

CREDIBILITY & TRUST

RSPO Principles & Criteria (P&C) Public Summary Report

AGRIVAR S.A. (Agro Industrie Variée)
BONOUA, Cote D'Ivoire

Auditor Name: Ingrid Ayub
Audit Date: April 4 th to 7 th. 2017

CONTENTS

1. Scope of the Certification Audit

- 1.1 Normative references
- 1.2 Company and Contact Details
- 1.3 RSPO Membership Details
- 1.4 Audit type
- 1.5 Location of the Palm Oil Mill
- 1.6 Palm Oil Mill Output and Approximate Tonnages Certified
- 1.7 General Description of Supply Base
 - **1.7.1** Location of the Supply Base
 - **1.7.2** Statistics of the Supply Base and Estimated Tonnes of FFB/year
 - **1.7.3** Biodiversity (Conservation & HCV Area for the respective Supply Bases)
 - **1.7.4** Total Certified Area
 - **1.7.5** Calculation of the Number of Production Units (N) to Sample for the Mill
 - **1.7.6** Calculation of the number of subcontractors to be sampled
- 1.8 Progress of associated Smallholders or Out-growers towards compliance
- 1.9 Location Map for this Certification Unit

2. Partial Certification

- 2.1 Management Organization
- 2.2 Time-bound plan
- 2.3 Progress made on the time-bound plan
- 2.4 Non-conformities

3. Audit Process

- 3.1 IBD The Certification Body
- 3.2 Audit Team
- 3.3 Audit Methodology
 - **3.3.1** Audit Agenda
 - **3.3.2** List of stakeholders consulted prior to and during the audit.
 - **3.3.3** Outline of how stakeholder consultation was managed.
 - **3.3.4** Issues that arose during stakeholder consultation and company responses.

4. Audit Findings

- 4.1 Summary of findings
- 4.2 Non conformity register
 - **4.2.1** Verification of previous assessment non-compliances
 - **4.2.2** New non-compliances raised at this audit
 - **4.2.3** Observations
- **4.3** Lead Auditor Recommendations for the RSPO Principles & Criteria certification.
- 4.4 Comments for next audit.

5. Formal signing of audit findings

- 5.1 Acknowledgment of internal responsibility by the Client
- **5.2** Signing by the Lead Auditor.

6. Major non-compliances follow-up actions

Notes: The company was IP certified until may 2016 when the ASA 1 audit was performed. As a result of ASA 1 audit the certificate was suspended. A verification audit was done in October 2016 to evaluate the company corrective actions including the transfer from IP module to MB module but with a reduced number of growers on each of the 4 cooperatives that has been providing fruit. During the present audit (april 2017) the company has switch again to IP module but with a single provider: BIOPALM Cooperative which is an organic growers cooperative.

1.7 General Description of Supply Base

Agrivar S.A. and BIOPALM Cooperative

Agrivar S.A. is a limited company located in Bonoua. The company owns the palm oil mill named above and has

an active contract with BIOPALM Cooperative for the supply of RSPO certified FFB.

BIOPALM. Biopalm has been certified as organic for EU standard. Growers included in the sample confirmed no use of agrochemicals Each farmer signs a declaration that they will manage the farm on accordance with RSPO requirements as well as organic requirements. Regular visits are made to all growers to ensure continuing compliance. There is an excel data base of all members to show Zone, Parcel, Name, Locality, Telephone, Area, Production per year, Date of planting and Distance to mill, also some member farms have recorded co-ordinates on the farm file. There are also financial records for each member with regard to all aspects of their management including FFB sales.

It should be noted than during the past RSPO audits (2016 and 2015) AGRIVAR was working with 4 cooperatives providing RSPO certified FFB and was producing RSPO IP oil but due to numerous non compliances with the RSPO requirements established during past audits AGRIVAR decided to go, on October 2016, only to RSPO Mass Balance oil production, receiving and processing together the FFB from all four cooperatives (including certified and non certified members within them). For the present RSPO 2017 ASA 2 audit, the scope was switch from MB to IP oil production but receiving certified fruits from BIOPALM Cooperative only. BIOPALM Cooperative is also organic certified and RSPO processes the BIOPALM oil separate in time to assure integrity of organic oil. Taking advantage of the separation in time that anyway should be done to process the BIOPALM FFB , AGRIVAR decided to produced RSPO IP certified oil with the BIOPALM Cooperative FFB only.

The relationship between Agrivar and BIOPALM Cooperative is as follows:

- There is a contract between Agrivar and the co-operative whereby the co-operative will supply Agrivar with a certain tonnage of FFB against a fair price fixed by the National State plus some incentives.
- Agrivar provide technical and logistical support for the growing and transportation of the FFB.
- At least annual visits are made, by Agrivar personnel, to each co-operative member.

BIOPALM Cooperative has 118 growers located in 25 localities around Bonoua. The members of the co-operative are individual farmers and landowners who plant what they like on their smallholdings and oil palm is considered to be just one crop of many which may include rubber, cocoa, fruits and tubers. The largest individual area of oil palm is of 12 ha and most of the members (75 growers) own less than 3,1 ha. The majority of 1 ha, 1.5 ha, 2 ha and 3 ha of palm farms are located in the localities of Grand- Alépé, Aghien and Ahoutoué while the biggest areas (4, 5, 8, 9, 10 and 12 ha oil palm farms) are located in Attrouan and Tchentcheve. Land ownership is through tradition and is passed down through the family. Each owner has intimate knowledge of their land and boundaries are normally made by a change of crop and no land issues were noted. All the farmed land, which includes oil palm, has been under cultivation for several decades if not generations, and there are no traditional rights involved. Local culture and the almost non-existent movement of local people, means that local people know each other and any disputes are resolved by verbal means and agreement at a local level – if indeed any disputes arise. Any primary forest was cleared in the distant past and whilst the Ministry of the Environment has provided maps to show sensitive areas, the co-operative members are not affected. Local knowledge of graveyards and forest areas that are important for cultural or religious reasons are known to locals.

Oil palms are grown on a 25 year cycle and due to the scale of the operations, the agronomy is very simple. No significant pests and diseases have been noted. The co-operative role, is primarily concerned with the marketing of FFB so that the POM can sell organic and RSPO CPO trough the Identity Preserved supply chain model. They have centralyzed records and all members are visited usually once per month by technical personnel. The scale of the operations and the simplicity of the agronomy does not call for detailed reports and observations are generally made verbally.

^{*}Note 1: there was a non conformity established against criterion 2.2.2 due that there was no geo-referentiation of the member farms. AGRIVAR presented a corrective action in may 2017 where more than half of the total members of the certified group are already georefentiated but some improvement on the data should be performed.

1.7.3 Biodiversity (Total Conservation & HCV Area for the respective Supply Bases)

Oil Palm Plantation	Biodiversity.(To	tal Conserv	ration & HCV Area) Hectares.
Name	Conservation	HCV	Comments
BIOPALM Cooperative members	0	0	No conservation areas present as farms have been inherited and planted for several decades. The model present with BIOPALM growers is that there are no land titles and land is traditionally pass from one generation to the other, splitting the area into the different inheritors. The palm planted area is the one that has been considered as total area. Eventhough there are HCV present on the study performed by AGRIVAR, the areas are not quantified as the study only comprise a sample of representative farms.
TOTAL	[0]	0	-

1.7.4 Total Certified Area

(Total Certified Area corresponds to the sum of total Area of Oil Palm and the total Conservation Area)

404,5 ha

1.7.5 Calculation of the Number of Production Units (N) to Sample for the Mill

 $N = 0.8 \sqrt{Y}$, where "Y" is the number of units, with the result always to be rounded "up" to the next whole integer. Where only a sample of the supply base is assessed, units not previously assessed, or assessed earlier in the certification program, are to be preferred over those more recently assessed.

For the Mill, how many units make up the production base?

Owned estates (Y)	N = 0.8√Y	Smallholders (Z)	N = 0.8√Z
0	N/A	118	0.8 √118 =8.69 Eq=9

Explanation as to the selection of estates sampled

From 25 localities where Biopalm growers are located, the three localities with a bigger representation of growers, within the growers list, were selected: Grand-Alépé, Atrouan and Aghien. Four farms in each locality were visited increasing the calculated sample in three. On those localities where female growers were present, a representation of them was chosen. In that way the farms of two women were visited in Aghien. In Aghien the size of farms goes from 1 to 3.5 ha, in Grand Alépé farms have areas from 1 to 7 ha and in Attrouan farms have areas between 1 and 12 ha. In Aghien farms from 1 to 3.5 ha were visited, in Grand Alépé farms from 1 to 2.5 ha were visited as the 7 ha farm grower was out of the town and in Attrouan/Tchentcheve farms with areas between 3.5 and 12 ha were visited.

