Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Unfortunately CSPO oil has a higher price on the market. Some customers are very price sensitive and do not consider that they might have a negative impact on the environmental situation when looking for the cheapest price.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As a business we are too small and our resources are not enough to do such a supportive work.
