Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Customers sometimes require MB or SG palm products but do not want to pay the necessary premium. This is very sad as the sustainable supply chain often stops at the big retailers already. They want sustainability but do not want to carry the financial burden sometimes.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We support the vision of RSPO as we switched our complete palm oil, palm kernel oil and palm fractions and derivatives completely to MB or SG in 2011 already. we are trying to set standards and to give other companies advice if needed.