The table below shows the oil palm plantations that were included in this audit, with the operations reviewed in the field, the number of sample sites within the plantation and the number of worker interviews. Comments are added as applicable.

1.7.6 Calculation of the Number of Sub Contractors to be sampled.

 $N=0.8\sqrt{Y}$, where "Y" is the number of contractors, with the result always to be rounded "up" to the next whole integer. Where only a sample of the sub-contractors not previously assessed, or assessed earlier in the certification program, are to be preferred over those more recently assessed. The table below shows the number of approved sub-contractors who may be contracted to be directly employed in the work of the certification unit. The number of sub-contractors actually contracted at the time of the audit is used to calculate the sample.

Abona Louis	Transportation of mill personnel.	NO	N/A	N/A	N/A
Salif Toumoute	Purchase of machinery intermediary.	NO	N/A	N/A	N/A

Explanation as to the selection of sub-contractors sampled:

All service providers present at Agrivar during the audit days were interviewed.

The transportation service provider for mill workers is at Agrivar only at 6 a.m., 2 p.m. and 10 p.m. and therefore was not interviewed.

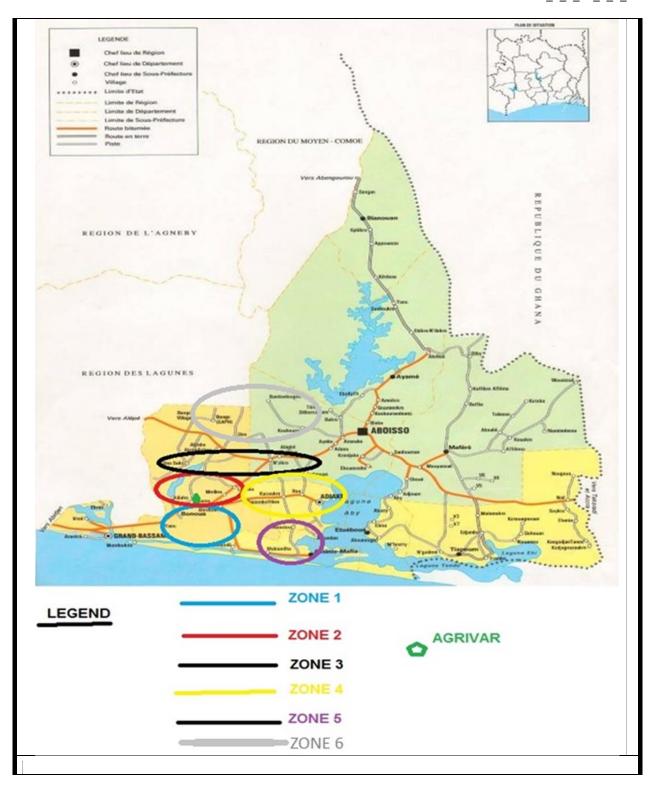

1.8 Progress of associated Smallholders or Out-growers towards Compliance with relevant Standards - should be in accordance to the 3 year implementation plan

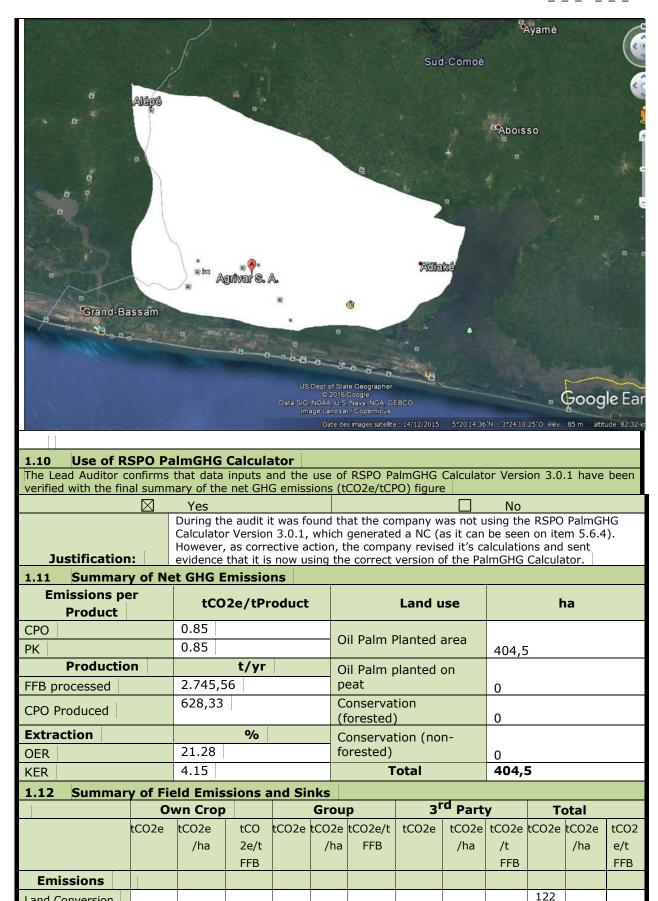

AGRIVAR will continue producing Certified RSPO IP oil with the FFB coming from BIOPALM Cooperative members only. As other cooperatives members solve their non compliances regarding RSPO certification requirements, will be included in the AGRIVAR RSPO certificate. There is separation on time for the RSPO IP FFB process as the mill also buys non certified FFB from any FFB provider willing to sell FFB to the mill as it also produce non RSPO certified oil.

AGRIVAR

1.9 Location Map for this Certification Unit

Note: Individual maps of the group members are available from the co-operatives but it is not practical to reproduce them here. Each area of oil palm is individually managed as an integral part of a farm holding and the adjacent crops are all agricultural.

Partial certification does not apply.

3. AUDIT PROCESS

3.1 IBD - The Certification Body

IBD takes pride in being the largest certifier in Latin America and the only Brazilian certifier of organic products with accreditation through IFOAM (international market), ISO Guide 65 (European market regulation CE 889/07), Demeter (international market), USDA/NOP (North-American market), COR (Canadian market) and INMETRO/MAPA (Brazilian market), making its certificate global.

Located in Botucatu-SP, Brazil, IBD has been in operation since 1992. Initially focused exclusively on the certification of organic product, after 2004, IBD began including certification services in the social-environmental area through the EcoSocial, Integra, RSPO and UEBT (*Union for Ethical BioTrade*) programs. Today, IBD certifies over 5,000 producers, covering an area of approximately 520 thousand hectares in cultivation and 3 million hectares under wild harvest management, throughout 16 countries.

For more information regarding IBD Certificações, access www.ibd.com.br. RSPO Membership N° : 8-0090-08-000-00. RSPO accredited by ASI on November 4^{th} , 2014, worldwide (accreditation code RSPO-ACC-020).

3.2 Audit Team	
Lead auditor	Ingrid Ayub (I.A.)
	Kraidi Awossi (K.A.) and Patrice Konan (P.K.) *
Audit team	*Note: as by mid may 2017, neither the CB neither the lead auditor had received the audit inputs from support auditor Patrice Konan, eventhough multiple reminders were made, the CB decided to contract Kraidi Awossi to perform an extra evaluation on principles 3 and 4. The extra evaluation was performed may 11 th, and 12 ye.

3.3.3 Outline of how stakeholders consultation was managed.

The stakeholders were interviewed by one of two auditors at their place of work and interviews were made without the presence of AGRIVAR personnel.

There were no negative comments towards AGRIVAR activities / Performance by the 4 stakeholders mentioned above. The Chief de Village Abrobakro mentioned that many people from the community work at AGRIVAR mill and she has not heard a negative comment and the growers representatives of Kagbagba does not mentioned negative aspects. Despite the above, during the field visits to the region of Attrouan, the growers, at first instance, refused to be visited indicating that AGRIVAR was delayed in paying the FFB and has not paid the last crop according to the established agreement. See below (section 3.3.4)

crop according to the established	agreement. See below (Seedion 3.3.4)	J					
3.3.4 Issues that arose during stakeholder consultation and company responses.							
Subject raised	Company response and proposed action to be taken.	Audit team findings					
A group of Attrouan growers complain to the auditor visiting that area, indicating that AGRIVAR has not paid jet (day of the visit: april 6 th., 2017) the fruit delivered on march 6 th and 7 th. The established agreement mentions that the FFB will be paid before the next crop to be delivered. Agrivar calendar for reception of fruit from BIOPALM growers contemplates two periods in march 2017: march 6 th10 th . and march 27 th 31 st.	AGRIVAR personnel informed that the situation was caused due that the oil produced with the FFB received between march 6 th and 10 th was sold and AGRIVAR has not received the payment yet.	Growers have to pay for the help received during harvesting. Delays on payments for FFB received by AGRIVAR causes a chain of negative impacts on growers and growers helpers. It was informed by AGRIVAR directives that a loan has been asked to a bank for immediate pay to BIOPALM and that as a corrective action, another loan will be asked to have as a backup in case of delays in receiving payments for palm oil sold.					

