#### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

there is a lot of information about rspo all the days and they are only in English, this needs a lot of time to stay updated and not to miss any important news.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We only procure sustainable palm oil, something else is out of the question
