We also consider human rights in our financing decisions guided by our Position Statements, which address the rights of workers and communities in relation to sectors with specific risks, as well as specifically covering Children's Rights.

We are working through the Thun Group of Banks and the UNEP FI network to achieve consensus and promote best practice on human rights due diligence

8.4 How does your organization benchmark the progress of its partners and/or clients in palm oil against its ESG criteria?

We have developed sector-specific environmental and social risk assessment (ESRA) tools (including palm oil), which include a series of questions regarding a client's operations and ability to manage environmental & social risks. ESRAs help us assess a client's performance against industry peers, build a long-term view of their ability and capacity to manage E&S risks and associated challenges, and compliance with our position statement. It includes consideration of our clients' track record in complying with relevant laws and regulations along with their E&S management systems, and their plan and strategy for reducing greenhouse gas emissions and water conservation and pollution.

In cases where we are not satisfied with the information that was provided, we will on an ad hoc basis request for an audit by an independent assessor.
