Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

DCS are continually working with our raw material suppliers to understand the availability and cost implications of RSPO palm and palm kernel derived raw materials. As global use of RSPO materials grows we expect that it will become easier to formulate cost effective consumer products for our customers that are RSPO

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)
