### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Despite heterogene requirements of customers we decided to use CSPO (SG certified) palm oil products only. We informed our customers about the goals and activities of the RSPO.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As an international company with international suppliers and customers we have a close exchange regarding sustainable topics where certified palm oil is one part.
