#### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We intend using CSPO according to specific customer demands, because CSPO products are relatively more expensive than the non CSPO ones, which will negatively affect the production cost.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

In collaboration with our customers we will try to understand and further support the need of using CSPO products.
