Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

CSPO is more expensive. We're operating in a very competitive market, so it is hard to convince our customers to pay more for that.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Convincing our raw material suppliers to offer CSPO quality.
