## Challenges

### 1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Some legal order processes are a bit bureaucratic, taking a long time to resolution of permits and licenses. The low availabilities of experts on the standard in the country, to validate the processes are performing. We have made use of NGOs consortium to have the right professionals to help in these processes.

---

### 2 How would you qualify RSPO standards as compared to other parallel standards?

--

---

#### Cost Effective:

Yes

---

#### Robust:

Yes

---

#### Simpler to Comply to:

No

---

### 3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Hondupalma has provided both financial and human resources in the process of implementing the standard, participating in public diffusion events, training community schools on environmental issues, and informed our customers about the progress in the process of obtaining the certificate of RSPO. There is a commitment in writing to the consortium gift manifests our participation with a counterparty that involves investments such as biogas plant, composting plant and the formation of a structure for the implementation and monitoring of progress in implementing the principles and RSPO criteria.
