3.2 Year expected to/or started to use any RSPO-certified sustainable palm oil and oil palm products in your own brand products
2009
3.2.1 If target has not been met, please explain why.
Our internal policy allows only RSPO certified crude Palm oil or any Palm derivatives. Therefore this is a requirement to our suppliers to have RSPO certification for their raw materials.
3.3 Year expected to be using 100% RSPO-certified sustainable palm oil and oil palm products from any supply chain option in your own brand products.
2025
2023
3.3.1 If target has not been met, please explain why.
For our natural and organic cosmetic products we have achieved 100% RSPO certified raw materials. Anyhow, for our pharmaceutical products this is still a challenge. Pharmaceutical raw materials (based on palm derivatives or fractions) are still not offered in certified quality on the market. Our approach is, to compensate these volumes with independent smallholder certificates.
3.4 Year expected to be using 100% RSPO-certified sustainable palm oil and oil palm products from physical supply chains (Identity Preserved, Segregated and/or Mass Balance) in your own brand products.
2025
3.4.1 If target has not been met, please explain why.
See comment above
3.4.2 Which markets do these commitments cover?
Germany , Switzerland
3.5 Does your company use RSPO-certified sustainable palm oil and oil palm products in goods you manufacture on behalf of other companies?
No
3.6 Does your company have a Time-Bound Plan to only use RSPO-certified sustainable palm oil and oil palm products in the goods you manufacture on behalf of other companies?
Yes
3.7 When do you expect all products you manufacture to only contain RSPO-certified sustainable palm oil and oil palm products?
2025
