Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

As retailer we are quite far from the producer and even more far from the producer of palmoil as ingredience in a specific product. There is natrually a communcation challenge, but we plan to make more efforts to be more clear in our demand to our suppliers in coming months. Another worry we have is that alternatives (for those that turn to other alternatives and phase out Palmoil) is maybe not invetigated properly (like Shea-oil). We have plans to try to investigate this further. We also have plans to join a project with Stockholm Environmental Institute (SEI) in order to maybe be able to source palm oil from specific growers in some pilot project.

2 How would you qualify RSPO standards as compared to other parallel standards?
Cost Effective:
Yes
Robust:
Yes
Simpler to Comply to:
Yes
3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)
By for many years using Book & claim and report it on website and in our yearly sustainibility report. By communcating with our stakeholders about our commitment.
4 Other information on palm oil (sustainability reports, policies, other public information)
Yes, in our sustainibility report and our sustainibility policy & programme we communicate our work with palmoil.
