Operational Profile

1.1 Please state what your main activity(ies) is/are within manufacturing
End-product manufacturer
● Food Goods
Own-brand-Manufacturer
Manufacturing on behalf of other third party brands
Operations and Certification Progress
2.1 Please include details of all operations using palm oil, majority owned and/or managed by the member and/or related entities
2.1.1 In which markets where you operate, do you manufacture goods with palm oil and oil palm products?
■ Netherlands
2.1.2 In which markets where you operate, do you calculate how much palm oil and oil palm product there is in the goods you manufacture?
■ Applies Globally
■ Netherlands
2.2 Volumes of palm oil and oil palm products (Tonnes)
2.2.1 Total volume of Crude and Refined Palm Oil used in the year (Tonnes)
3,961
2.2.2 Total volume of Crude and Refined Palm Kernel Oil used in the year (Tonnes)
2.2.3 Total volume of Palm Kernel Expeller used in the year (Tonnes)
2.2.4 Total volume of other palm-based Derivatives and Fractions used in the year (Tonnes)
1,044
2.2.5 Total volume of all palm oil and oil palm products used in the year (Tonnes)
5,005

2.3 Volume of palm oil and oil palm products used in the year in your own brand products that are RSPO-certified (in tonnes):

2 420 00
2,429.00
-
300.00
671.00
-
3,400.00

2.4 Volume of RSPO certified sustainable palm oil and oil palm products sold to other RSPO certified companies $\mathbf{0}$ (in tonnes)

	e actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and c ducts along the supply chain
years. Wit sustainab in order to customers support th especially As soon a	is that will be taken to promote sustainable palm oil will not differ a lot from what Remia has done during the past hin Remia every employee that is involved in the use of palm (as a raw material or end product) is aware of the lity issues. They know about the environmental and social criteria that the RSPO wants companies to comply to make sustainable palm oil the norm. This knowledge is essential to have discussions with our suppliers and about sustainability. The buyers of Remia's end products are well informed about the options they have to egoals of the RSPO. Remia actively promotes the use of sustainable palm oil. However, we do believe that the people who buy our products should be aware about the adverse effects of large scale palm oil productions. It is conventional palm oil (or fractions), the transformation to a more sustainable palm oil market will speed up.

3.7 Does your company have a Time-Bound Plan to only use RSPO certified palm oil and oil palm products in the goods

7.2 What best practice guidelines or information has your organization provided in the past year to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?

Comment:

Many customers of Remia have already shown interest in switching from conventional palm oil to RSPO certified palm oil. Remia stimulates this development by working closely together with the customers and facilitating the switch.

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

Yes

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

Yes, in 2022

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The RSPO certification of the supply chain models MB and SG has given Remia the option to manufacture products that contain physical sustainable palm oil, palm fractions and derivatives. Especially sourcing through the supply chain SG has become more expensive during the last year. In general we would not be surprised to see that such a price development will slow down the transition from Book & Claim to phisical sustainable palm use. Certain palm fractions and derivatives have not always been sufficiently available. A limited availability of physical sustainable palm products creates problems in times of additional use and demand. It happened more than once that SG palm products were not available when Remia had the flexibility to switch from conventional to sustainable productions.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Remia started to use the book & claim system in 2011. Since that year Greenpalm certificates (now RSPO credits) have covered all own brand productions to every sales destination in the world. Every year we see a relative increase of the palm oil and palm fractions that are sourced from physical supply chains. Regarding our Time-Bound plan we are still on schedule.

3 File -Please attach or add links to any other information from your organisation on your policies and actions on palm oil (EG: sustainability reports, policies, other public information)
