### **Challenges**

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The requirements for the purchasing of the applied raw materials containing palm oil and palm kernel oil are very detailed described in the RSPO certification standard. Due to the very good cooperation with our suppliers and their presented plans for their timely conversion of raw materials containing palm oil and palm kernel oil, we have also been able to initiate schedules to switch to the corresponding RSPO SCC model Mass Balance.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

In order to provide the vision of RSPO, multiple sustainability training courses were established within the dalli-group and communication about this topic to our customers was initiated. In addition, the preparation and publication of a sustainability report for the dalli-group in 2017 is another corporate objective. Furthermore our suppliers were also motivated to become a member of the RSPO and strive for the RSPO SCC model Mass Balance.
