Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We do not get all palm derivatives we need in MB or better quality. Prices get better - so we do not have the financial drawbacks any more, that we had in the past. As we do not have any own brand, we do not actively promote CSPO in public. Our customers urge us to quit using any palm products, due to extremely negative media presentation.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We try to convince our customers to support palm.
