Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

It is not so easy to promote palm oil use after all campains in countries like Italy etc. It is also dificult to follow all RSPO relevant information due to the massive emails received from RSPO.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are not so big in order to have a big influence in the market. As producer for other brands, we have to follow the requierements of our clients.
