7.1 Related to your sourcing, do you have (a) policy/ies, that are in line with the RSPO P&C such as:

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Our main businnes is bar soap, mass consumption product, where price is the main driver. The higher cost of RSPO palm oil will leave us without the competitiveness required by the market. At Colombia and Ecuador some of RSPO principles have been fullfiled, but complete RSPO development has been limited.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We only manufacture bar soaps from 100% vegetable base soap. We encourage our clients (third customers) the use of sustainable sources for the manufacturing of their bar soaps.
