7.3 Your answers above indicate that you are not yet using 100% RSPO certified palm oil and oil palm products. Do you have plans to immediately cover the gap using Book & Claim?

Yes

When do you plan to cover the gap using Book and Claim?

2018

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please explain why

No, we use palm oil soap base standard or RSPO coming from Indonesia, Malaysia and Columbia. There are used at 95% in our formulas. We know that our footprint is negative anyways.

We are very careful with reclycling, energy consumption, water waste.

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The price of RSPO soap base is higher than standard soap base. It takes time for our customers to understand the benefit of it. Major brands don't use them yet. The market is not mature enough. Some brands choose soap bases without palm oil because the final customer is not aware that alternatives to palm oil will be harmfull for forests in other countries.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We don't take any official step but we do communicate a lot with our customers about the benefit of it. We train our staff.
