7.2 What best practice guidelines or information has your organization provided in the past year to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?

Comment:

no Information published

7.3 Your answers above indicate that you are not yet using 100% RSPO certified palm oil and oil palm products. Do you have plans to immediately cover the gap using Book & Claim?

Yes

When do you plan to cover the gap using Book and Claim?

2016

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

Yes

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

Yes

If we buy RSPO credits we buy credits of Independent smallholders. In 2016 we only buy small amounts because most of the Palm used (>99%) was of physical supply chain.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

A lot of derivates (Food additives and flavourings) are not available as RSPO certified. We are always in discussion with our suppliers to implement certification. In some cases we have replaced Palm products. Since the end of 2017 we receive more and more enquires from retailers to exchange Palm(kernel) oil. We are still in discussion with These retailers

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We switched >99.9% of our Palm oil to physical supply chain and have bought smallholder certificates also in 2017 for remaining volumes. We are engaged in the German Forum for Sustainable Palm oil (FONAP) and try to convince our suppliers to become a member of FONAP and RSPO and to proceed using Palm oil instead of other oil plants.