4. AUDIT FINDINGS

economic and financial viability.	management plan that aims to achiev	e long-term
Summary of the findings for 3.1:		
Findings: There is a business plan denominated Projet de Creation de Plantations 2014 that contains introduction, context, objectives, cost of the project, stages and inducted costs.	During the audit performed april 2017, some of the projected mill improvements written on the business plan were under development. The new boiler was under installation by the service provider THERMEA, the burning chamber of the boiler in use was under modification and the new sterilizers and press to enlarge the mill capacity were all at the mill or under construction at the mill. Some of the projected plans contemplated on the business plan has not been started yet as the nursery to provide growers with better genetic material.	N/A
Principle 4: Use of appropriate best pra	ctices by growers and mills.	
Criterion 4.1 Operating procedures implemented and monitored.	are appropriately documented and	consistently
Summary of the findings for 4.1: Findings:	Comments:	Compliance
Procedures covering all mill and plantation activities have been developed and are available. Interviewed workers understand the procedures, for those who can not read explanations are given in local languages or in the languages they understand. Proof of the procedures are available through the recordings made by the workers and the observations during the audit. Non conformity 006/2016 Eventhough AGRIVAR has performed an internal audit dated Decembre 2016 it was restricted to environmental aspects "AUDIT ENVIRONMENTAL REGLEMENTAIRE (AGRIVAR USINE) " and there have been no audits performed to evaluate the implementation of procedures to comply with the RSPO standard and labour legislation. Kept open at april 2017 audit. Minor upgraded to major.	Developed procedures take into account harvesting activities, transport, fertilization, Integrated Pest Management (IPM), GAP, production procedures for the and supply chain requirements for the mill. At the mill there is a receipt slip at the gate/scale recording origins of FFB for both certified and non certified growers and mentioning all information on the producer (cooperative, associated cooperative number/code, certification status and volume delivered). The certified growers list is available at the scale and managed by Mr Arthur Amani to cross-check the delivered volumes and to avoid extra delivered volumes based on the farm sizes and the average productivity.	YES/NO
Registers for recording data are retained and available during inspection. AGRIVAR has a in place documents to record all origins of delivered FFB . Detailed information is managed by Mr Arthur Amani, the Supply Chain responsible.		
Criterion 4.2: Practices maintain soil fe a level that ensures optimal and sustain Summary of the findings for 4.2:	rtility at, or where possible improve soi ned yield	l fertility to,
Findings: AGRIVAR has established procedures for the production of oil palm FFB on its supply base including procedures for Good Agricultural Practices and soil fertility management. Growers who applies fertilizers register the	Comments: There are agronomic reports available since November 2016 following soil analysis of growers farms. amounts of fertilizers received and applied	evaluate the yields of the plots.	

YES/N/A

(registered by technical assistants)

Soils analysis started to be performed in November 2016.

The fibers, the empty fruit bunch, the ash and the effluent generated at the mill are used for the production of fertilizers which are offered to the the supply base.

BIOPALM is an organic certified cooperative and visited growers plant a legume species called "Pueraria" as green fertilizers to help with nitrogen fixation and leave the palm leaves along the field to increase the layer of soil organic matter.

Producer yields increased from less than 3T / ha to -6T / ha for BIOPALM growers.

Criterion 4.3: Practices minimise and control erosion and degradation of soils.

Summary of the findings for 4.3:

AGRIVAR has performed soil analysis and there are maps available regarding soil types. The study determines that there is no presence of fragil soils in the study area.

Findings:

Due to the geography of the area were farms are located, it is not necessary to develop a program to plant in steep slopes.

There are government programs to keep the roads in good shape.

Studies show that there are no peat soils in the

Comments: Compliance

According to the AGRIVAR production area soil analysis were made by Enval (RAPPORT D'ANALYSE ENVIRONNEMENTALE, D'ETUDE SUR LES SITES A HAUTE VALEUR DE CONSERVATION et D'ANALYSE DES SOLS DE PALMERAIES SITUEES ADIAKE, MAFERE ET SAMO, DANS LE SUD-EST DE LA COTE D'IVOIRE), report (Rapport provisoire, V03) dated October 2016 which contain the maps of the production area. The results of soil analysis are presented in pages 72 to 75 and soil map cartography is shown in page 76 (4.3 Cartographie des sols). On page 78 of the report there is the following paragraph "Cependant, les résultats des analyses menées au laboratoire et la visite sur le terrain des différentes plantations montrent que les sols n'ont pas une forte teneur en carbone. Il n'y a également pas de sols hydromorphes et de sols à forte pente dans les différentes plantations."

There are no fragile soils in the production area as indicated by the report conclusion.

Criterion 4.4: Practices maintain the quality and availability of surface and ground water.

Summary of the findings for 4.4:

Findings:

AGRIVAR has a water management plan that informs the origin of it (groundwater), the national law applicable in their activity, the amount used per month and the purpose of the use, parameters set by law for the type of water use or waste water generated and the frequency of the analysis that should be made. There is no use of irrigation in the palm oil plantations.

Was evidenced that the company monitors the total consumption of water on a daily basis, evaluate the efficiency of use (m3 of water / ton of FFB processed).

Regarding water courses, AGRIVAR has performed croquis for each of the growers farms, where water courses are identified, if applicable.

ENVAL AGRIVAR the has accepted recommendations and has elaborated a plan for the sensitization of growers regarding the conservation of riparian zones and HCV found on the area.

None of the visited farms during the 2017 audit have water courses going through the plantation or through its limits.

Comments: AGRIVAR

has accepted recommendations and has elaborated a plan for the sensitization of growers regarding the conservation of riparian zones and HCV found on the area. The plan Protection des Zones a Haute Valeur de Conservation, dated 01/10/2016, PR 5.2.01, version 01, 4 pages, elaborated by Hermann Brou, details the organizational financial, technical and measures implemented by AGRIVAR to protect and improved the high conservation values identified in the AGRIVAR operational area. On pages 3 and 4 there is a matrix that contains the following columns: action, activities to be performed, responsible objective/target, person, cost effectiveness criteria. The actions include the protection of "bas fonds" neighboring oil palm plantations (HCV 4 and HCV 5), Protection of trees within the plantation protection of the limits, pangolin (endangered mammal species) protection of neighboring watercourses

Summary of the findings for	1 7·							

Findings: **Comments:** Compliance For the activities related to mill, Agrivar showed the performance of periodic training about the care needed to prevent accidents and to educate employees about the proper use of PPE.

For palm production activity the guidance concerning the safe practices to prevent accidents in the field is given by BIOPALM technical personnel visiting the growers and AGRIVAR personnel delivering trainings to BIOPALM personnel and growers.

AGRIVAR has developed PP presentation regarding Good Agricultural Practices including health and safety aspects and use of PPE which are used in trainings delivered to cooperative personnel and growers.

At the mill there is conduction of daily meetings at the beginning of the activities among the workers of the mill held by the responsible for safety at work regarding actions to be taken to prevent accidents.

Agrivar provide accident insurance to all mill workers (permanent and temporarily) and has insurance for the buildings and infrastructure and vehicles.

Some of the reviewed records includes:

Control of delivering PPE to mill workers presented by the responsible of safety activities, march/2017;

- Advices and information displayed at the mill indicating which PPE the workers have to use;
- Notes de Service displayed at AGRIVAR communication board indicating which workers are trained in first aid and fire control

YES

Criterion 4.8: All staff, workers, smallholders and contractors are appropriately trained Summary of the findings for 4.8:

Findings:

AGRIVAR has develop and implemented a training program on RSPO principles and criteria as mention in their SOP's available in their office.

The company has records of all the training activities carried out at the mill and records evidence of the participation of all the employees in the activities. Training records were reviewed which focus on occupational safety, RSPO P&C, interdit de chaser (prohibition to hunt) and correct use of PPE at mill.

