Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

There is scarce supply of RSPO certified raw material (palm kernel) for independent palm kernel crushers to purchase, as many big name players in the industry are involved in the entire supply chain from plantation to refinery, hence kernel supply is limited. During our engagement with independent millers we have promoted RSPO to them and requested that they consider achieving RSPO certification as well to expand the supply base of RSPO certified palm kernel.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We have co-operated with our direct buyer and invited our direct suppliers to a workshop to share their progress on NDPE policies and to map out their supply base. This directly supports the objectives of RSPO by improving existing operations and providing transparency and insight into the way business is currently done.
