**3. Time-Bound Plan**

**3.1 Year of first supply chain certification (planned or achieved)**

2019

---

**3.2 Year expected to/or started to use any RSPO-certified sustainable palm oil and oil palm products in your own brand products**2030

---

**3.2.1 If target has not been met, please explain why.**

Alicorp is making progress to achieve RSPO sustainability standards, so in 2018 we conducted the process and obtained the RSPO certification for our palm oil refinery. We are committed to promote a local sustainable palm oil chain in Peru. Thus in 2018 we conducted an initial diagnosis to assess the gaps of our palm crude suppliers towards sustainability standards. This was a starting point so we are currently concentrating on working directly and in a one-on-one way with these suppliers to conduct a deep dive diagnosis of the gaps and the corresponding action plan to close them. It is also considered as part of the strategy to leverage funds to help the suppliers implement their action plans.

---

**3.3 Year expected to be using 100% RSPO-certified sustainable palm oil and oil palm products from any supply chain option in your own brand products.**2030

---

**3.3.1 If target has not been met, please explain why.**

Achieve RSPO certification for our palm crude suppliers represents a long term intervention considering the informality in which this productive sector operates and the lack of resources to invest in gaps closure. We estimate that this work could take, in the best case scenario, from 2 to 5 years of work, and in some cases up to 10 years for the implementation of gaps closure.
