Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

every months, every years, we have article discrediting the actions done on the plantations (ecology, animal abuse,) we can't do anything. our sales was divided by 3 from 4 years. so, we do our best

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We advise new users to become certified members, to avoid the polemics