Training material was developed by AGRIVAR (Hermann Brou) regarding RSPO requirements. One PP is general for the RSPO P&C requirements and one is focus on NPP. The general PP presentation contains health and safety issues including safe use of pesticides which in the case of BIOPAL are organic pesticides. The presentations are used in every training delivered by AGRIVAR directed to cooperative technical assistants and growers.

Implementation have been started.

Compliance

YES

Principle 5: Environmental responsibility and conservation of natural resources and biodiversity.

Criterion 5.1: Aspects of plantation and mill management that have environmental impacts are identified, and plans to mitigate the negative impacts and promote the positive ones are made, implemented and monitored, to demonstrate continuous improvement

Summary of the findings for 5.1: **Findings:**

An Environmental Impacts Assessment for the mill was made by Mr. BROU Hermann in September 2011.

In 2016 a broader scope Environmental Impacts Assesment was performed: Procedure PR 5. 1.02 version 4, dated 29/05/2016. Identification and Evaluation of Environmental Impacts which in point 2 establishes that the identification of impacts are perform for the mill and for palm FFB plantations.

AGRIVAR does not build roads neither utilizes irrigation systems.

Comments: Procedure PR 5. 1.02 version 4. (29/05/2016) Identification and Evaluation environmental impacts which in point 2 establishes that the identification of impacts is perform for the mill and for palm FFB producers. There is a section for consumption of resources, a section for pollution and a section for other factors: On the pollution aspects there is a column for air, waste water, soil, waste, special waste and noise. There is a matrix including the results of impacts and a management plan AIES. The plan considers to complete the treatment of mill effluents on december 2016 because the exams results at the exit point of the water treatment did not

MQ III IBD Revisão 26.09.2016

Plans are made for reduction of impacts for the use of water, limit the disposal of liquids to the soil, reduction of impacts by waste management.

The plan considers updating on a periodic basis.

There are monitoring protocols for the mill action plans as the performance of mill effluent analysis and boiler emissions analysis.

comply with legal requirements for water disposal. At the moment, as a solution, the effluents are used to produced organic fertilizers at AGRIVAR grounds.

Criterion 5.2: The status of rare, threatened or endangered species and high conservation value habitats, if any, that exist in the plantation or that could be affected by plantation or mill management, shall be identified and their conservation taken into account in management plans and operations.

Summary of the findings for 5.2:

Findings: An HCV assessment has been performed by ENVAL in October 2016 as well as studies to determine the presence of RTE.

Some farms were identified as having areas classified as HCV 4 and 5. The study concludes with a proposed management plan for the the conservation of Biodiversity and HCV which includes the conservation of **Bas – Fonds.**

AGRIVAR presented a **PLAN DE GESTION INTEGREE DE LA FAUNE, DE LA FLORE ET DU PAYSAGE DES SITES DE SAMO, ADIAKE, BONGO ET MAFERE** dated september 2011, that covers the area where the 4 cooperatives that delivers FFb to AGRIVAR operates. In 2016 the study was updated and the fauna list was reviewed with the IUCN categorization of RTE species. As a result of the review, the pangolin (Manis tricupsis) is the only fauna species considered as an RTE species (Vulnerable) in the species list presented.

Non Conformity 034/2016 Minor and raised to major on april 5 th. 2017.

"Due that growers are the native people leaving in the area since past generations, It is considered that no negotiated agreements is needed. Eventhough, AGRIVAR S.A. has written a Plan de PROTECTION DES ZONES A HAUTE VALEUR DE CONSERVATION (01/10/2016) that include Protection des bas-fonds voisins des palmeraies (HVC 4 et 5), Conservation des arbres des limites de plantation, Protection du pangolín, Suivi de la perception du Pangolin, Protection des cours d'eau voisins. There is evidence of the sensitization activities been performed as seen on criteria 4.2.8. Despite the above, the sensitization has covered only the protection of pangolin but not other topics related with HCV as conservation "des arbres on limit de plantation and protection de cours d eau voisins'

The Rapport D Analyse Environnememntale, D Etude Sur Les Sites a Haute Valeur de Conservation et D Analyse Des Sols de Palmeraies Situees Adiake, Mafere et Samo, dans le Sud -Est de la Cote d Ivoire, elaboré par ENVAL in October 2016, version 03, on section 3 of the report there is the section dedicated to High Conservation Values (pages 53 to 70).

waste was identified. dated june 29 th 2016 was presented. The plan was elaborated by Hermann Brou CU and	performed at the mill and farms all type of generated	ELIMINATION DES DECHETS DE PLANTATION dated june 29 th 2016 was presented. The	YES/NO

The document *Environmental aspects and dangerous situations* mentions the generated waste at farms.

The waste management plan is defined by the QHSE department. And it was the result of the environmental impact assessment performed at the mill and farms and where all type of generated wastewas identified.

The waste management plan is built on material recovery and production of energy.

NON CONFORMITY 001/2017

The waste management and disposal plan does not consider semi permanent waste stocking areas. Waste was found stocked in a disorganized way at the mechanics/ electrician office/working area below the QHSE office. The waste includes cardboard, discarded electric pieces, electric wires, empty coca cola bottles, metallic pieces, parts of chairs, fluorescent light bulbs and others. Other metal waste pieces were found dispersed throughout the green areas of AGRIVAR mill and cloth and other waste materials were found dispersed throughout Agrivar mill facilities.

RSOHE and has the code PL 5 3 02. The objective is to define an action plan for the waste generated by the agricultural activities in order to be environmentally responsible and to reduce the polluting activities generated at farms. It covers all the waste generated from farms activities and contains Déchets issus de l'usure et de l'entretien du matériel agricole, Déchets issus de l'élevage and Déchets issus de la fertilisation et de la protection des cultures which includes the agrochemical containers emptv (not applicable to BIOPALM growers)t.

Solid waste such as EFB and fibers are packed into sheds to integrate either in the heat circuit or to elaborate organic fertilizers. Liquid waste in turn are packed in tanks to reduce the fat content, goes through filtering to reduce the organic material and then is

used on the production of fertilizer.

Criterion 5.4: Efficiency of energy use and use of renewable energy is maximised.

Summary of the findings for 5.4:

Criterion 5.5: Use of fire for waste disposal and for preparing land for replanting is avoided except in specific situations, as identified in the ASEAN guidelines or other regional best practice

Summary of the findings for 5.5:			
Findings:			Comments
AGRIVAR strictly prohibits to use fire for land	AGRIVAR	has	develope

AGRIVAR strictly prohibits to use fire for land preparation.

Non conformity 037/2016 Minor and raised to major on april 2017.

Several posters and announcements has been seen displayed at AGRIVAR mill and at the BIOPALM Cooperative office located in Bonoua regarding the Interdiction de **Bruler Dans les Activites en Plantation** making reference to the law n. 96-766 du October 3 1996 and to the RSPO standard. On two of three areas visited during the present audit, farmers were well aware about the interdiction de bruller, but on an area visited, the growers manifested that burning is the only way to clean the property and that they have burned the property during the replanting activities that has taken place on 2016 and mentioned that some replanting will take place in 2017.

the new boiler was under installation as well as

AGRIVAR has developed a procedure Conduite des Activites de Plantation code 4.2 01 d ated 09 june 2016 developed specifically for the compliance of RSPO requirements on farm part of the supply base. On section 5.1 it covers the requirement for new plantations and explains the new planting procedure. On sections 5.3.3.1.3 and 5.3.3.1.5 it is mentioned that it is strictly prohibited to use fire for land preparation neither for planting, neither replanting. Training material was developed by AGRIVAR (Hermann Brou) regarding RSPO requirements.

Criterion 5.6: Plans to reduce pollution and emissions, including greenhouse gases, are developed, implemented and monitored.

Summary of the findings for 5.6:

Findings:

AGRIVAR has been performing analysis of polluting activities as required by law.

AGRIVAR S.A. h atmospheriques of At the time of the current audit (april 2017), Activite Rejets Atm

Boiler emissions march 2017

the improvement of the combustion chamber of the boiler in use.

There is a plan for the reduction of GHG in the production of palm oil in AGRIVAR dated September 20 th. 2016, Code PL 5.5 01, version 01, containing 16 pages and elaborated by the Responsable Approvisionnement Arthur AMANI.

