Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have identify that there are several potential customers that know about sustainable Palm Oil products but they prefer using traditional products because of the costs. We consider that efforts should be guided through sensitization, more RSPO events, more availability to the information and to the experts to the country.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

The company is not taking extra activities different to the previous activities mentioned.

3 File -Please attach or add links to any other information from your organisation on your policies and actions on palm oil (EG: sustainability reports, policies, other public information)
