#### **Challenges**

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The high cost with the certification process. The non-recognition of benefits by consumers that makes them accept the price difference.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

The effort for dissemination and promotion is hight for small industries like ours. It is difficult to allocate human and financial resources that can be return to the market. There must be an "easy" model adjusted to this reality, where leadership is taken by larger companies.
