Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Our greatest need is certified sustainable palm kernel oil derivatives and they are not available reasonable price in market . We are trying to cover them in B&C, but the price of PKO certification in particular soars and is unstable. It is difficult for us budgeting it continuously. Such economic conditions make difficult to gain the understanding of our stakeholders.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We work hard to issue the activity of RSPO to our consumers widely.