Non Conformity 002/2017

The mill has started calculation of GHG emissions but using Palm calculator V. 2.0.1. AGRIVAR personnel has not downloaded version 3.0.1. and were not aware of its existence. The use of version V.2.0.1 reported a value of 675.28 t CO2 e/ton of product for CPO and for PK. Consequently there is no calculation from N2O emissions from compound fertilizers neither an option to specify that POME is diverted to composting. Additionally, several errors were detected on the data entered to the V.2.0.1. version as a reported production area of 126055 ha when in reality is was of 7413 ha. Unproper use of dots alter values through the different eyelashes.

Effluents analysis

There are analysis results of mill effluents (analysis N. 458.17) dated march 16, 2017 performed by Laboratories ENVAL. See indicator 4.4.3

The plan for reduction of GHG includes measures as protection and improvement of HCV zones, preserve the primary forest, no use of fire for the preparation of land, compensation for the land that was converted without a previous HCV study, reduction in the amount of pesticides used (not applicable for BIOPALM), efficient use of fertilizers, efficient use of fuel son plantations efficient waste management plan on plantations, efficient use of energy, efficient treatment of waste waters, efficient waste management plan for the mill, efficient management plan for gaseous emissions. The matrix contains 11 columns including objective, responsable person, means, date of revisión and others.

Principle 6: Responsible consideration of employees and of individuals and communities affected by growers and mills.

Criterion 6.1: Aspects of plantation and mill management that have social impacts are identified in a participatory way, and plans to mitigate the negative impacts and promote the positive ones are made, implemented and monitored, to demonstrate continuous improvement

Summary of the findings for 6.1:

The general social impact study on the activities
of AGRIVAR was prepared 10/07/2016 by the
administrative staff of the company. A report
has been produced and the minutes and
attendance list of the people and workers
associated with this study are available.

Findings:

The SIA evaluation allowed stakeholders to express their views. The workers were consulted and for the Samo community an interview with a community representative who confirmed that the evaluation was done in a participatory manner.

Plans developed to minimize impacts were consulted/socialized with relevant stakeholders.

The plan review is under the responsibility du Chef de Service QHSE (CSQHSE) on a biannual basis

are recorded in a "complaint and claims

The plan *Gestion des Aspects et Impacts*Sociaux code PL 8.1 01, version 1 dated july 10 th. 2016 developed by CS QHSE Hermann Brou and signed by the general director of the mill with the objective of organizing the mitigation measures for the social impacts that includes the mill and the supply base plantation. There is a matrix that includes 4 columns: negative impacts, activities, mitigation measures, responsible, cronogram (considering 2016, 2017 and 2018) and cost.

Compliance YES

Criterion 6.2: There are open and transparent methods for communication and consultation between growers and/or mills, local communities and other affected or interested parties

Summary of the findings for 6.2:

Compliance Findings: Comments: A consultation and communication procedure There is a list of stakeholders presented YES for interested parties has been in place since during the audit. They are contacted when it the certification process began. is appropriate to do so. Furthermore, stakeholders communicate directly to the The person in charge of the transparent AGRIVAR RSPO responsible when needed. communication with the stakeholders is the Correspondances are kept as records and head of Hygiene Safety and Environment shown during audit. NON COMPLIANCE 003/2017

There is no a list of service providers and consequently there is not a list of requirements for AGRIVAR service providers to comply. Agrivar does not evaluate compliance with labour law of its service providers and there is no monitoring of compliance with law. Service providers workers were found working at AGRIVAR earning less than the monthly

All employees in the mill and subcontractor workers in site can easily access to water supply when needed and they can choose between iced or lukewarm water. Many water suppliers (faucets) are installed by the company around the mill to provide water freely to workers.

Comments:

2 days a week, a doctor contracted by AGRIVAR goes to AGRIVAR Medical Center located at the mill to handle and/or heal workers diseases. First aid kits are available on site. Six (06) first aids workers are trained to handle on site the emergency situation, working in all sectors: laboratory assistants, storer, security responsible, paramedical assistant. Above these conditions, every employee has an insurance medical card, allowing them to access medical facilities with their family.

On most of the visited farms, the grower

NO / YES

minimum wage established by law and working extra hours for the same fixed salary which is less than the legal minimum wage.

NON CONFORMITY 004/2017

Even though the company makes sensitizations for workers' rights, dated 10/03/2017, 16/03/2017, 18/03/2017 and 22/03/2017 (Only the attendance list drawn up) most workers interviewed do not have a clear and precise idea about the management and function issues related to overtime payments, declarations to the National Social Security Fund, insurance, etc.

For the management of working hours AGRIVAR has, according to the law, a maximum of 44 hours per week. However, given the activity that is seasonal, the company has applied to the Ministry of Employment and social Protection on a letter dated April 26th. 2016, to make hours of equivalence. It has therefore increased to 48 hours per week with the collaboration of the workers. A document evidencing a meeting with the responsible for production was presented by AGRIVAR attaching a record of assistance with 17 signatures. The reply to the letter sent on by the Ministry gave a favourable opinion but the mail is clear on the fact that AGRIVAR company should define, together with the workers, through an agreement, the specific period over which the derogation will extend, fact that has not been done. Note: The non conformity appears as assigned to indicator 2.1.1 in the closing meeting log but due to additional information provided at the closing meeting, the non conformity was reassigned to indicator 6.5.2. The issue is related with non clear terms for workers regarding the conditions of the number of hours per week and extra hours payment.

The company offers one meal a day to all workers according to the shift. \mid

works the land together with his family members and there is interchangeable work with brothers, cousins and uncles.

Criterion 6.6: The employer respects the right of all personnel to form and join trade unions of their choice and to bargain collectively. Where the right to freedom of association and collective bargaining are restricted under law, the employer facilitates parallel means of independent and free association and bargaining for all such personnel

Summary of the findings for 6.6:

Compliance Findings: Comments: YES Declarations on freedom of association are moment the workers published and are understood by all employees. representatives are the ones who defend workers interest. The AGRIVAR Human Rights Respect Policy, it is written on section 4.2. "Dispositions particulières, Travail", subtitle "Promotion dans la liberté d'association": "AGRIVAR soutient la liberté d'association et la reconnaissance effective du droit à la négociation collective. Nous travaillons également avec nos sous-traitants et nos fournisseurs pour promouvoir l'application de ce principe". Minutes of meetings between the company and the workers' representatives are documented and accessible.

Criterion 6.7: Children are not employed or exploited. Work by children is acceptable on family farms, under adult supervision, and when not interfering with education

programmes. Children are not exposed	to hazardous working conditions.	
Summary of the findings for 6.7:		
Findings:	Comments:	Compliance
The minimum working age for workers is 18 years. All employees engaged by the Company have more than the national minimum age (18 years).	At the entrance of the mill there is a Note De Service (communication) dated october 24, 2016, OBJET: INSTRUCTION CONCERNANT LE TRAVAILLE DES ENFANTS. The note communicates to all service and FFB providers the Cote De Ivoire law regarding the worst	YES]
The ages of the workers are documented	forms of child labour, indicating that child labour is prohibited and listing a series of tasks, also indicating that violation of such prohibition will have the consequence of expulsion from the RSPO certified group	
Criterion 6.8: Any form of discriminatio		religion,
disability, gender, sexual orientation, u prohibited.		
Summary of the findings for 6.8:	_	
Findings:	Comments:	Compliance
A labor policy communicates the commitment of management to work for equal opportunities for all people wishing to join the company. This policy is displayed at the mill walls and communication board. No form of discrimination was observed or evidenced neither during the mill viist nor during the farmers interviews. From interviewed made with the HR representatives, the recruitment selection, hiring and promotion are based on capabilities and qualities Annual medical check-up are done at the AGRIVAL medical office to evaluate fitmess for tasks.	The AGRIVAR procedures for Human Rights PO 6.12.01 and the Ethical Code of Conduct and Integrity PO 1.3.01 deal this matter. Indeed, on Policy PO 1 .30.1 issued on 21/01/2016 regarding the Engagement ethic conduct code and integrity, title "Milieu de travail", subtitle "Pratiques en matière d'emploi", it is clearly written that "AGRIVAR traite tous ses employés avec équité, éthique, respect et dignité. La Société offre des chances égales d'emploi à tous, sans distinction fondée sur l'âge, le sexe, l'orientation sexuelle, l'invalidité, la race, la religion, la citoyenneté, l'état matrimonial, la situation de famille, le pays d'origine, ou quelque autre facteur que ce soit, conformément aux lois et aux règlements nationaux en vigueur et à la convention des nations unies pour la lutte contre la corruption (New York 2004)". Fair recruitment and promotion is testified by the interviewed personnel. AGRIVAR evaluates continuously its personnel competencies. Records of trainings are available on every workers folder in order to allow the HR responsible and the Service in need to identify the right person	YES
Criterion 6.9: A policy to prevent sexua	(promotion). I harassment and all other forms of viole	ence
against women and to protect their rep		
Summary of the findings for 6.9:		
Findings:	Comments:	Compliance
A policy prohibits all forms of sexual harassment and other forms of violence. The policy is available and communicated to all levels of the worforce. Non conformity 005/2017	Through interviews, workers manifested that there is no sexual harassment at the mill. Furthermore, the mill has a procedure preventing sexual harassment, violence against women: PO 6.12.01" RESPECT DES DROITS DE L'HOMME"=Respect of Human Rights For proof it is written on PO 6.12.01	YES / NO
The grievance and grievance mechanism does not respect anonymity and does not protect complainants. In fact, during interviews with mill employees it was evidenced a feeling of fear on workers when certain sensitive subjects were asked. They asked the auditor not to mention their names in any way in the report at the risk of reprisals. There is no evidence that the plan for receiving and monitoring employee complaints is effective	Rights. For proof, it is written on PO 6.12.01 text on title "Elimination du harcèlement et de la violence: "AGRIVAR s'engage à promouvoir un environnement de travail libre de toute forme de harcèlement, d'exploitation, d'abus ou de violence, tels que définis par la législation applicable"	vo and

