Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Procurement of RSPO certified palm oil derivatives still remains a challenge. Many supply chains just do not support the trace-ability that far up the stream unless they are directly high tier manufacturers of those derivatives. Additionally within complex chemical substances, its challenging to know exactly how much palm stearin is used as a fraction. It leads to a conservative over-estimate of palm oil derivatives being use.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Consultant and Customer field engagement on the topic of sustainable palm oil remains a commitment of Rodan + Fields.
