### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?
The most difficult is to find the better solution with many different customers need and to manage extra cost.
2 How would you qualify RSPO standards as compared to other parallel standards?
Cost Effective:
Yes
Robust:
No
Simpler to Comply to:
Yes
3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)
Some customers and French market don't want to use Palm Oil.
We think that Palm oïl is the better solution for food industry when you don't want to use butter so we think that being RSPO is the better way to support Palm Oil for our Customers.
