#### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

There is not availability of all the ingredients used in our products as physical CSPO. Furthermore, the prices of these CSPO raw materials are too high and sometimes not justified

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We will work with our suppliers and our customers to promote the use of CSPO. We will stimulate our suppliers to make RSPO certified raw materials available on the market mainly according with MB scheme
