4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?

No

Please explain why

No current Marketing plans to use RSPO trademark.

Actions for Next Reporting Period**5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain**

1. Green's Foods Holdings will continue to write to and urge all manufacturers and distributors who supply the company with CSPO products to become RSPO members and gain RSPO SCCS certification or distributor licences in order to maintain the auditable supply chain.
2. 99.6% of all palm oil / palm oil derivatives used by the company are from CSPO. We will endeavour to get the remaining small amount of palm shortening / palm derivatives supplied as CSPO to achieve 100% CSPO. If this is not possible we will endeavour to find non palm alternatives.
3. Whilst some progress has been made in 2016 the longer term goal is to economically achieve the purchase of all palm oil and palm oil derivatives to the segregated level.
4. In late 2016 Green's was able to convert the palm shortening used in its market leading baking mixes from the mass balance to the segregated level.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

1. To date the supply of mass balance CSPO to Greens has proven economically viable. The sustainable palm oil supply chain has continued to develop driven in part by the major retailers' requirement in Australia to have CSPO only in their private label products. 2. Getting the remaining small fraction of palm oil / palm derivatives to be from CSPO continues to be difficult due to the supply chain availability compared to the equivalents from non CSPO palm. 3. Greens has economically achieved segregated status for the palm based shortening used in its market leading baking mixes. However, the step of getting all palm products used by the company to the segregated level at this stage seems to be a long way off. This is due to the overall supply chain currently not being able to supply all products to this level.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are an end product user of palm oil products and not directly involved in the palm oil production industry. Hence no additional activity.
