### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have been continuing to share the importance of RSPO to the relevant companies. We are also keep explaining that joining in the RSPO would bring a positive image to the public consumers that the company is actually paying attention to the natural environment.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As a fatty acid trader, we have been working with our suppliers, forwarding agents and customers on how we can contribute to RSPO by sharing the information of current status, knowledge and meaning of RSPO to change the markets.
