Time-Bound Plan

4.1 Year of first RSPO estate certification (planned or achieved)

2011

Comment:

We have been committed to the RSPO program since 2010. In 2011, we joined the RSPO as a regular member. In December 2011, we certified our plant and its supply base. In 2015 we took over the certification of our activity with a new certification body following the loss of the accreditation of the previous certification body.

4.2 Year expected to achieve 100% RSPO certification of estates

2020

Comment:

AGRIVAR is an independent oil mill that does not have its own plantations. For the purposes of palm oil production, we have agreed with small oil palm producers assembled in cooperatives that we have organized to engage in the process of sustainable production of palm oil, Local interpretation of palm oil.

As we contract with new small producers, we put them in our supply base for RSPO certification.

At the same time, Côte d'Ivoire, through an NGO called Solidaridad, has obtained an aid fund from the RSPO to accompany 5000 small producers to the RSPO until 2020. we take an active part in the implementation Of this project whose results would be very beneficial for our RSPO approach.

Actions for Next Reporting Period

7.1 Outline actions that you will take in the coming year to advance your plans for certification

We have agreed with the NGO Solidaridad Côte d'Ivoire to take a very active part in organizing 5000 small independent producers to the RSPO certification. Of course, this project will target small producers in our area of activity and will provide sufficient certified products for our independent palm oil mill which to date is the only oil palm oil mill that has the RSPO certificate. In another time, we sensitize other producers to engage in the RSPO approach with us to eventually have a sufficient supply base that will ensure that all the FFBs that enter our oil mill are certified RSPO.

7.2 Outline actions that you will take to promote CSPO along the supply chain

Through our dual RSPO and organic certification (EU and NOP), we offer sustainable and quality palm oil to all of our customers. We work to find customers both in Europe and in Africa with whom we exchange certified palm oil RSPO BIO. We are continuing to promote palm oil certified RSPO in different markets to acquire new customers and eventually to sell only palm oil certified RSPO.

AGRIVAR is an independent oil mill that does not have its own plantations. For the purposes of palm oil production, we have agreed with small oil palm producers assembled in cooperatives that we have organized to engage in the process of sustainable production of palm oil, Local interpretation of palm oil.
As we contract with new small producers, we put them in our supply base for RSPO certification.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

As an independent oil mill; The major challenges we face in the production of certified palm oil are undoubtedly the commitment of small independent producers to the RSPO certification program. Until the national interpretation is validated and strong actions are taken in favor of RSPO certification in our country, in which there is no market constraint to engage in this process, the choice of small Independent producers to engage in a binding approach is not the most appropriate remedy. In order to get small producers to join our certification program, we are obliged to play on the purchase price of the raw material.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As mentioned above, we have engaged small independent producers in the RSPO certification process through awareness-raising actions and assumption of responsibility for the entire certification program. In addition we support the national project piloted by the NGO Solidaridad to proceed to the certification of 5000 producers by 2020 at the technical and financial level.
