Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

we haven't encounted obstacles. On the other hand in France a problem appears more and more strongly to which it is not easy to face. The consumer no longer wants to consume food products containing palm oil, even it's certified palm oil.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

today, we don't communicate about using of RSPO (just a little bit on our website)
