### **Challenges**

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

A number of ingredients we use that contain palm oil are not available in CSPO format because - i) they are derivatives; ii) the supply chain we procure from has not converted to RSPO SCCS. Where ingredients are know to contain palm oil which is not CSPO, we regularly review status with the supplier. Where there are no plans to convert to CSPO, we seek alternative supply. We do not approve any new ingredients that contain palm oil, unless they are CSPO.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We have worked with retailers to fulfill their sustainable palm oil policies, and consulted with suppliers to get them to move to RSPO SCCS, rather than to palm-free alternatives.