Eventhough there are no new plantings projected for the near future, AGRIVAR has developed studies to comply with the new planting requirements according to RSPO.

The supply base is composed by growers owning from 1 to 12 ha.

Principle 8: Commitment to continual improvement in key areas of activity.

Criterion 8.1: Growers and millers regularly monitor and review their activities and develop and implement action plans that allow demonstrable continual improvement in key operations

Summary of the findings for 8.1:

There is a continual improvement plan (Plan Amereiolation Continue) code PL 8.1 01, version date august 1, 2016, written by Hermann Brou CS QHSE. The plan contains 5 columns: objectifs, cibles, indicateurs de measures, suivi, and schedule that contains 5 years from 2016 to 2020. The plan includes the following aspects: reduction in the use of pesticides, environmental impacts, waste reduction, pollution and greenhouse gas emissions, social impacts, optimization of the yield in the supply base, optimization of the OER, reduction on the number of non conformities in the supply base growers, reduction of health and safety risk at the work place.

Findings:

Comments: 2017:

Reduction in the use of pesticides

AGRIVAR has excludes 3 of 4 cooperatives of oil palm producers from its supply base. The cooperatives excluded from the certification scope are all confirmed by conventional growers (COOPLATO; COOPHA ADJOUAN and COOPHAM). The only cooperative that remains as a FFB supplier is BIOPALM which is organic certified, reducing the use of agrochemicals on farms to ZERO within the supply base.

Waste reduction

AGRIVAR has started the production of organic fertilizers to sell at a convenient price to its growers (mainly BIOPALM) . The organic fertilizer is done using the POME, EFB, cacao shells, cola shells, and chicken manure.

GHG

Eventhough AGRIVAR has made efforts to analyse gaseous emissions in march 2017, there is still a parameter out of the permitted limits CO) with a % above, but it does not diminish the company efforts to diminish the gaseous emissions. The mill, at the time of the audit (april 4 th. to 7 th., 2017), was installing the new boiler.

Social impacts

Optimizing the yield of the supply base. In that way, AGRIVAR is providing the opportunity to growers to use fertilizers on their crops with the intention to increase FFB yield. The Fertilizer for the supply base is given and the price deducted littlke by little from the price of

	received fruit. Related with the above is an expected impact on the growers throught the optimization of production. Additionally there is a proyect to provide better genetic material to Bthe supply base growers for replanting when time come.	
RSPO Supply Chain Certification		
Supply Chain Module	D - Identity Preserved / E - Mass Balance	
Findings: Description	Comments:	Compliance
Only BIOPALM, an already organic and RSPO certified cooperative of oil palm growers will be considered to provide RSPO certified FFB to AGRIVAR. Biopalm BIO fruits are the ones that will be processes separate on time to produce certified RSPO and organic CPO and PK.	The certified FFB entering the mill will be processed separated on time and not mixed with non certified FFB. The certified supply base for the mill at the time of the audit is conformed by a group of 118 growers members of Biopalm Cooperative. At the scale (entrance of the mill) the source of FFB is identified and the certification status verified. There is control of the quantity of CPO and PK produced every day, which is then summarized on a weekly and monthly basis. The estimated tonnage for the next 12 months is of CPO= 925,49 tons PK = 485,40 tons Coming from 4.045,00 tons of RSPO certified FFB coming into the mill from 118 growers members of Biopalm cooperative. The production for the past 12 months at the mill was of: 336,78 tons of CPO IP 291,55 tons of CPO MB	YES
	176,63 tons IP 152,91 tons MB	
Documented Procedures	<u> </u>	
There are documented procedures and formats to ensure the correct implementation of the supply chain model. There is the procedure Gestion de la Tracabilité, PR 8.1 10, N. VERSION 5, DATE 30/01/2017 that contains 26 pages and explains the chain of custody and separation of RSPO certified fruit from the farm to the mill and through the process. This new procedure considers the IP production only as the mill will switch from MB to IP as soon as the ASA 2 report is finished. Arthur Amani is the responsible person for the implementation of the RSPO standards in the	There are documented procedures in place, which explains what type of information has to be reviewed and registered at the FFB reception points. The mill receives RSPO certified FFB as well as NON RESPO certified FFB, but they are stored separately and processed separated in time.	YES
AGRIVAR mill. He demonstrated knowledge of the procedures to be followed.		
Purchasing and goods in		
The company buys certified and non certified FFB. For the production of RSPO – BIO CPO the delivery of certified FFB to the mill will be programmed every 3 weeks. Overproduction has not occurred yet and as	The scale operators records the origin of FFB , which comes accompanied to the mill by a slip indicating the grower and amount of fruit. At the scale there is a printed list of the BIOPALM Cooperative growers which at the moment of the audit were already considered the only RSPO certified growers.	YES

the agronomical practices are very simple, the average production of FFB /ha/year is of 10 tons.	There is a daily report generated at the scale, indicating the amount of FFB going in and the amount per grower.	
	The arrival of FFB from Biopalm cooperative growers is expected every three weeks.	
Record keeping		
There are daily records of FFB received and processed. Updated sales records (CPO and PK) available. The totality of the RSPO certified production is sold to three different customers.	There is a daily control on the quantity of FFB received and products produced at the mill. Every month a production balance report is generated and it contemplates the amount of RSPO certified and non certified FFB received and RSPO certified and non certified CPO and PK produced and sold.	YES
AGRIVAR reports all of its transactions in Palm Trace. A printed summary was presented to the auditor were 50 transactions are showed with SHIPPING /BL dates from 2012 to December 25 th. 2016.		
For the audited period there are 12 transactions reported from 23/05/2016 to 25/12/2016 (some of them cancelled by resubmission).		
Processing		
Procedure Gestion de la Tracabilité, PR 8.1 10, N. VERSION 5, DATE 30/01/2017 that contains 26 pages and explains the chain of custody and separation of RSPO certified fruit from the farm to the mill and through the process. This new procedure considers the IP production only as the mill will switch from MB to IP as soon as the ASA 2 report is finished.	The procedure comprises 5 modules: : Reception of FFB Trituration / production of oil Storage of oil Packaging and labeling Hygine and maintenance of infrastructure The RSPO / BIO oil is going to be processes separate in time. As the FFB are organic and RSPO certified, there is strict separation on time for the process of conventional and certified oil due that the line should be clean prior to start the organic process in order to comply with organic certification. In that way, no risk to the integrity of certified RSPO oil is expected during process.	YES
RSPO Rules on Market Communication	is and Claims	
Claims & Trademark use There is no trademark use observed at any place neither at the mill neither at the growers farms. Bills identify products as Organic Crude Palm Oil RSPO MB which will be RSPO IP after the finishing of the present audit report but no RSPO trademark is in use.	Current bills Désignation : Crde Palm Oil Bio/RSPO MB. Future bills Désignation will claim RSPO IP instead of RSPO MB.	YES]

4.2 Non conformity registers.

This section gives an over view of new or revised non-conformities raised during this assessment and of action taken to close out non-conformities raised during the previous assessments.

Major non-conformities raised during a main assessment will prevent the certification body from making a positive certification decision for the concerned units/products.

The NC number is comprised of 2 parts to include the year in which the NC is raised as well as a sequential number.

