GHG Emissions**8.1 Are you currently assessing the GHG emissions from your operations?**

No

Please explain why

We have determined our air emissions on the NER (Dutch Emissions Directive). This mainly relates to volatile organic compounds and dust. For greenhouse gases (such as CO₂) emissions are not included in the NER. Given our processes, and the fact that we do not have our own transport, our CO₂ emissions will likely be minimal.

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

RSPO raw materials are more expensive than standard raw materials so it is for many customers more difficult to switch over to RSPO products. RSPO raw materials are not always available on the market.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We offer the service to our customers to use RSPO raw materials.
