Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The costs of complying with RSPO are largely disproportionate to the amount of palm oil actually used. All of our palm oil used is a minor ingredient of a compound ingredient and is only present in a few end products at less than 1% of total product. The cost of compliance has reduced profit levels as the retail market does not accept cost increases for certified products. This has also affected the profitability on non palm oil products as they subsidise these losses.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We will continue to comply with the RSPO standards of trace-ability, segregation and staff training to maintain our certification as per our customers requirements.