4.2.1 Verification of previous	assessment non-compliances
Non-compliance	002/2016
Date raised	4/05/2016

D4 - 1	NA:	•.	
Major or Minor	Minor upgraded to	•	
Reference of standard	2.1.3 Eventhough the procedure PR 2.1.01 IDENTIFICATION DES EXIGENCES LEGALES ET AUTRES ET D'EVALUATION DE LA CONFORMITES REGLEMENTAIRE (20/10/2015) in section 5.4 established the conduction of a yearly internal audit to evaluate compliance with applicable law, the last internal audit was conducted in 2013. Verification audit October 2016: AGRIVAR has not worked on this yet due that it is a minor non conformity and the focus was to worked on major non conformities to be prepared for the verification audit.		
	Full	July 14 th. 2017	
		Agrivar performed an internal audit on april 17 th. 2017, focused on the human resources procedures and compliance of labour law. The audit found several improvement opportunities and presented recommended actions to improve the work environment. On the positive side, the audit found that all of AGRIVAR salaries complies with national labour law. The non conformity is closed.	
Correction at this audit	Partial	ASA 2 audit / april 2017. AGRIVAR has performed an internal audit AUDIT ENVIRONMENTAL REGLEMENTAIRE (AGRIVAR USINE) dated Decembre 2016. The auditor is Hermann Brou who is in charge of AGRIVAR S.A. Implementation of standards for certification. The document contains 30 pages and at page 22 there is a table that explains the non conformities found and the corrective actions to needed. Eventhough an audit was performed in December 2016, it is restricted to environmental aspects and does not cover in full labour law related aspects.	
	Not Corrected		

4.2.1 Verification of pre-	ation of previous assessment non-compliances			
Non-compliance	003/2016			
Date raised	4/05/2016			
Major or Minor	Minor upgraded to	najor		
Reference of standard	2.2.2 Neither the mill neither the cooperatives have available maps or croquis for each grower individual property. There is no georeferencial data regarding each individual farm. Verification audit October 2016: AGRIVAR has not worked on this yet due that it is a minor non conformity and the focus was to worked on major non conformities to be prepared for the verification audit. Eventhough it was observed that Biopalm and Coopham has croquis of their growers properties but Cooplato still do not have any croquis neither any idea if properties have or not have water courses.			
Correction at this audit	Full July 14 th. 2017. Agrivar has presented a plan, sind by the general director, Mr. A.K. Namien, and presented to the president of the BIOPALM administrative consequence april 26 th. 2017, indicating its compromise that 50 the growers farms delivering certified fruit to AGR will be georeferentiated in 2017 and the other 50 farms will be georeferentiated in 2018. In may 2 AGRIVAR has send the lead auditor a list of BIOF growers with already 69 georeferentiated farms. The conformity is closed due that the process georeferentiation demands economic, human resonant time and AGRIVAR is already advancing with number of georeferentiated farms. Partial ASA 2 audit / april 5 th. 2017. 5/04/2017			

Not Corrected	above, only	/ 19 of	118 farms l	has been g	eoreferentiate	ed.

Reference of standard	conducted since	verify the implementation of procedures have not been 2013 and important procedures such as segregation of d and non-certified fruit are not being implemented.		
Correction at this audit	Full	July 14 th. 2017. AGRIVAR presented a list of approved service providers after consultance to the committee of agreemen, The list of approved service providers is dated 13/05/2017 and the document code is 6.5 03-2. There is a letter sent to all service providers dated april 14 th. 2017 indicating the service providers the conformation of an agreement committee and the persons that will conform the committee as well as the requirements for service providers that AGRIVAR has established, including the declaration to CNPS and tax registry On letters dated april 12, the AGRIVAR director communicates to each member of the agreements committee whicha are his/her responsabilities regarding the selection and maintenance of service providers. Additionally, letters of compromise of service providers were presented where selected service providers commits to comply with a series of environmental and social requirements including compliance of labour which are described in detail. Letters from THERMEA, ATR (Manutention, transport, traveaux publics) and OSI were presented. Of particular interest is the letter of OSI, dated may 10 th. 2017, due that is the employer that was found paying less than the minimum wage to the security guards working at the mill. OSI commits to strictly comply with labour laws and regulations regarding workers wrights. On an AGRIVAR action plan dated april 2017 there is the immediate action of hiring only service providers that fully complies with labour law and workers wrights and will monitor the service providers compliance. The internal audit checklist for farms was improved and social and labour issues were included. The non conformity is closed.		
	Partial			
	Not Corrected	ASA 2 audit / april 7 th. 2017. Eventhough AGRIVAR has performed an internal audit restricted to environmental aspects "AUDIT ENVIRONMENTAL REGLEMENTAIRE (AGRIVAR USINE) "dated Decembre 2016 there have been no audits performed to evaluate the implementation of procedures to comply with the RSPO standard and labour legislation. Missing procedures are the following: -AGRIVAR does not have a procedure to evaluate service providers regarding compliance with RSPO requirements / national laws, there is a lack of approved service providers, therefore there is no a list of approved service providers.		

	-The farm / growers Internal inspection audit formats does not evaluate all RSPO principles as it is focus only on agronomical and environmental aspects. -The internal inspections have not been performed according to the procedure. Some of the visited farms (files reviewed) has not been subject of an internal audit during the last 12 months. -AGRIVAR S.A. has not a procedure in place to estimate the age of planted palms and to ensure that the RSPO requirements are followed during new plantings.
--	---

4.2.2 New non-compliances	raised at this audit		
NC number	008/2016		
Date raised	3/05/2016		
Major or Minor	Minor		
Reference of standard	4.2.1		
Standard requirement	There shall be evidence that good agriculture practices, as contained in Standard Operating Procedures (SOPs), are followed		
Evidence of non-compliance	AGRIVAR has not established procedures for the production of oil palm FFE on its supply base including procedures for Good Agricultural Practices and soil fertility management and relies on the cooperatives to address all agricultural practices issues. The cooperatives use the FIRCA manual for oil palm growers (Fonds Interprofessionnel pour la Recherche et le Conseit Agricoles) for the management of oil palm, however, this manual was made thinking on all the oil palm growers in the country and does not contemplate the RSPO standard as a reference.		
Date of closing:	April 7 th. 2017. A written procedure has been developped and implement by AGRIVAR for both palm oil processing and field activities. The field activities procedure is called <i>Conduite des Activités de Plantation</i> identified as document PR 4.2.01. Version 01 prepared by Mr Hermann Brou (RQHSE) rewiesed by Mr Guy Roger ABOUA (Chef d'Exploitation COOPHAM) and approved by Mr Athanase Niamien (AGRIVAR Managing Director). Date: 09/06/2016. The document consist of 58 pages and contains: objective, scope, terms and definitions, responsibilities and contentes (section 5). It is importante to notice that the procedure was written with the objective to reach compliance with the RSPO standards and in section and covers soil management.		

4.2.3 New non-compliances	raised at this audit		
NC number	009/2016		
Date raised	3/05/2016		
Major or Minor	Minor		
Reference of standard	4.2.2		
Standard requirement	Records of fertiliser inputs shall be maintained.		
Evidence of non-compliance	On the majority of farms visited there are no records of fertilizers application eventhough there is use of fertilizers on many of them.		
Date of closing:	April 7 th. 2017. The fertilizers application records are available at the Biopalm growers evaluation sheets. A list of 18 Biopalm members received organic fertilizer and the list was presented at AGRIVAR. Due that Biopalm Cooperative is organic certified, there is no use of synthetic fertilizers. The growers plant legume species called "Pueraria" as green fertilizers to help with nitrogen fixation and leave the palm leaves along the field to increase the layer of soil organic matter.

