Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Many of the CSPO and CSPKO based raw materials have still a limited availability on the market and have a higher price than conventional raw materials. This means a restriction in the selection of raw material suppliers. But we are in close contact with our suppliers to get a transparent overview of the situation of the market and to get the possibility to change more of our raw materials to MB quality.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are in constant discussions with our suppliers to promote the use of CSP(K)O and make progresses in adapting more of our raw materials to MB quality. Besides we are frequently informing our customers concerning the status of CSP(K)O in their products.
