1. Operational Profile

1.1 What are the main activities of your organisation?

Small industrial cake manufacturer making Christmas cakes. Supplying mainly large retail chains and smaller boutique operators. Most of our products are hand made using scratch recipes containing no palm oil but from time to time we use premixes that contain a small percentage of palm oil.

1.2 Does your organisation use and/or sell any palm oil?

Yes

1.3 Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period.

We will continue to comply with the RSPO standards of trace-ability, segregation and staff training to maintain our certification as per our customers requirements.

1.4 What percentage of your organisation's overall activities focus on palm oil?

1%

1.5 Did members of your staff participate in RSPO working and/or taskforce groups in the reporting period?

No

1.6 Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

No

1.7 How is your work on palm oil funded?

The costs of complying with RSPO are largely disproportionate to the amount of palm oil actually used. All of our palm oil used is a minor ingredient of a compound ingredient and is only present in a few end products at less than 1% of total product. The cost of compliance has reduced profit levels as the retail market does not accept cost increases for certified products. This has also affected the profitability on non palm oil products as they subsidise these losses.

2. Actions for Next Reporting Period

2.1 Outline activities that you will take in the coming year to promote sustainable palm oil along the supply chain.

We will continue to comply with the RSPO standards of trace-ability, segregation and staff training to maintain our certification as per our customers requirements.

3. Challenges
