agricultural practice and development of alternative income generating activities to safeguard their economic standing after post-development of the project), impact to natural capital (company's participation in managing water quality, land acquisition should also receive community approval, social impact management to social sustainability on internal estate communities) and the provision of facilities for workers. The assessment was also conducted to identify the demand of transparency aspect (Principle 1) and legal compliance as well as applicable law (Principle 2) as stated in RSPO P&C Indonesia, community perception towards plantation development, as well as the existence of conservation area based on HCV toolkit Indonesia.

SUMMARY FROM HCV ASSESSMENT(S):

HCV assessment of PT Surya Agro Palma operational area was conducted by RSPO approved assessors Wibowo A. Djatmiko (Team leader, Dicipline Specialist on Biodiversity and Conservation), Idung Risdiyanto, MSc (Environmental Service), Ganip Gunawan (Social and Culture), Yunus Bahar (GIS Specialist). The desk study conducted on 10-19 May 2010, field observation on 20 - 29 May 2010 and reporting on 1 - 14 June 2010.

The assessment included participatory mapping and satellite imaginary analysis, ground truthing, field data collecting, in-depth interview, public consultations with the communities living in the project area (Belungai Dalam Village, Lumut Village Sansak Village, Teraju Village and bagan Asam Village) and field analysis. The HCV assessment report included recommendations for the management and improvement of the HCV found within the project area.

The HCV identified in the PT Surya Agro Palma project area clearly mapped. Based on identification and analysis of HCV presence in the area of PT Surya Agro Palma there are found HCV1.1, HCV1.2, HCV1.3, HCV3, HCV4, HCV5 and HCV6 with total area coverage of 1995.9 ha (11.41 % from the

total concession area of 17,500 Ha). No area supporting HCV 2 is identified. Location plan and the area that will be opening new land were not in the primary forest area.

No	High Conservation Value Area	Type of HCV	Size (Ha)
1	Riparian of Sayu River, Swamp Forest of Sayu River	1.3;3;4	180.1
2	Riparian of Belungai River	4	76.9
3	Riparian of Embangai River	4	137.4
