Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We can see that costumers as well as consumers ask for palm free products. In the autumn 2016 and winter 2016-2017 there have been published scientific studies regarding the content of Glycidyl esthers, 2-MCPD, 3-MCPD in food products containing PO The Swedish National Food Agency has reacted and we have noticed a discrepancy between EFSA and WHO regarding the thresholds for carcinogen heath effects from intake of these by-products. We, as a small organization, has no possibility to make own conclusions, we must rely on the safety assessments made by the authorities (EU/NFA).

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are such a small organization, fully focused on delivering products, so we have no possibility to make wide arrangements in this matter. we produce quality that are RSPO SG-certified