4.2.7 Verification of previous assessment non-compliances		
Non-compliance	033/2016	
Date raised	5/05/2016	
Major or Minor	Minor	
Reference of standard	5.2.4: Where a management plan has been created there shall be ongoing monitoring: • The status of HCV and RTE species that are affected by plantation or mill operations shall be documented and reported; • Outcomes of monitoring shall be fed back into the management plan.	
Correction at this audit	Full	ASA 2 audit / april 5 th. 2017. Due that the engangered species "Pangolin" was identified as an endangered species present in the area of operation just at the verification audit performed in October 2016, AGRIVAR is in the stage of sensitization regarding the importance of endangered species. Evidence of activities related with the issue includes several posters seen at the BIOPALM cooperative office and AGRIVAR office and training records as follows: 21/03/2017; Instruction concernant I interdiction de chaser les especes menaceés de disparition, durée: 30 minutes, 35 mill workers, on march 27, 2017 another training cover 21 workers. On march 23 rd. 2017 a training was delivered to growers but only 5 growers has attended. The non conformity was closed due that AGRIVAR S.A. is taking actions to follow the plan that starts with sensitization and information regarding the endangered species identified on the area for later to continue to monitor the status of this endangered species.
	Partial

4.2.8 Verification of previous assessment non-compliances			
Non-compliance	034/2016		
Date raised	5/05/2016		
Major or Minor	Minor and upgrad	ed to major	
Reference of standard	been identified, th	5.2.5 : Where HCV set-asides with existing rights of local communities have been identified, there shall be evidence of a negotiated agreement that optimally safeguards both the HCVs and these rights.	
	Full	July 14 th., 2017 To address this non-conformity, AGRIVAR personnel have delivered training to growers and AGRIVAR and BIOPALM personnel to address HVC issues in general and in particular the protection of shallows and rivers that may exist in the vicinity of oil palm plantations, medicinal trees and a focal species in danger: pangolin. Example of training record: Trainings dated april 25 th. 2017, trainer: BRou Hermann, Duration: 4 hours, Topic: Gestion de HVCs (Pangolin, Bass fonds, Medicinal plants), RSPO requirements regarding HVC. The training records has the name of participants, position, contact details and signature. The training was delivered to AGRIVAR and BIOPALM personnel, including technical assistants and also to growers in the localities of Aghien and Grand Alépé. The power Point presentation used during the trainings was presented (32 pages).	
Correction at this audit	Partial	ASA 2 audit / april 5 th. 2017. Due that growers are the native people leaving in the area since past generations, It is considered that no negotiated agreements is needed. Eventhough, AGRIVAR S.A. has written a Plan de PROTECTION DES ZONES A HAUTE VALEUR DE CONSERVATION (01/10/2016) that include Protection des bas-fonds voisins des palmeraies (HVC 4 et 5), Conservation des arbres des limites de plantation, Protection du pangolín, Suivi de la perception du Pangolin, Protection des cours d'eau voisins. There is evidence of the sensitization activities been performed as seen on criteria 4.2.8. Despite the above, the sensitization has covered only the protection of pangolin but not other topics related with HCV as conservation of trees on plantation limits (des arbres on limit de plantation) and protection of water courses (cours d eau voisins). Due to the above, the non conformity is left open and raised to major non conformity.

	Full July 14 th.2017	
Correction at this audit		AGRIVAR personnel has already displayed brochurs and
		Notes de Service regarding the prohibition to burn the

	land, directed to BIOPALM growers associations at different localities and that fact was evidenced during the april 2017 RSPO ASA 2 audit. Due that the exposition of materials has been broad, and Agrivar has also delivered trainings regarding RSPO requirements in general but also specifically about the interdiction de bruller (prohibition to burn land), Agrivar personnel considers that they can continue reinforcing the topic during every training to be delivered, and of corse, reinforced the issue during internal audits to be performed at farms. The non conformity is considered closed.
Partial	ASA 2 audit / april, 2017. Several posters and announcements has been seen displayed at AGRIVAR mill and at the BIOPALM Cooperative office located in Bonoua regarding the Interdiction de Bruler Dans les Activites en Plantation making reference to the law n. 96-766 du October 3 1996 and to the RSPO standard. On two of three areas visited during the present audit, farmers were well aware about the interdiction de bruller, but on a third area visited, the growers manifested that burning is the only way to clean the property and that they have burned the property during the replanting activities that has taken place on 2016 and mentioned that some replanting will take place in 2017. The non conformity is left open and raised to major due that certified growers burned land for replanting in 2016 and mentioned will do replantation in 2017.

Date raised	During the audit
Major or Minor	Major
Reference of standard	6.5.1
Standard requirement	Documentation of pay and conditions shall be available.

Evidence of non-compliance	ASA 2 audit / april 4 th., 2017.
Evidence of non-compliance	
	Agrivar does not evaluate compliance of its service providers with labour law. Service providers workers were found working at AGRIVAR earning less than
	the monthly minimum wage established by law.
	July 14 th. 2017.
	July 17 (II. 2017.
	AGRIVAR presented a list of approved service providers after consultance to
	the committee of agreemen, The list of approved service providers is dated
	13/05/2017 and the document code is 6.5 03-2. There is a letter sent to all
	service providers dated april 14 th. 2017 indicating the service providers the
	conformation of an agreement committee and the persons that will conform
	the committee as well as the requirements for service providers that AGRIVAR has established, including the declaration to CNPS and tax registry
	On letters dated april 12, the AGRIVAR director communicates to each
	member of the agreements committee whicha are his/her responsabilities
	regarding the selection and maintenance of service providers. Additionally,
	letters of compromise of service providers were presented where selected
Date of closing:	service providers commits to comply with a series of environmental and
_	social requirements including compliance of labour which are described in
	detail. Letters from THERMEA, ATR (Manutention, transport, traveaux publics) and OSI were presented. Of particular interest is the letter of
	OSI, dated may 10 th. 2017, due that is the employer that was found
	paying less than the minimum wage to the security guards working
	at the mill. OSI commits to strictly comply with labour laws and
	regulations regarding workers wrights.
	On an AGRIVAR action plan dated april 2017 there is the immediate action of
	hiring only service providers that fully complies with labour law and workers
	wrights and will monitor the service providers compliance. The non
	conformity is closed.
4.2.7 New non-compliances	
NC number Date raised	004 / 2017
Major or Minor	07/04/2017 Major
Reference of standard	6.5.2
Neichenee of Standard	
	payments and conditions of employment (e.g. working hours, deductions,
Standard requirement	overtime, sickness, holiday entitlement, maternity leave, reasons for
Standard requirement	dismissal, period of notice, etc.) shall be available in the languages
	10/03/2017, 16/03/2017, 18/03/2017 and 22/03/2017 (Only the attendance
	list drawn up) most workers interviewed do not have a clear and precise idea
	about the management and function issues related to overtime payments, declarations to the National Social Security Fund, insurance, etc.
	For the management of working hours the company AGRIVAR has according
	to the law of labor right to make work to a maximum of 44 hours per week.
	However, given the activity that is seasonal, the company has applied to the
	Ministry of Employment and social Protection on a letter dated april 26 ,
Evidence of non-compliance	2016, to make hours of equivalence. It has therefore increased to 48 hours per week, with the collaboration of the workers. A document evidencing a
Evidence of non-compliance	meeting with the responsibles for production was presented by AGRIVAR
	attaching a record of assistance with 17 signatures. The reply to the letter
	sent on by the Ministry gave a favorable opinion but the mail is clear on the
	fact that AGRIVAR company should define with the workers, through an
	agreement, the specific period over which the derogation will extend, fact
	that has not been done in the evaluation.
Standard requirement	Labour laws, union agreements or direct contracts of employment detailing payments and conditions of employment (e.g. working hours, deductions, overtime, sickness, holiday entitlement, maternity leave, reasons for dismissal, period of notice, etc.) shall be available in the languages understood by the workers or explained carefully to them by a management official. Eventhough the company makes sensitizations for workers' rights, date 10/03/2017, 16/03/2017, 18/03/2017 and 22/03/2017 (Only the attendance list drawn up) most workers interviewed do not have a clear and precise idea.

	related with non clear terms for workers regarding the conditions of the
	number of hours per week and extra hours payment.
Date of closing:	July 14 th. 2017. In order to address this non-conformity, AGRIVAR carried out sensitization / and training to the company's staff to address labor law issues, and in particular questions relating to hours of work, overtime, rights and duties of employees and insurance matters. Several training records were presented which includes the name of the trainer, the date, duration, content of formation, name pf participants, position, contact details and signature of attendees. Example: 03/05/2017; Facilitator: Nintin Alexandre, content of formation: extra hours, Absences and disciplinary measures. Training was delivered may 3 and 5, 2017. 102 persons attended the training. AGRIVAR has also provided evidence of existing procedures in the human resources area as: tracking of time worked, absences and disciplinary sanctions. Additionally, Agrivar performed an internal audit on april 17 th. 2017, focused on the human resources procedures and compliance of labour law. The audit found several improvement opportunities and presented recommended actions to improve the work environment. On the positive side, the audit found that all of AGRIVAR salaries complies with national labour law. A letter from the Ministere de Emploi et de la Protection Sociale, dated may 18 th, 2017, approving the equivalence of hours for the year 2017. The non conformity is closed.
