70% of total volume responsibly sourced

Traceable: Nestlé works progressively towards mapping the palm oil supply chain back to mill and plantation.

Responsibly sourced: origins of volume RSG assessed (compliant or action plan in place) or equivalent standards in this case RSPO

Actions for Next Reporting Period**6.1 Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Our primary focus is upon traceability as a first step. We envisage gradually reducing our procurement of Greenpalm certificates as we are able to deliver traceable RSG compliant palm oil.

Reasons for Non-Disclosure of Information**7.1 If you have not disclosed any of the above information, please indicate the reasons why**

Other

- Others:

Nestlé has not set a target to use 100% RSPO certified oil palm from physical supply chains (Identity Preserved, Segregated and/or Mass Balance) in its own brand products. Instead we have set targets (see Q3.7) to continuously increase the share of palm oil sourced from plantations that are compliant with the Nestlé Responsible Sourcing Guideline that require plantations to:

- be legally compliant
- Respect the Free Prior and Informed Consent of local and indigenous communities
- Respect High Conservation Values (HCVs)
- Protect peat lands
- Protect High Carbon Stock Forests
- Respect all other RSPO Principles & Criteria

We use the RSPO as a means to verify compliance of our palm oil purchases against most of our RSG requirements, all except our additional requirements on peatlands and high carbon stock forests that we verify separately with the help of our partner, The Forest Trust.

Application of Principles & Criteria for all members sectors

8.1 Related to your sourcing, do you have (a) policy/ies, that are in line with the RSPO P&C such as:

- Water, land, energy and carbon footprints
- Land Use Rights
- Ethical conduct and human rights
- Labour rights
- Stakeholder engagement

Commitments to CSPO uptake

As you don't source 100% CSPO through physical supply chains (IP/SG/MB), please answer the following questions:

Do you have plans to?

No

Nestlé has not set a target to use 100% RSPO certified oil palm from physical supply chains (Identity Preserved, Segregated and/or Mass Balance) in its own brand products. Instead we have set targets (see Q3.7) to continuously increase the share of palm oil sourced from plantations that are compliant with the Nestlé Responsible Sourcing Guidelines that require plantations to:

We use the RSPO as a means to verify compliance of our palm oil purchases against most of our RSGs, all except our additional requirements on peatlands and high carbon stock forests that we verify separately with the help of our partner, The Forest Trust.

Our actions focus on the establishment of traceable supply chains and on the systematic identification and exclusion of companies managing plantations linked to deforestation.

9.1 Do you have plans to immediately cover the gap using Book & Claim?

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We see increasing regulatory activity at a national and international level which can pose both challenges and opportunities to companies. Our consumers want to know what's in their food, where it comes from and how it has been produced. We also see ongoing civil society activity and public interest on these commodities, in some cases to substitute them.

Unsustainable practices at the supplier level create risks of short term supply disruptions and long term risks to the sustainability/availability of supplies. Equally our process of working towards more sustainable practices leads to operational challenges in finding compliant suppliers. We tackle this through supplier training and support.

2 How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

Yes

Robust:

Yes

Simpler to Comply to:

equal

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Nestlé supports the RSPO as the industry-wide instrument to promote sustainable palm oil production. We use the RSPO as a means to verify compliance of our palm oil purchases against most of the Nestlé RSGs (all requirements except the additional Nestlé criteria on peatlands and high carbon stock forests).

We have prepared and promoted a series of maps showing the locations of deforestation in the 20 most important countries where deforestation is happening. This can help all stakeholders to focus on the high risk locations. Increasing the visibility in the supply chain and promoting more sustainable practices is creating value upstream by securing the sector's own future. We are also adding value by developing and training our suppliers against our Supplier Code and RSGs and thereby enabling them to secure long-term business with Nestlé.

Downstream, our consumers want to know what's in their food, where it comes from and how it has been produced. Value is being created by building consumer confidence in the products and enhancing the company and brand reputation.
