## Challenges

### **1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

At the moment, the trend in Europe is to eliminate palm oil and derivatives from the recipes. We noticed that there is a big disinformation on the European market regarding palm oil and its effects on both environment and public health. We have a large range of certified RSPO products (MB and SG) to offer to our customers such to provide them a wide choice of opportunities to use sustainable palm ingredients/additives /semifinished products.

---

### **2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

We are cooperating with some RSPO certified Suppliers to meet the needs of Customers that are sensitive to issue involving palm oil and we are committed in the research of producers in as much business as possible on the European Market. We are also working in the disclosure of principles of RSPO for customers who are not yet aware of it.
