### **Challenges**

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have encountered the risk of lack of 100% RSPO certified palmoil from physical supply chains in especially non-food products like household products and personal care products that contains palmoil derivatives or fractions. Because the market is not able to provide it due to higher demands compared to supply in the market. We are unsure how to work with the RSPO Trademark on those products. We have asked our suppliers to contact RSPO for guidance.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are reporting on progress through the Danish Retail Initiative on the area.
