Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The main challenge remains to get our raw materials fully certified throughout the complete supply chain. This is the main reason that we did not achieve our target of 100% fully traceable raw materials in our supply chain (actual level is 64%). We're confident to achieve all our raw materials a 100% fully CSPO by 2019. Regarding the application of the Trade Mark on our own brand products, we are still investigating the market (positive) impact before implementation.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Struik Foods Europe, as part of the FMCG supply chain, is in constant contact with his business partners (customers & suppliers) to motivate and activate switching to CSPO. RSPO forms a integral part of our Sustainability Policy which communicated with our business partners and other stakehoulders. By doing so we propagate the use of CSPO.
